

At-a-Glance 2022

The Centers for Disease Control and Prevention (CDC) supports the Managing Epilepsy Well (MEW) Network, whose mission is to advance epilepsy self-management by facilitating and implementing research, conducting research in collaboration with network and community stakeholders, and broadly disseminating the findings.

EVIDENCE-BASED EPILEPSY SELF-MANAGEMENT PROGRAMS:

- **HOBSCOTCH** (Home Based Self-management and Cognitive Training Changes Lives): a behavioral program designed to address memory and attention problems in adults. (*Caller, T. A., et al. Epilepsy Behav 2016,57(Pt A): 111-117*). 
- **PACES** (Program for Active Consumer Engagement in Epilepsy Self-Management): an in-person and phone-based program developed to improve self-management and related health outcomes in adults (*Fraser et al. Epilepsia, 2015, 56(8):1264-74*). 
- **Project UPLIFT** (Using Practice and Learning to Increase Favorable Thoughts) **for Epilepsy**: a phone-based program designed to prevent or reduce depression in adults. (*Thompson et al., Epilepsy Behav, 2010, 19(3):247-254; Thompson et al, J Consult Clin Psych, 2015, 83(2):304-313*). 
 - **Project UPLIFT (Español)**: UPLIFT was adapted for use with Hispanic and Spanish-speaking adults with epilepsy and shown to be effective. (*Spruill et al, Translat Behav Med 2021*)
- **SMART** (Self-Management for People with Epilepsy and a History of Negative Health Events): a phone- and web-based program that uses peer-support to promote connection and teach skills to minimize seizure risk and increase health-enhancing behaviors among adults with poorly controlled epilepsy. (*Sajatovic M, et al. Epilepsy Behav, 2019, 96(2370243)*). 
- **TIME** (Targeted Self-Management for Epilepsy and Mental Illness): a person-centered, holistic program for adults with severe and persistent mental illness (*Sajatovic M, et al. Epilepsy Behav. 2016 Nov;64(Pt A):152-159*). 
- **MINDSET** (Management Information & Decision Support Epilepsy Tool): a tablet-based clinical aid for both the English- and Spanish-speaking patient and health-care provider to improve communication about self-management (*Shegog et al. Epilepsy Behav 2020 113(107552)*). 

PROMISING PROGRAMS:

- **PAUSE to Learn Your Epilepsy** (Personalized Internet Assisted Underserved Self-Management of Epilepsy): an online and video-conference self-management program using epilepsy.com education modules for adults (*Pandey et al. Epilepsy Behav 2020;111(107228)*).
- **Project UPLIFT Adaptation for Racial/Ethnic Subgroups**: Adaptation and evaluation of UPLIFT for African-American and Hispanic adults (*Quarells RC et al. Epilepsy Behav 2019(99):106422*).

LEGACY EVIDENCE-BASED PROGRAMS:

- **PEARLS** (Program to Encourage Active Rewarding Lives): a home-based, collaborative-care depression treatment intervention for adults with epilepsy (*Chaytor et al., Epilepsy Behav, 2011, 20(3):545-549*).
- **WEBEASE**: An Internet self-management program to improve medication, stress, and sleep. (*DiIorio, et al. Epilepsy Behav, 2011,22(3):469-474*).
