

Intensive Foster Care and Clinical Services (IFCCS)

Intensive Foster Care and Clinical Services (IFCCS) offices provide intensive case management, as well as financial management or contract support for children in DSS custody (Foster Care) who require therapeutic placement. This service is for children who have emotional problems so severe they cannot function effectively at home or adjust in regular foster care. The chart below tabulates the last placement type for each youth case managed by during SFY 2013-2014.
