WITH A NEW FOREWORD BY GREG WEINER

Distinguished political theorist Ralph Ketcham traces the evolution of democracy over the course of four hundred years. He follows democracy's bumpy ride in a book that is both an exercise in the history of ideas and an explication of democratic theory. Ketcham examines the rationales for democratic government, identifies the fault lines that separate democracy from good government, and suggests ways to strengthen it in order to meet future challenges. Drawing on an encyclopedic command of history and politics, he examines the rationales that have been offered for democratic government over the course of four manifestations of modernity that he identifies in the Western and East Asian world since 1600.

"Few readers who pick up Ketcham's book will not be envious of his wide-ranging knowledge of democratic theory and political philosophy."—*Political Studies Review*

"A remarkably lucid evolutionary study of democratic theory since 1600 . . . covering four hundred years, Ketcham masterfully corrals the myriad theories into four manifestations. His subsequent evaluation of democratic ideas compellingly concludes that contemporary democracies provide reliable government but not good government. Ketcham suggests that combinations of Western and Asian ideas might refresh not only the study of democracy but also the system of democracy itself. An exciting addition to the field. Highly recommended."

"A timely addition to the conversation surrounding democracy and recent attempts to promote its spread. The value of Ketcham's wider analysis, one that is neither myopically occidental nor majoritarian, is realized in his distinctive and provocative concluding suggestions about the future course of strong democracy—one that overcomes the entrenched politics of identity in favor of a robust civic commitment. This book is a timely analysis of what democracy has meant, and what it might yet come to mean. It deserves a wide audience."—Institute for Advanced Studies in Culture, University of Virginia
