Section 14: Application Questions

- Please describe the broader impacts of your research and how this visit will contribute to your thesis or final project. Broader impacts may be accomplished through your research itself, through the activities that are directly related to your research, or through activities that are complementary to your research. The National Science Foundation and NCAR value the advancement of scientific knowledge and activities that contribute to the achievement of societally relevant outcomes. Such outcomes include, but are not limited to: broadening participation in STEM; improved STEM education; increased public scientific literacy; improved well-being of individuals in society; increased partnerships between academia and industry; and improved national security. For more information, see: (<https://www.nsf.gov/od/oia/special/broaderimpacts/>), (max. 500 words).
- Has applicant visited NSF NCAR before?
- How does this program address the applicants education and career goals?
- In at least 200 words, share how your past actions and future plans encourage and contribute to diverse and inclusive work environments within your community or university/college. Describe how your personal background allows you to make unique contributions to the program.
- Please list your technical skills (in relation to this visit) i.e. data analysis, instrumentation/observations, modeling, etc.
- Please list your knowledge of, and state your proficiency with, the following: 1) Linux, 2) Microsoft Office and/or Google Docs/Sheets, 3) High Performance Computing or scripting languages (i.e. Supercomputer usage)
