Detail

My request is for any and all documents, including internal emails, that discuss NOAA's decision to remove the magenta line from its navigational chart

I am seeking the database of the Marine Mammal Inventory Report compiled by the National Marine Fisheries Service for all years that are available in electronic form. I would like to receive this data in electronic form that is compatible with Excel or Access. Also, I would like to receive an electronic version of what is commonly called the data dictionary, which would explain the contents of each field of information.

ATTN - NAUTICAL DATA BRANCH: Requesting the following: (1)Latest Edition of All Volumes of the NAUTICAL CHART MANUAL (2) Any and all documents or files associated with the charting of oil and gas structures in Quarantine Bay, Louisiana, as depicted on NOAA/NOS/OCS Chart # 11364 and/or US Coast and Geodetic Survey Chart #1271 and/or NOAA Electronic Navigation Chart (ENC) US4LA35M for the years 1960-2016 (3)For the years 1960-2016, any and all copies of documents provided by the US Army Corps of Engineers to NOAA/NOS/OCS (and specifically the NOS Marine Charting Division) regarding any structures in Quarantine Bay, Louisiana, including without limitation permits for construction of structures in Quarantine Bay and/or establishment/erection of private aids to navigation in Quarantine Bay (4)For the years 1960-2016, any and all copies of documents relating to Well 149 or 149-D located in Quarantine Bay, Louisiana

1994 report by NOAA. Exact title unknown but referenced document indicates the following keywords: Terry Creek, Dupree Creek, Brunswick, GA sediment, Ampelisca abdita, amphipod, toxicity. Full quote regarding NOAA report to give context: In 1994, NOAA obtained sediment samples from estuarine settings in the Terry Creek and Back River areas and analyzed these samples for acute toxicity to the marine amphipod Ampelisca abdita (NOAA, 1994). Results indicated that sediments from Terry Creek exhibited sediment toxicity to A. abdita that was not observed in sediments from other areas of the Brunswick/St. Simon's estuary.

I would like copies of all emails including the word CLIMATE or the word CHARTER or the phrase "ADVISORY COMMITTEE". I limit this search to an electronic search of emails in the email accounts of the Acting Administrator Ben Friedman, and those of his Senior Advisor, Special Assistant, Chief of Staff, Deputy Chief of Staff and Policy Director. I limit this search to the dates July 1, 2017 to the present.

Law Firm	N/A
Business	This has received some news media alleging a cover up and asking EPA to intervene. http://jacksonville.com/news/georgia/2017-06-20/environmentalists-call-epa-remedy-coverup-brunswick
News Media	Although Specific as to search parameters, the scope of this request would likely touch on multiple topics over this timeframe, and spans several of the members of NOAA leadership.
