Results from
DSS's
Foster Parent
Support Survey

How long have you been a foster parent?

Length of Time	#(%)
6 months or less	50(10%)
7 to 11 months	46(9%)
1 to 3 years	205(41%)
4 to 6 years	105(21%)
7 or more years	89(18%)
Missing = 42

Estimated Need for Placements of Children & Youth in Foster Care

The Why

:

DSS believes that children do best with their family starting with kinship if children can not stay safely with their parents

However, if kin are not available, children should be placed in family like settings close to their homes

What We Needed To Do

DSS had an estimated foster home
“needs” report

However, that “needs” report needed
updating to better reflect DSS beliefs
and practice

That older “needs” report did not
provide characteristics of the children &
youth in our system

Assumptions

**Placements are not the same as homes.
Placements represent children or youth who need a family like setting.**

A foster home can have multiple placements (or children / youth)

In fact, DSS needs foster homes who can take care of multiple children especially sibling groups.

So what did we do?

Examined the data

Used the child's current placement (type of placement as well as geography) to estimate the need

Reflected characteristics such as age and sibling group sizes into the needs report

Estimated, where possible, needs for regular and therapeutic foster homes

More Assumptions

If a child or youth is with kin or in an adoptive home, that child or youth is where he /she should be

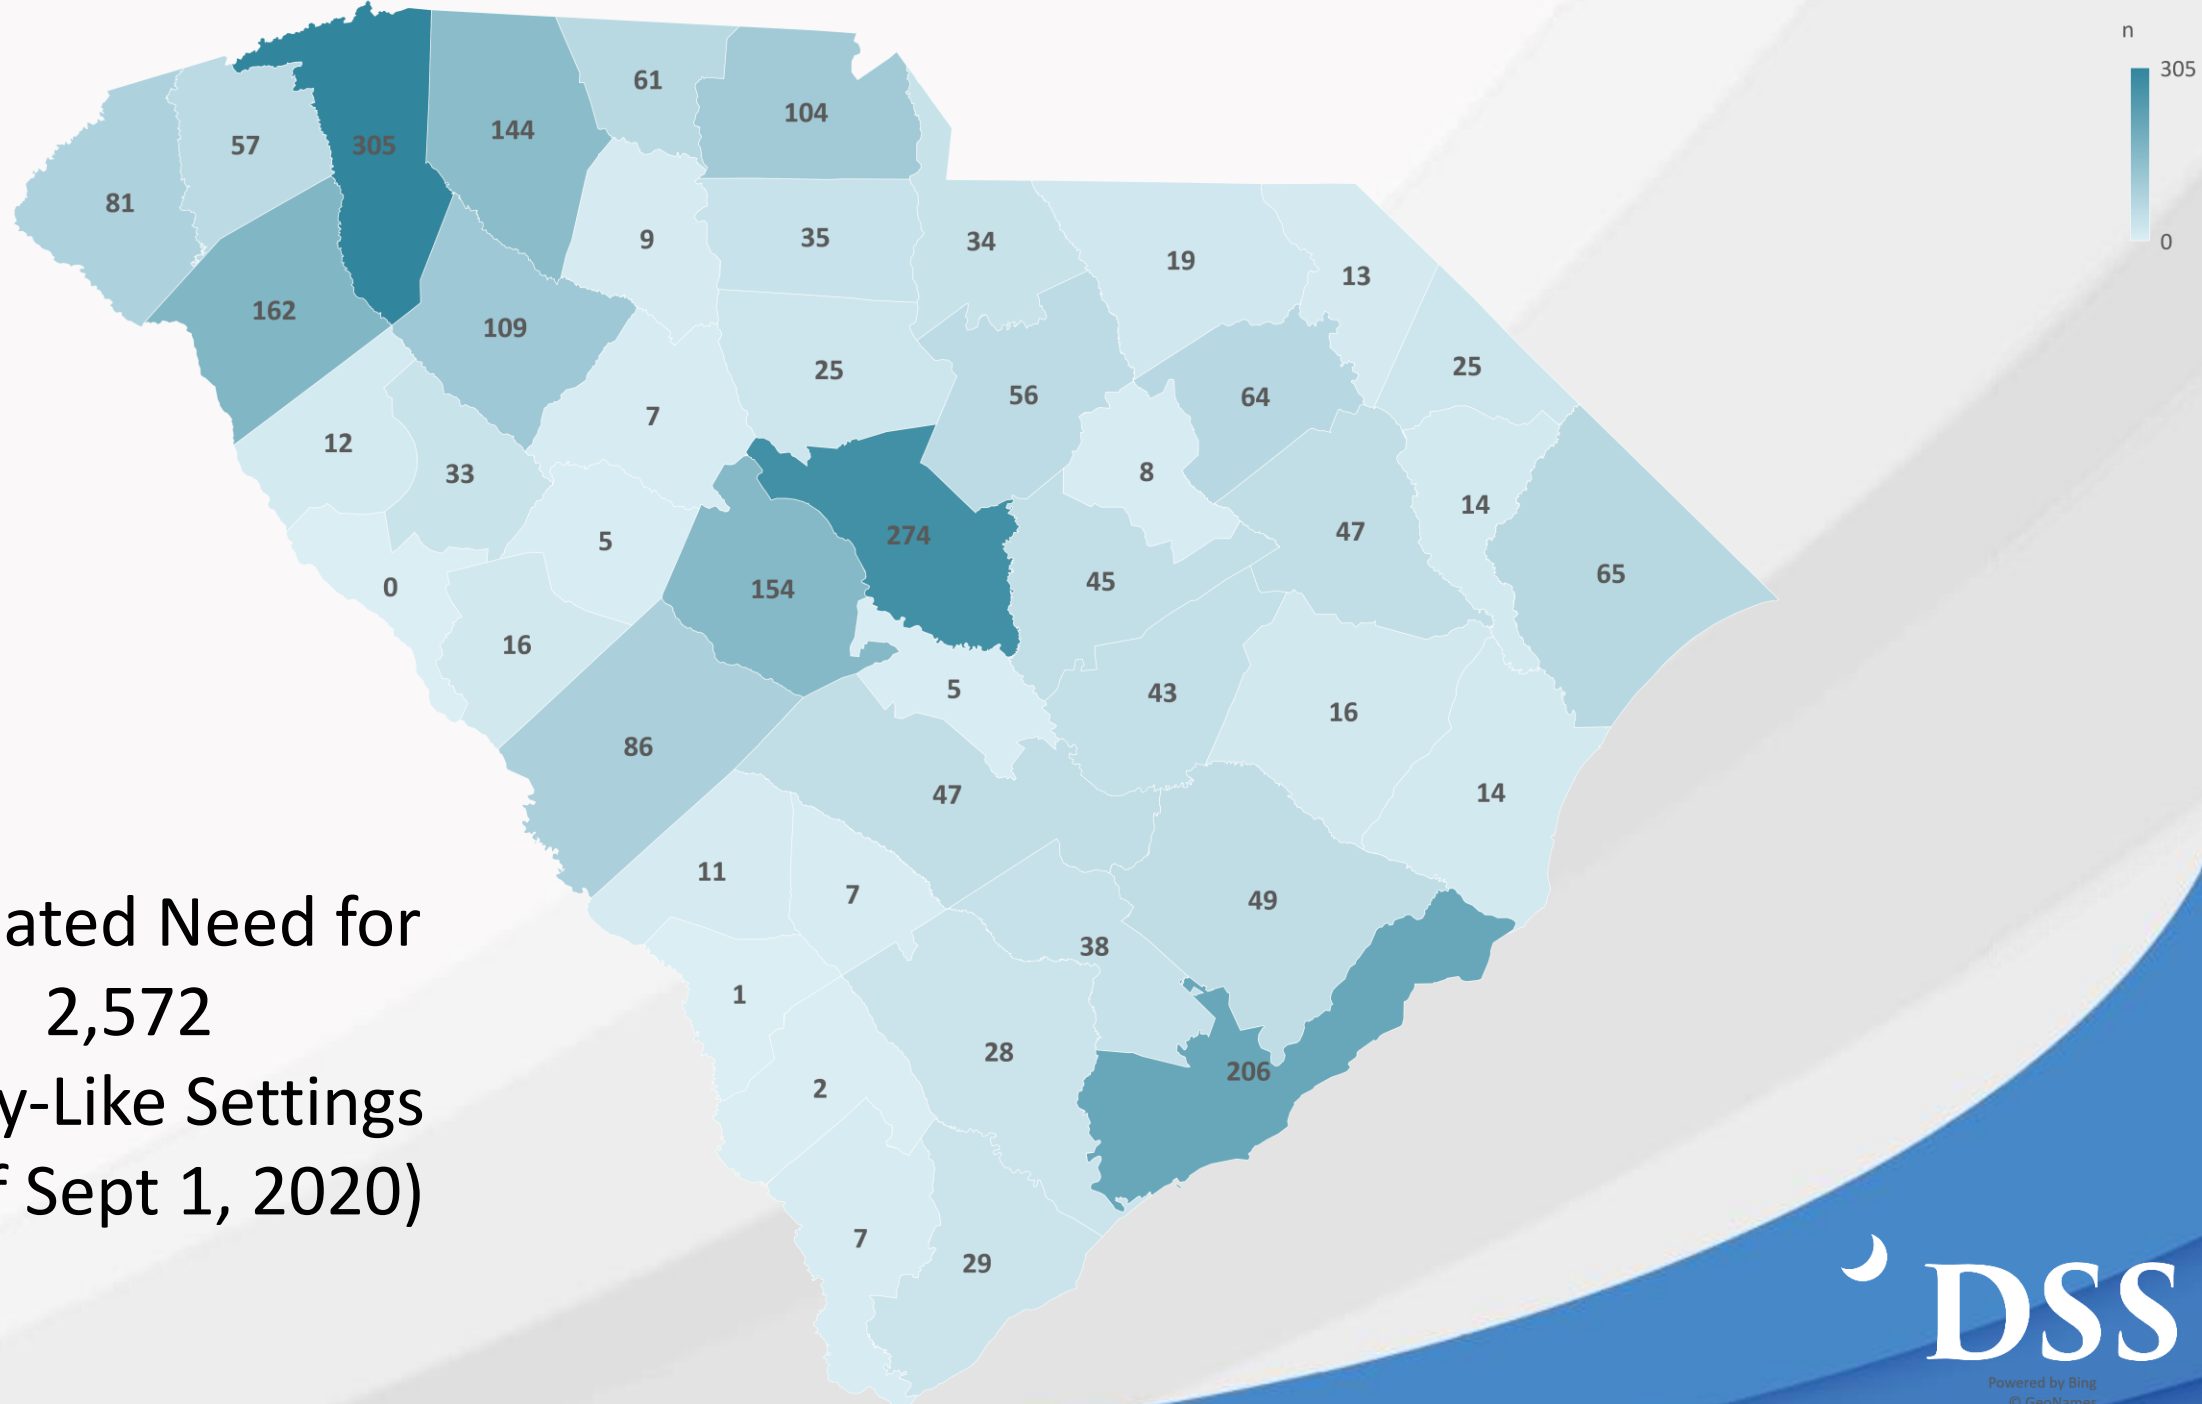

If the child is in a family-like setting (a foster home) but outside their county of origin, the child is not where they should be

If the youth is currently in congregate care, that youth may not be in the best setting for them. For the purposes of these estimates, that youth may “need” another placement for a family like setting

Children may change placements. Our “need” may change and therefore these estimates will change

So what did
the data say?

Estimated Need for
 2,572
 Family-Like Settings
 (As of Sept 1, 2020)

Family-Like Settings Need – Ranked

OVERVIEW OF CHILDREN & YOUTH CHARACTERISTICS

Family-Like Settings Characteristics— by Age

- **#1 Need by age is for Youth who are ages 13-17**
- **#2 Followed by children ages 7-12**

(Combined that is 66% of the children)

- **34% of the need for family like placements is for children under 7 years**

Let's discuss age preference information

Data is for Applicants - regular foster homes

Preferences

Prefer Age Range	Prefer Age Range (count)	Percent
0-6	538	45%
0-10	292	25%
6-13	46	4%
0-18	216	18%
6-18	24	2%
13-18	69	6%
Grand Total	1185	100%

Estimated Need

Age Group for Need	Number	Percent
0-2 yrs	376	15%
3- 6 yrs	486	19%
7 - 12 yrs	717	28%
13-17 yrs	993	39%
Total	2572	100%

(Data is from Heartfelt Calling, Sept 2019 – Aug 2020)

Family-Like Settings Characteristics – by Race

Note: There are also 152 children of Hispanic origin in need of a family-like setting in their county of origin.

These children are not included in the chart because they may be of any race

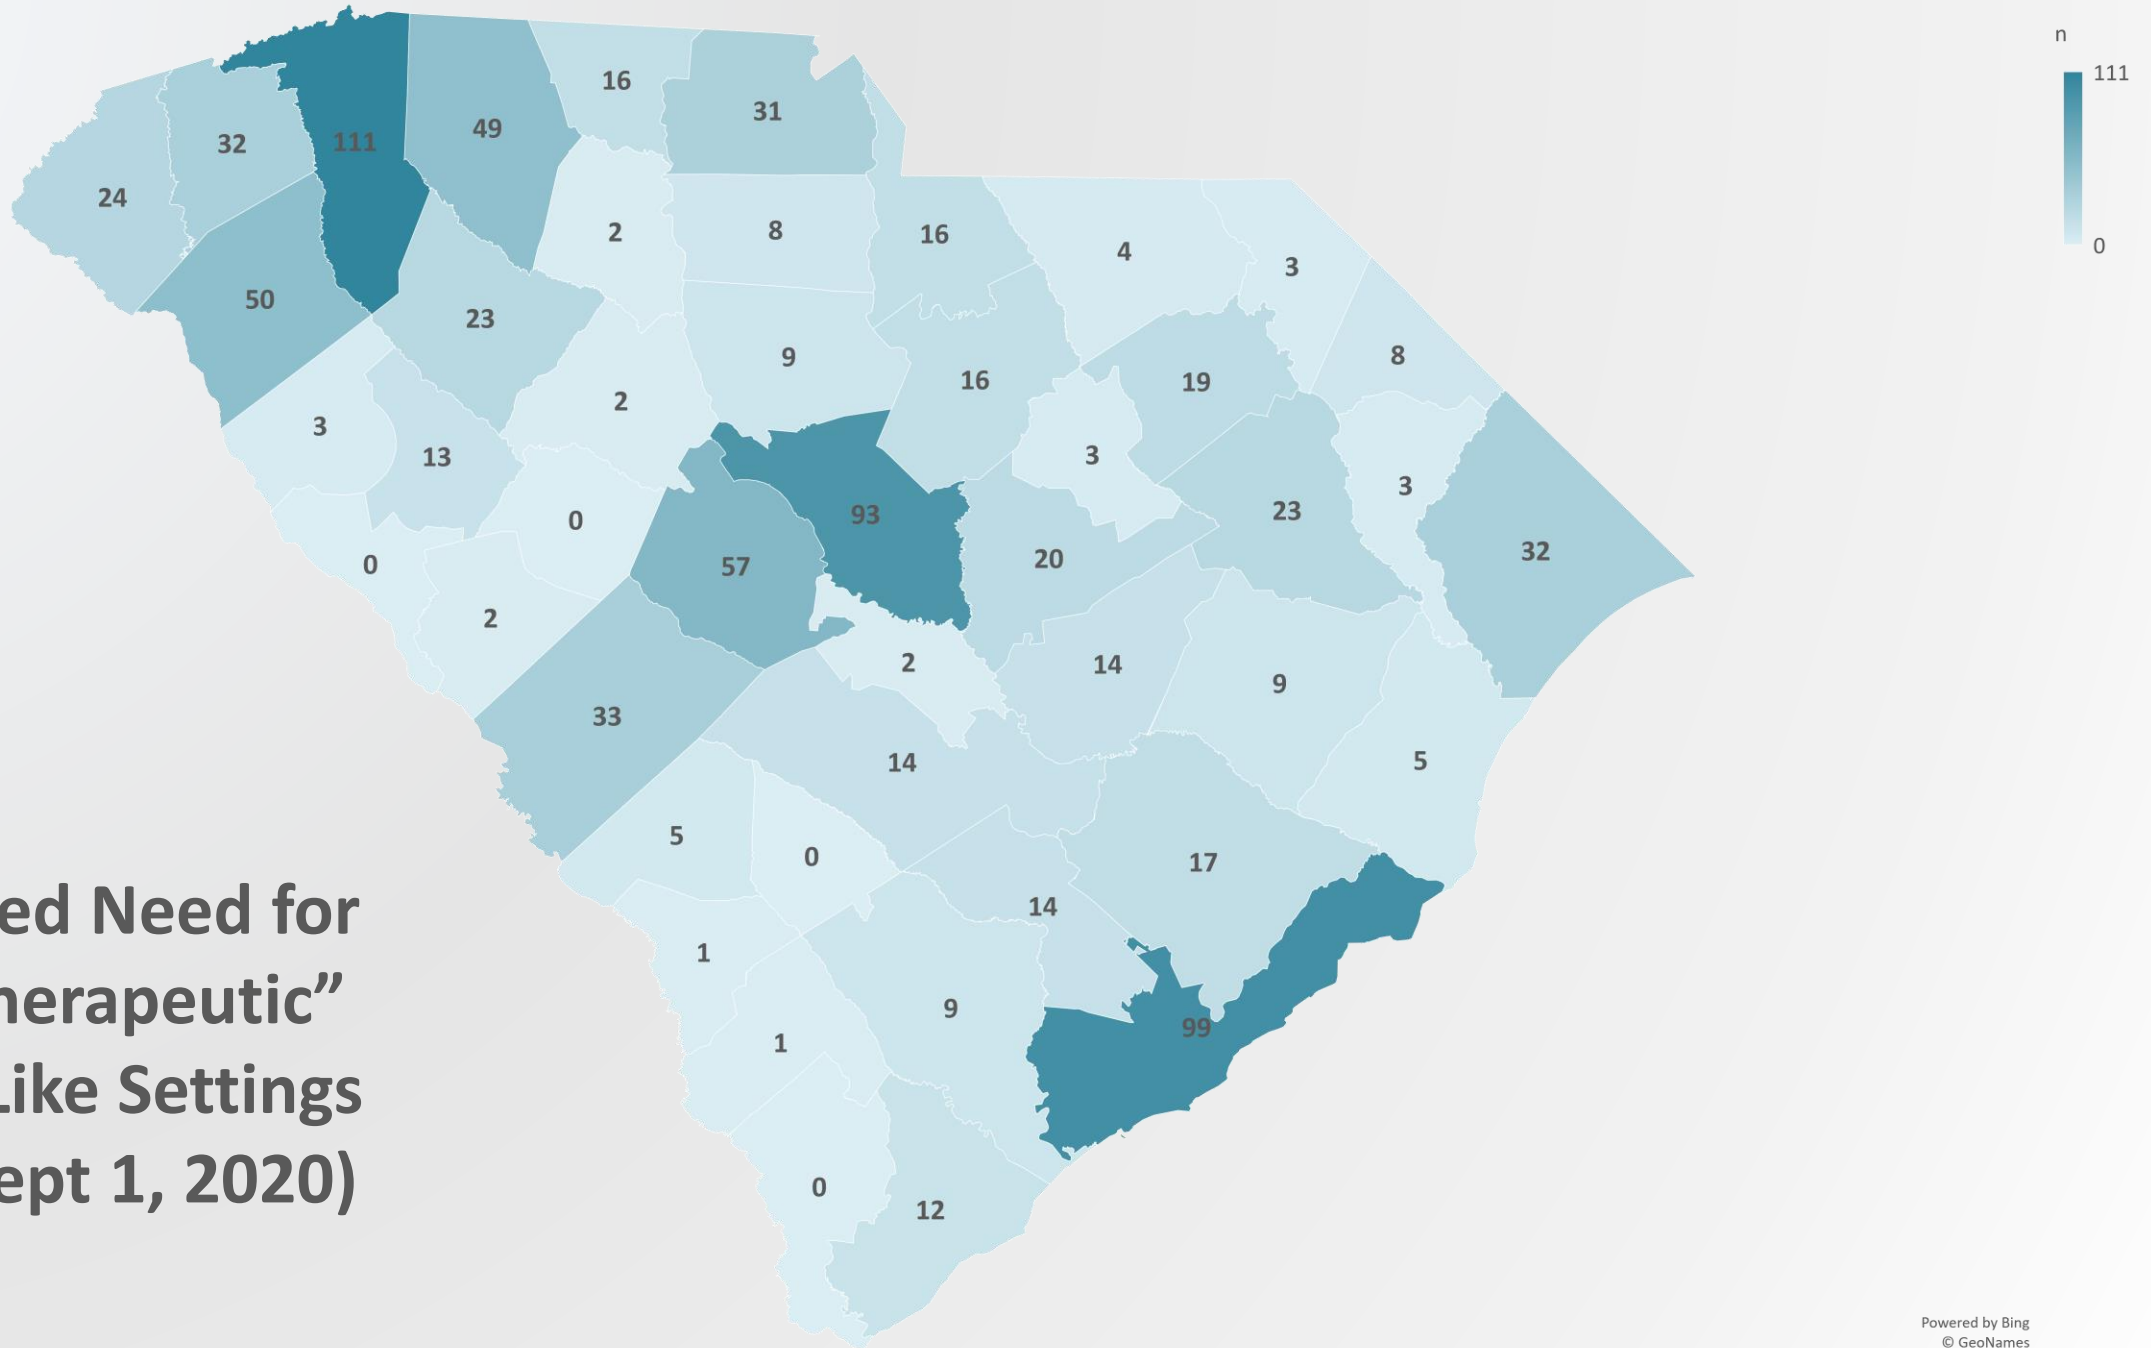

Family-Like Settings Need – by Type of Home

How did we estimate this?

1. If in a therapeutic placement currently, assumed that the youth still needed therapeutic care
2. Not all youth in group homes need therapeutic care. Examined their authorized level of care and current placements.
3. These are estimates and will change

Estimated Need for 907 “Therapeutic” Family Like Settings (as of Sept 1, 2020)

Let's talk about Sibling Groups

- Sibling Groups made this analysis very complicated
- When we examined sibling groups, we had situations where
 1. At least one child is out of the county of origin but not all
 2. All siblings in a group are out of the county of origin
 3. All siblings in a group are in the same county of origin but maybe not with the same provider. Or maybe the siblings are in a congregate care setting

Up to now,
we have
been talking
about
placements

- 2,572 Placements include children who have no siblings & children who are in sibling groups
- So let's switch to homes
 1. Estimate for 1,672 needed homes
 2. That estimate of 1,672 includes homes for children with no siblings and children with siblings
 3. Of the 1,672 homes, 556 homes are needed for sibling groups of 2 or more

Estimated
homes by
sibling size

in sibling group of 2	340	61%
in sibling group of 3	141	25%
in sibling group of 4+	75	13%
Total	556	100%

Let's discuss preference information

Data is for Applicants - regular foster homes

Preferences

Prefer # of Children	# of Applicants	Percent
1	464	39%
1-2	467	39%
1-3	108	9%
2	96	8%
3	22	2%
3+	28	2%
Total	1185	100%

Estimated Need by Sibling Size

By Sibling Size	# of Homes	Percent
1 child	1,116	67%
sibling group of 2	340	20%
sibling group of 3	141	8%
sibling group of 4+	75	4%
Total	1,672	100%

(Data is from Heartfelt Calling, Sept 2019 – Aug 2020)

County Examples of Need Breakdown

County of Origin	All Children in Foster Care	Estimated Need in County for Family-Like Placements	Family-Like Settings needed by Age				Family-Like Settings needed by Home Type	
			0-2	3-6	7-12	13-17	Regular Foster Homes	Therapeutic Foster Homes
Abbeville	14	12	2	2	2	6	9	3
Dorchester	46	38	4	6	10	18	24	14
Saluda	7	5	1	1	1	2	5	
Spartanburg	243	144	13	21	43	67	95	49
Williamsburg	22	16	1	3	6	6	7	9
