

2009-2019 Change: Percent change in number of jobs as measured by covered employment (covered employment is employment except self-employed) between 2009 and 2019 for the selected location, Kentucky and U.S.

2019-2029 Projected Change: Percent change in number of jobs as projected by covered employment (covered employment is employment except self-employed) between 2019-2029 for the selected location, Kentucky and U.S.

Employment: 2019 covered employment (covered employment is employment except self-employed) for the Top 5 industries for the selected location. The share of employment for the industry is represented in parenthesis. The top 5 industries follow the North American Industry Classification System [NAICS](#) at 2-digit industry classification.

Indicator (on Kentucky map): a drop down menu that allows selection between four indicators for the Kentucky counties map.

Labor Force: Number working age people (16 and older) for the selected location, Kentucky and U.S.

Labor Force Rate: Percent of people age 16 and older employed or unemployed and actively looking for work, from total population.

Location: a drop down menu that allows selection of a Kentucky county or Area Development District (ADD).

Location Quotient (LQ): indicator measuring the concentration or size of a region's industry as compared with the national average. The national benchmark is 1. A LQ greater than 1 means that the industry is more concentrated in the selected area as compared to the nation and vice-versa.

The Top 5 industry sectors with highest 2019 location quotient (LQ) for the selected location are represented in the bar chart on the left column of the profile.

Commute Time: Average number of minutes for commuters to travel to work for the selected location, Kentucky and U.S.

Median Household Income: Household income value that divides the household income distribution into halves – one-half of households with income above the median and the other half with income below the median. The measure is provided for the selected location, Kentucky and U.S.

Personal Income: 2019 total personal labor and non-labor income for the selected location.

Labor Income: 2019 earnings from wages and salaries.

Non-labor Income: 2019 earnings from transfer payments (government retirement and disability insurance benefits, Medicare or Medicaid payments, unemployment insurance benefits, etc.) and investments (dividends, interest, rent).

Population: Total number of people by place of residence.

Population in Poverty: Percent of people living in poverty for the selected location, Kentucky and U.S.

Total Jobs: Covered employment for 2009, 2019 and 2029 (covered employment is employment except self-employed). The measure is provided for the selected location, Kentucky and U.S.

Unemployment Rate: Percent of unemployed of the total labor force for the selected location, Kentucky and U.S.
