Expected Yield = 220	
cwt/Acre	

Peppers, All	
Month	Inches
February	
March	
April	
May	1.14
June	4.43
July	6.85
August	6.12
September	3.13
October	0.15
November	
Total	21.82
Expected Yield = 248.7	
cwt/Acre*	

Data supplied by the Natural Resource and Conservation Service, Southeastern Colorado, La Junta. Yield data based on good irrigation supply. Colorado NASS data 1988 through 1997 used.

* Yield data from Colorado NASS not available. FSA NAP T-Yields used.

These data are estimated consumptive water uses by the plant. Information on consumptive use by crop and normal precipitation by month are useful information when completing the producer documentation tool. Irrigation water applied and actual consumptive use amounts may need to be adjusted for specific locations and irrigation system efficiencies.
