

Local interagency staffing teams are responsible for identifying the foster children who are emotionally or behaviorally disturbed and in need of a therapeutic placement (i.e. ISCEDC eligible). The rise in the number of children who are ISCEDC approved parallels the rise in total number of children in foster care between SFY13 and SFY14. The percentage of foster children who were ISCEDC eligible rose only slightly from 25.6% in SFY13 to 26.0% in SFY14).
