

Kentucky Substance Use Research & Education

Using data to drive public safety and public health efforts against substance use across the Commonwealth

Brief 34: Six Major Overdose-Related Substances and General Overdose-Related Events in Kentucky, January 1, 2017–March 31, 2024

Based on data from possession and trafficking citations, drug overdose-related deaths, emergency department visits, hospitalizations, submissions to the state police lab, and general drug overdose-related events

Released September 2024

Produced by the Kentucky State Police Intelligence Branch and the Kentucky Injury Prevention and Research Center, as bona fide agent for the Kentucky Department for Public Health.

This project is supported by the Centers for Disease Control and Prevention (CDC) of the U.S. Department of Health and Human Services (HHS) as part of cooperative agreement 1 NU17CE010186 totaling \$5.4 million with 0% financed with nongovernmental sources. The contents are those of the author(s) and do not necessarily represent the official views of, nor an endorsement by, CDC, HHS, or the U.S. government. Data Evaluation Survey

We would like to hear your feedback on the Kentucky Substance Use Research & Education (K-SURE) briefs and other outputs you use. This will help us improve future K-SURE briefs, stakeholder engagement, dissemination, and audience receptivity. You

can find the survey here:

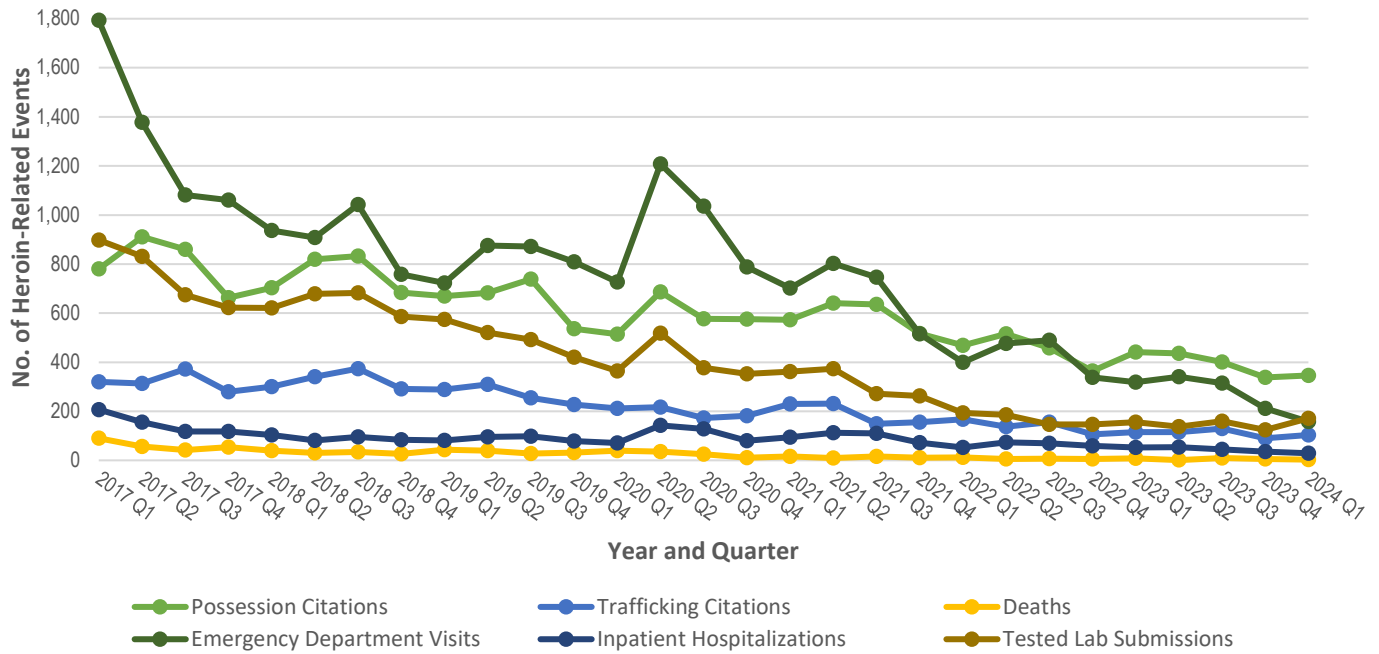

https://qualtricsxm6yh3ssdyd.qualtrics.com/jfe/form/SV_5vCcuHwyEuC7dly

Thank you in advance!

The K-SURE Team

Heroin-Related Events

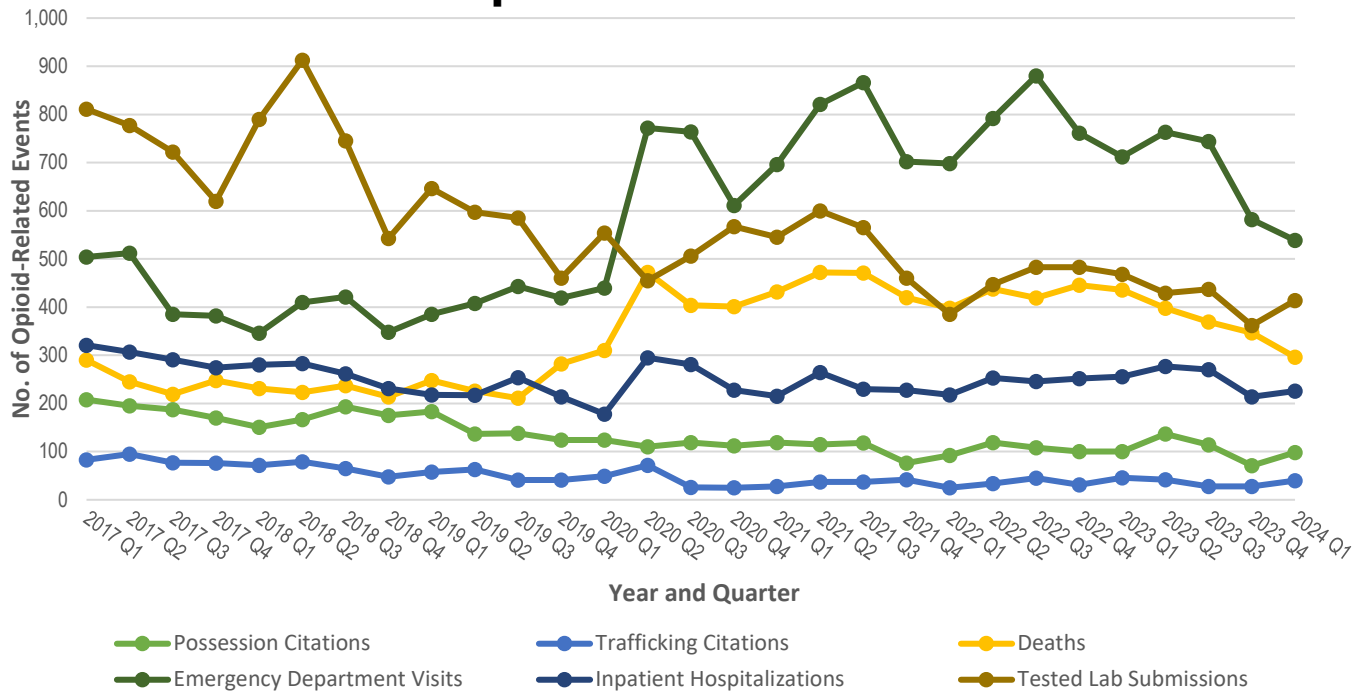

Data are provisional and subject to change. The number of citations could be greater than the number of individuals cited; citations are with over 90% of law enforcement agencies reporting. Death data are based on drug overdose-related deaths among Kentucky residents. Drug overdose-related hospitalizations represent encounters of care among Kentucky residents and could be greater than the number of individual patients treated in acute care facilities. Drug overdose-related emergency department visits represent encounters of care among Kentucky residents and could be greater than the number of individual patients treated. Tested lab submission data represent those substances submitted to the lab for identification purposes; quantity is not reflected. Lab data represent submissions tested within the corresponding time; submission date is not reflected. Testing of submissions is based on those items supporting the highest-tier charge(s).

Data sources: Kentucky Open Portal System; Kentucky Death Certificate Database, Office of Vital Statistics, Cabinet for Health and Family Services; Kentucky Outpatient Services Database Files, Office of Data and Analytics, Cabinet for Health and Family Services; Kentucky Inpatient Hospitalization Claims Files, Kentucky Office of Data and Analytics, Cabinet for Health and Family Services; Kentucky State Police Crime Laboratory.

Key Findings:

- Heroin possession citations decreased by 55.6% from January 2017 through March 2024 and increased by 2.4% from Q4 2023 through Q1 2024.
- Heroin trafficking citations decreased by 67.5% from January 2017 through March 2024 and increased by 15.6% from Q4 2023 through Q1 2024.
- Kentucky resident heroin-related deaths declined by 96.7% from January 2017 through March 2024 and by 50% from Q4 2023 through Q1 2024.
- Heroin-related emergency department (ED) visits and inpatient hospitalizations both declined from January 2017 through March 2024 (by 91.2% and 86%, respectively). Both ED visits and inpatient hospitalizations decreased from Q4 2023 through Q1 2024 (by 25.5% and 17.1%, respectively), as well.
- Heroin-related tested lab submissions decreased by 81% from January 2017 through March 2024 and increased by 37.9% from Q4 2023 through Q1 2024.
- Overall, total heroin-related events (possession and trafficking citations, deaths, ED visits, inpatient hospitalizations, and tested lab submissions) decreased by 80.2% from the beginning of 2017 through the end of December 2023 and increased by 0.7% from Q4 2023 through Q1 2024.

Opioid-Related Events

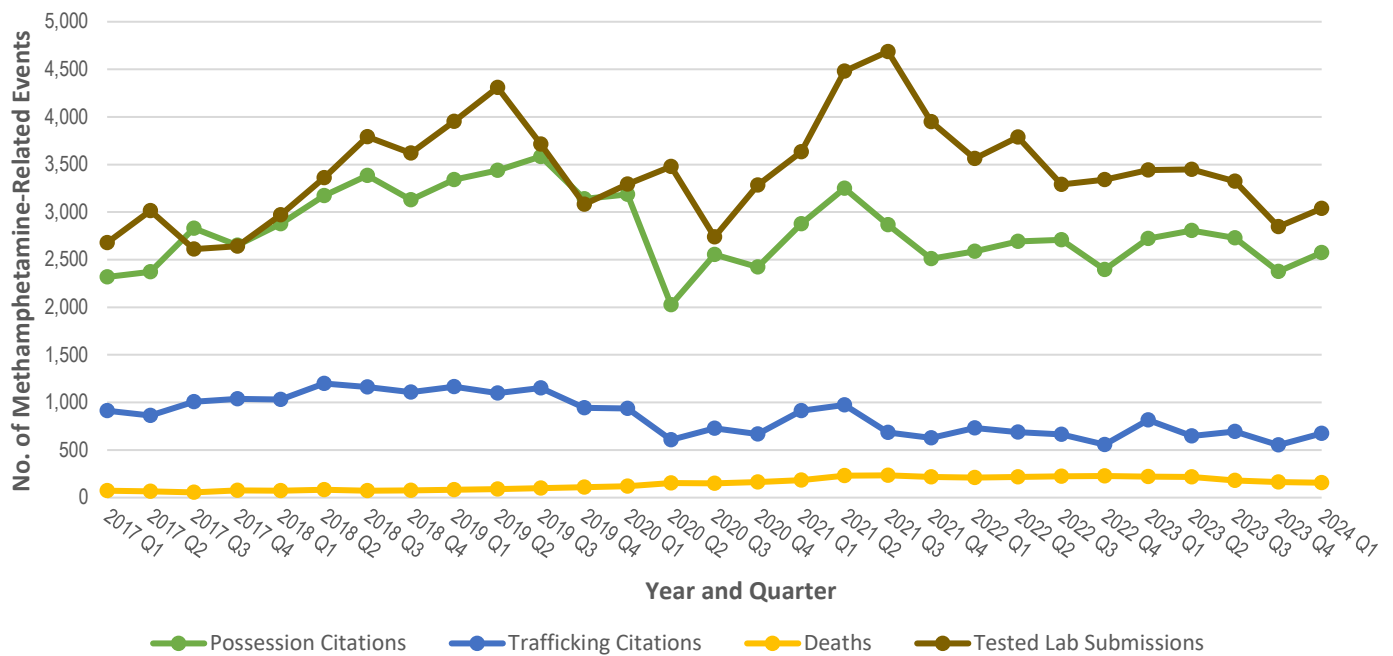

Data are provisional and subject to change. Opioid-related events reflect non-heroin- and non-fentanyl-related opioids. The number of citations could be greater than the number of individuals cited; citations are with over 90% of law enforcement agencies reporting. Death data are based on drug overdose-related deaths among Kentucky residents. Drug overdose-related hospitalizations represent encounters of care among Kentucky residents and could be greater than the number of individual patients treated in acute care facilities. Drug overdose-related emergency department visits represent encounters of care among Kentucky residents and could be greater than the number of individual patients treated. Tested lab submission data represent those substances submitted to the lab for identification purposes; quantity is not reflected. Lab data represent submissions tested within the corresponding time; submission date is not reflected. Testing of submissions is based on those items supporting the highest-tier charge(s). Data sources: Kentucky Open Portal System; Kentucky Death Certificate Database, Office of Vital Statistics, Cabinet for Health and Family Services; Kentucky Outpatient Services Database Files, Office of Data and Analytics, Cabinet for Health and Family Services; Kentucky Inpatient Hospitalization Claims Files, Kentucky Office of Data and Analytics, Cabinet for Health and Family Services; Kentucky State Police Crime Laboratory.

Key Findings:

- Opioid possession citations decreased by 52.9% from Q1 2017 through Q1 2024 and increased by 38% from Q4 2023 through Q1 2024.
- Opioid trafficking citations decreased by 51.8% from Q1 2017 through Q1 2024, and increased by 42.9% from Q4 2023 through Q1 2024.
- Kentucky resident opioid-related deaths increased by 2.1% from Q1 2017 through Q1 2024 and declined by 14.7% from Q4 2023 through Q1 2024.
- Opioid-related ED visits increased by 6.9% from Q1 2017 through Q1 2024 and decreased by 7.4% from Q4 2023 through Q1 2024.
- Opioid-related inpatient hospitalizations declined by 29.6% from Q1 2017 through Q1 2024 and increased by 14.4% from Q4 2023 through Q1 2024.
- Tested lab submissions that positively identified opioids decreased by 49% from Q1 2017 through Q4 2022 and increased by 14.4% from Q4 2023 through Q1 2024.
- Opioids and their devastating effects remain prevalent throughout the Commonwealth despite a 27.2% reduction in opioid-related events from Q1 2017 through Q1 2024; an 0.6% increase was seen from Q4 2023 through Q1 2024.

Methamphetamine-Related Events

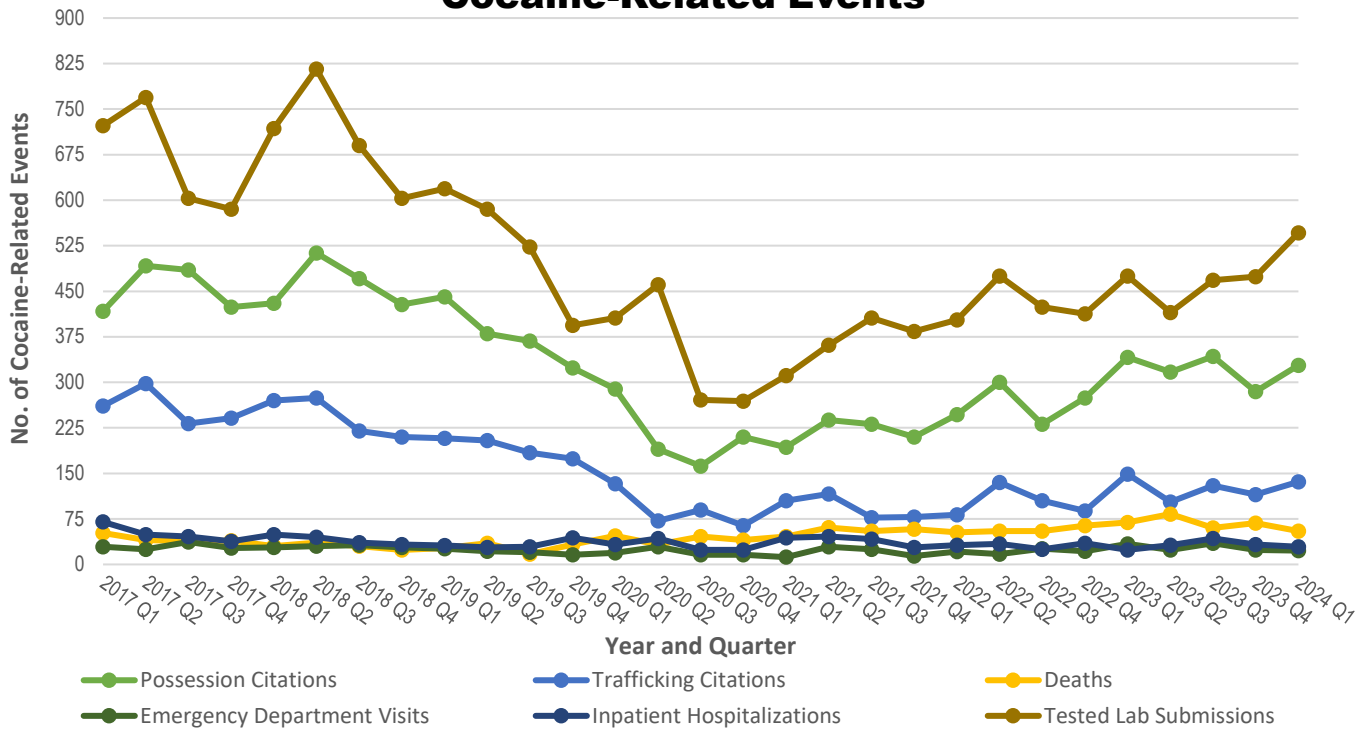

Data are provisional and subject to change. The number of citations could be greater than the number of individuals cited; citations are with over 90% of law enforcement agencies reporting. Death data are based on drug overdose-related deaths among Kentucky residents. Tested lab submission data represent those substances submitted to the lab for identification purposes; quantity is not reflected. Lab data represent submissions tested within the corresponding time; submission date is not reflected. Testing of submissions is based on those items supporting the highest-tier charge(s).

Data sources: Kentucky Open Portal System; Kentucky Death Certificate Database, Office of Vital Statistics, Cabinet for Health and Family Services; Kentucky State Police Crime Laboratory.

Key Findings:

- Methamphetamine possession citations rose by 11% from Q1 2017 through Q1 2024 and by 8.3% from Q4 2023 through Q1 2024.
- Methamphetamine trafficking citations decreased by 26.3% from Q1 2017 through Q1 2024 and increased by 21.9% from Q4 2023 through Q1 2024.
- A 115.3% increase in methamphetamine-related overdose deaths was observed among Kentucky residents from Q1 2017 through Q1 2024; all involved the use of more than one drug (polydrug use). A 5.5% decrease in deaths occurred from Q4 2023 through Q1 2024.
- Tested lab submissions positively identifying methamphetamine increased by 13.5% from Q1 2017 through Q1 2024 and by 6.8% from Q4 2023 through Q1 2024.
- Methamphetamine use and distribution continue to threaten the Commonwealth’s safety and health, as methamphetamine-related events increased by 7.7% from Q1 2017 through Q1 2024 and by 8.5% from Q4 2023 through Q1 2024.

Cocaine-Related Events

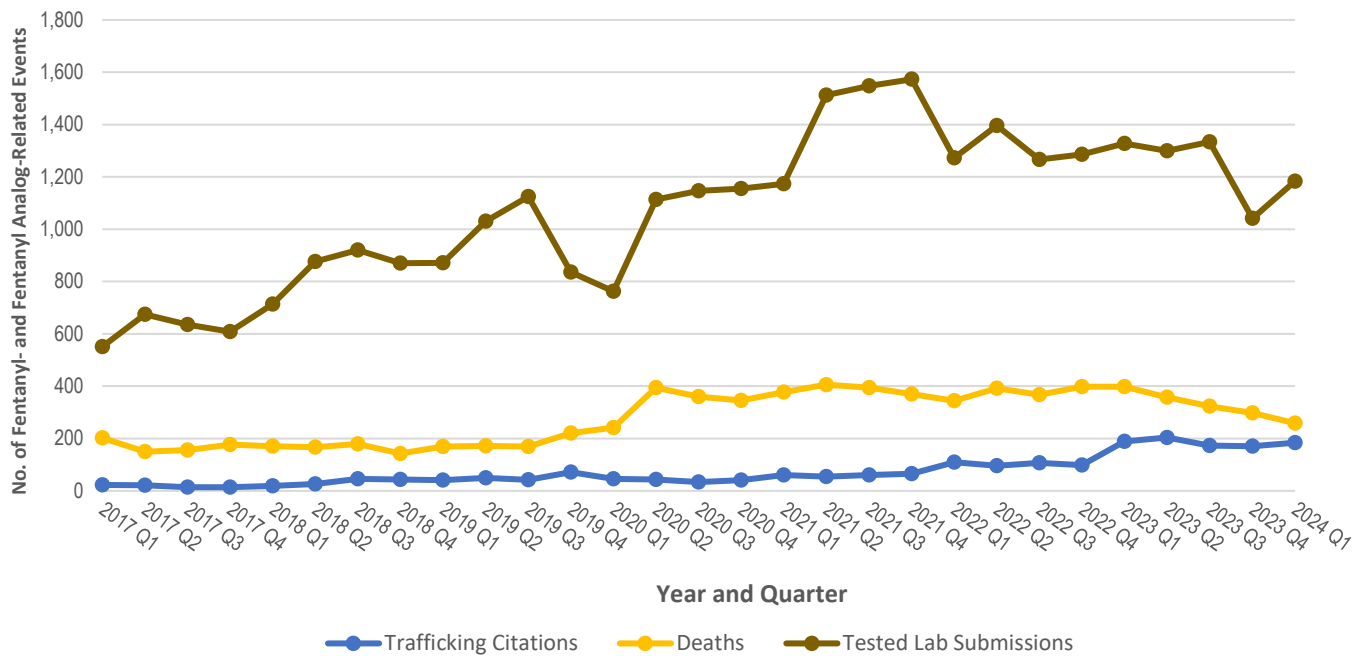

Data are provisional and subject to change. The number of citations could be greater than the number of individuals cited; citations are with over 90% of law enforcement agencies reporting. Death data are based on drug overdose-related deaths among Kentucky residents. Drug overdose-related hospitalizations represent encounters of care among Kentucky residents and could be greater than the number of individual patients treated in acute care facilities. Drug overdose-related emergency department visits represent encounters of care among Kentucky residents and could be greater than the number of individual patients treated. Tested lab submission data represent those substances submitted to the lab for identification purposes; quantity is not reflected. Lab data represent submissions tested within the corresponding time; submission date is not reflected. Testing of submissions is based on those items supporting the highest-tier charge(s).

Data sources: Kentucky Open Portal System; Kentucky Death Certificate Database, Office of Vital Statistics, Cabinet for Health and Family Services; Kentucky Outpatient Services Database Files, Office of Data and Analytics, Cabinet for Health and Family Services; Kentucky Inpatient Hospitalization Claims Files, Kentucky Office of Data and Analytics, Cabinet for Health and Family Services; Kentucky State Police Crime Laboratory.

Key Findings:

- Statewide cocaine possession citations decreased by 21.3% from Q1 2017 through Q1 2024 and increased by 15.1% from Q4 2023 through Q1 2024.
- Cocaine trafficking citations decreased by 47.9% from Q1 2017 through Q1 2024 and increased by 18.3% from Q4 2023 through Q1 2024.
- Cocaine-related deaths increased 5.8% from Q1 2017 through Q1 2024 and declined by 19.1% from Q4 2023 through Q1 2024.
- Cocaine-related emergency department visits decreased by 20.7% from Q1 2017 through Q1 2024 and by 4.2% from Q4 2023 through Q1 2024.
- Cocaine-related inpatient hospitalizations declined by 58.6% from Q1 2017 through Q1 2024; a 12.1% decrease occurred from Q4 2023 through Q1 2024.
- Tested lab submissions positively identifying cocaine decreased by 24.5% from Q1 2017 to Q1 2024 and increased by 15.2% from Q4 2023 through Q1 2024.
- Overall, cocaine-related events decreased by 28% from Q1 2017 through Q1 2024, while increasing by 11.8% from Q4 2023 through Q1 2024 across Kentucky.

Fentanyl- and Fentanyl Analog-Related Events

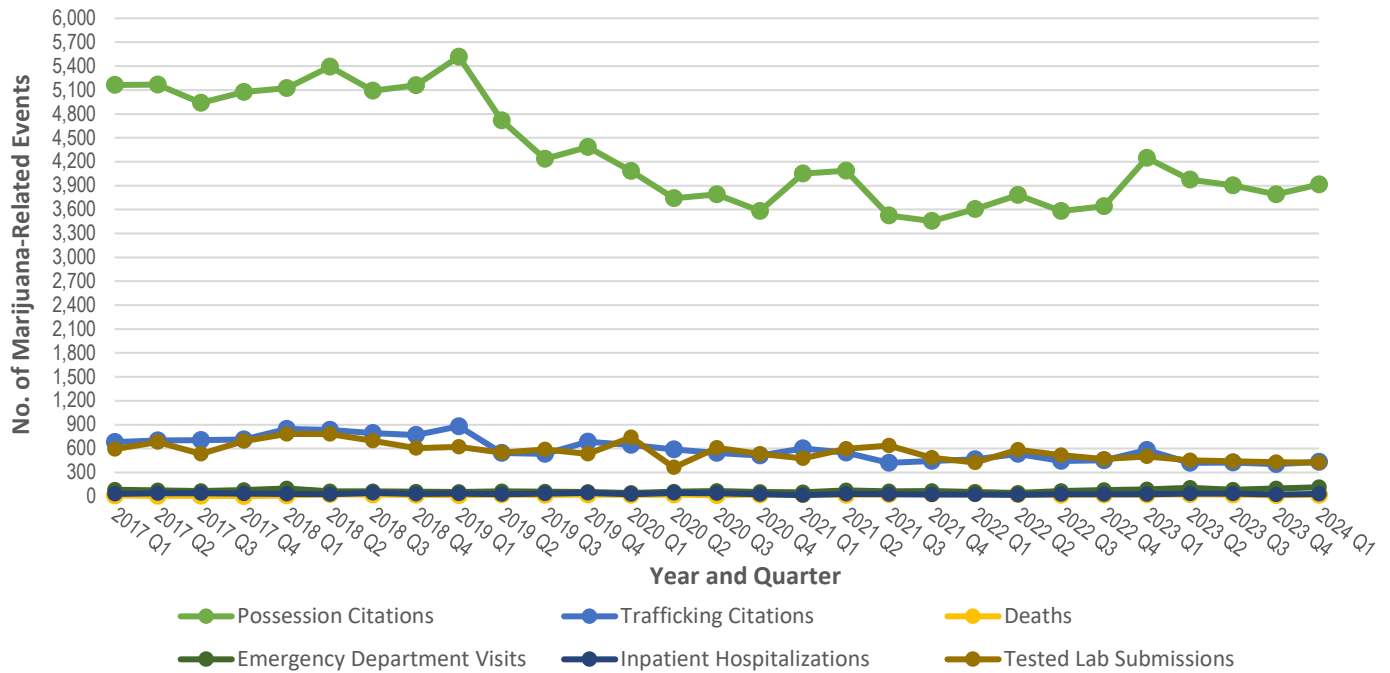

Data are provisional and subject to change. The number of citations could be greater than the number of individuals cited; citations are with over 90% of law enforcement agencies reporting. There are no Kentucky Revised Statute codes for fentanyl possession. Death data are based on drug overdose-related deaths among Kentucky residents. Tested lab submission data represent those substances submitted to the lab for identification purposes; quantity is not reflected. Lab data represent submissions tested within the corresponding time; submission date is not reflected. Testing of submissions is based on those items supporting the highest-tier charge(s).
 Data sources: Kentucky Open Portal System; Kentucky Death Certificate Database, Office of Vital Statistics, Cabinet for Health and Family Services; Kentucky State Police Crime Laboratory.

Key Findings:

- Notably, fentanyl and fentanyl analog trafficking citations increased 700% from Q1 2017 through Q1 2024 and by 7.6% from Q4 2023 through Q1 2024. Citations related to fentanyl and its related analogs may be underestimated, as fentanyl is often associated with polydrug use and laboratory testing is often needed to confirm its presence.
- Fentanyl- and fentanyl analog-related deaths increased by 28.2% from Q1 2017 through Q1 2024 and decreased by 13.1% from Q4 2023 through Q1 2024.
- Tested lab submissions positively identifying fentanyl and fentanyl analogs rose by 114.7% from Q1 2017 through Q1 2024 and by 13.5% from Q4 2023 through Q1 2024.
- Fentanyl and fentanyl analogs are pervasive in Kentucky—increasing the risk of overdose and exposure to individuals, families, communities, and public safety—as fentanyl- and fentanyl analog-related events across Kentucky increased by 109.5% from Q1 2017 through Q1 2024, with a 7.6% increase from Q4 2023 through Q1 2024.

Marijuana-Related Events

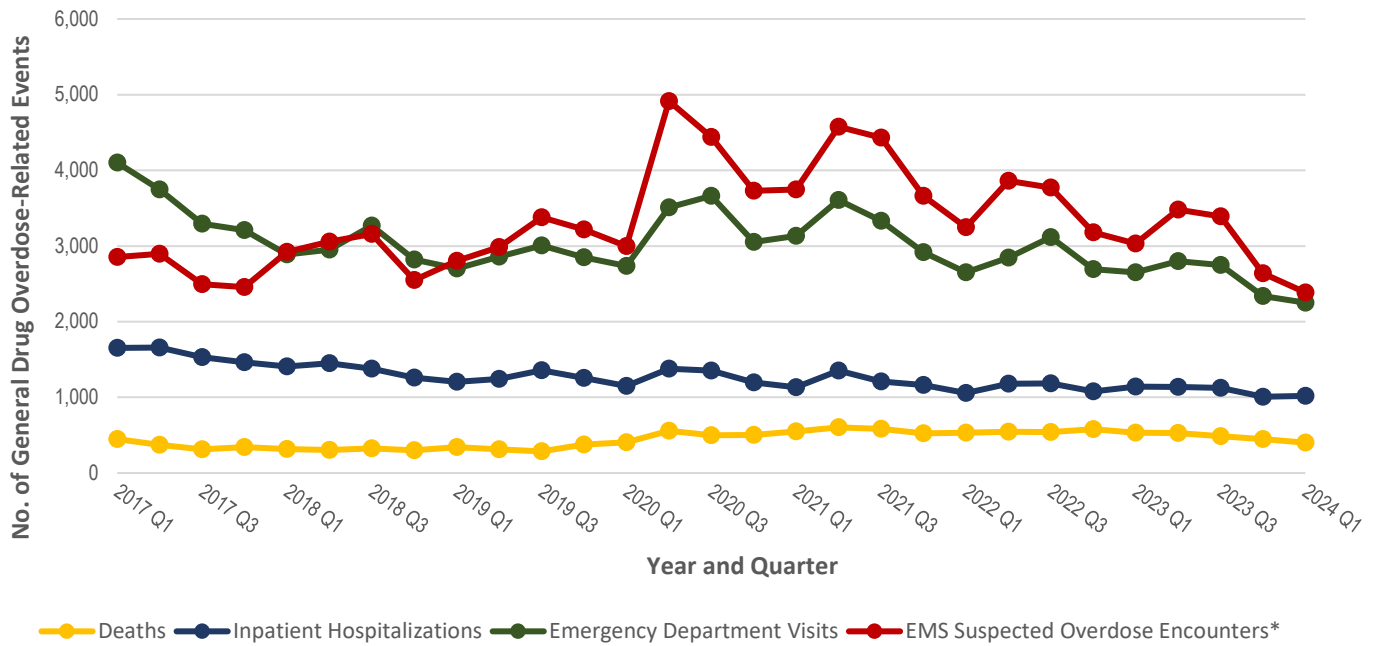

Data are provisional and subject to change. The number of citations could be greater than the number of individuals cited; citations are with over 90% of law enforcement agencies reporting. Death data are based on drug overdose-related deaths among Kentucky residents. Drug overdose-related hospitalizations represent encounters of care among Kentucky residents and could be greater than the number of individual patients treated in acute care facilities. Drug overdose-related emergency department visits represent encounters of care among Kentucky residents and could be greater than the number of individual patients treated. Tested lab submission data represent those substances submitted to the lab for identification purposes; quantity is not reflected. Lab data represent submissions tested within the corresponding time; submission date is not reflected. Testing of submissions is based on those items supporting the highest-tier charge(s).

Data sources: Kentucky Death Certificate Database, Office of Vital Statistics, Cabinet for Health and Family Services; Kentucky Outpatient Services Database Files, Office of Data and Analytics, Cabinet for Health and Family Services; Kentucky Inpatient Hospitalization Claims Files, Kentucky Office of Data and Analytics, Cabinet for Health and Family Services.

Key Findings:

- Marijuana possession citations declined by 24.3% from Q1 2017 through Q1 2024 and rose by 3.3% from Q4 2023 through Q1 2024.
- Marijuana trafficking citations declined by 36.2% from Q1 2017 through Q1 2024 and rose by 7.4% from Q4 2023 through Q1 2024.
- Marijuana (cannabis)-related deaths increased by 58.3% from Q1 2017 through Q1 2024 and by 46.2% from Q4 2023 through Q1 2024; all involved polydrug use.
- Marijuana-related emergency department visits increased by 40.7% from Q1 2017 through Q1 2024 and by 16.3% from Q4 2023 through Q1 2024.
- Marijuana-related inpatient hospitalizations increased by 10.3% from Q1 2017 through Q1 2024 and by 39.1% from Q4 2023 through Q1 2024.
- Tested lab submissions positively identifying marijuana decreased 28.5% from Q1 2017 through Q1 2024 and by 0.7% from Q4 2023 through Q1 2024.
- Marijuana use and distribution are prevalent across Kentucky even as marijuana-related events declined by 24.7% from Q1 2017 through Q1 2024, with a 3.8% increase from Q4 2023 through Q1 2024.

General Drug Overdose-Related Events

*A large emergency medical services (EMS) agency began reporting to the Kentucky State Ambulance Reporting System in January 2018. Data are provisional and subject to change. Death data are based on drug overdose-related deaths among Kentucky residents. Drug overdose-related hospitalizations represent encounters of care among Kentucky residents and could be greater than the number of individual patients treated in acute care facilities. Drug overdose-related emergency department visits represent encounters of care among Kentucky residents and could be greater than the number of individual patients treated. EMS suspected overdose encounters, which represent encounters of care and could be greater than the number of individual patients treated, are based on scans of free-text fields and medication fields (for naloxone/Narcan administration with indicated positive response) and on state of incident (Kentucky). Data sources: Kentucky Death Certificate Database, Office of Vital Statistics, Cabinet for Health and Family Services; Kentucky Outpatient Services Database Files, Office of Data and Analytics, Cabinet for Health and Family Services; Kentucky Inpatient Hospitalization Claims Files, Kentucky Office of Data and Analytics, Cabinet for Health and Family Services; Kentucky State Ambulance Reporting System, Kentucky Board of Emergency Medical Services.

Key Findings:

- Statewide drug overdose-related deaths decreased by 10% from Q1 2017 through Q1 2024 and by 9.6% from Q4 2023 through Q1 2024.
- Drug overdose-related ED visits decreased by 45.1% from Q1 2017 through Q1 2024 and by 3.7% from Q4 2023 through Q1 2024.
- Drug overdose-related hospitalizations declined by 38.3% from Q1 2017 through Q1 2024 and rose by 1.2% from Q4 2023 through Q1 2024.
- Emergency medical services (EMS) suspected drug overdose-related encounters decreased by 16.4% from Q1 2017 through Q1 2024, and by 9.6% from Q4 2023 through Q1 2024.
- Among law enforcement agencies currently reporting, 3,836 naloxone doses were administered from December 12, 2018, through March 31, 2023 (data not shown).
- Drug use, misuse, and distribution are still affecting Kentuckians, even as a 33.1% decrease in general drug overdose-related events was observed from Q1 2017 through Q1 2024 and a 5.7% decrease occurred from Q4 2023 through Q1 2024.

K-SURE Data Matrix

	Emergency Department (ED) Visits	Inpatient Hospitalizations	Deaths	Possession Citations	Trafficking Citations	Crime Lab Submissions
Heroin	T401	T401	T401	KRS: 35120, 35121, 42195, 42196, 42205, 42206	KRS: 35100, 35101, 42105, 42106, 42376, 42377, 42378, 42379, 42466, 42468, 42470, 42480, 42483, 42486	Tested lab submissions represent those substances submitted to the lab for identification purposes; quantity is not reflected.
Opioids	T400, T402, T403, T404, T4060, T4069	T400, T402, T403, T404, T4060, T4069	T400, T402, T403, T404, T406	KRS: 35220, 35221, 42197, 42198, 42209, 42210, 42237, 42238, 42246	KRS: 35200, 35201, 42109, 42110, 42372, 42373, 42374, 42375, 42435, 42436, 42437, 42438, 42137, 42138	
Methamphetamine			Text scan	KRS: 42187, 42188, 42215, 42216	KRS: 42113, 42114, 42290, 42291, 42364, 42365, 42366, 42367	
Cocaine	T405	T405	T405	KRS: 35320, 35321, 42193, 42194, 42203, 42204	KRS: 35300, 35301, 42103, 42104, 42368, 42369, 42370, 42371	
Fentanyl and Fentanyl Analogs			T404 and text scan; Fentanyl Analogs: Methylfentanyl, Methoxybutyrylfentanyl, Acetylfentanyl, Acrylfentanyl, Hydroxythiofentanyl, Butyrylfentanyl, Carfentanil, Furanylfentanyl, Para_1, Para_2, U47700		KRS: 42465, 42472, 42474, 42476, 42478, 42590, 42593, 42596, 42599	

Marijuana	T407X1, T407X2, T407X3, T407X4, T407X5	T407X1, T407X2, T407X3, T407X4, T407X5	T407	KRS: 42330	KRS: 42301, 42302, 42311, 42312, 42321, 42322
