

2022 YAMPA BASIN RENDEZVOUS

Enhanced Observations for Water Resilience in the Yampa River Basin

Thursday, September 22 | 9 a.m. – 4 p.m. MDT

Friday, September 23 | 8 a.m. – 4 p.m. MDT

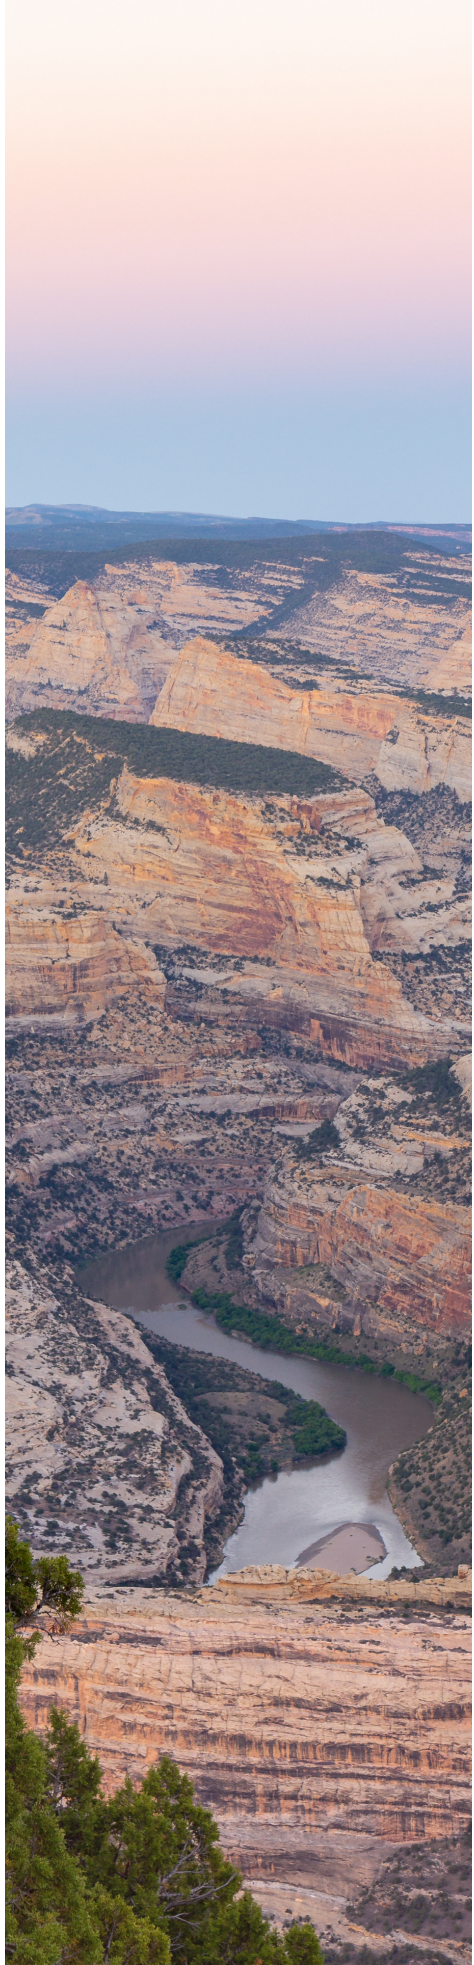

Colorado Mountain College, Albright Auditorium, Steamboat Springs, CO

The Yampa River Basin is a beautiful area with a rich history and a vibrant community. However, we are facing significant challenges in the face of climate change, including drought, wildfire, and water scarcity. How are we, as a community, observing changes in our water cycle and working to build resilience in the face of those changes? This event will explore these issues and provide an opportunity for us to learn from each other and work together to find solutions.

The event will feature a keynote address by a leading expert in water resilience, followed by a panel discussion with local water professionals. There will also be a series of interactive workshops and a networking session. The event is free and open to the public. Registration is required. For more information, please visit www.yampabasin.org.
