PAN-AMERICAN TEMPERATURE AND PRECIPITATION TABLE

- ## Purpose

The Pan-American Temperature and Precipitation Table is a collection of temperature and precipitation data and present weather for selected cities in Mexico, Central and South America, and the Caribbean area. It provides general weather conditions two times per day for general public use domestically and internationally.

- ## Content

This product provides general weather conditions, high and low temperatures in degrees Fahrenheit (°F) and degrees Celsius (°C), and measured precipitation in the previous 6, 12, or 24 hours, as indicated, for selected cities in Mexico, Central and South America, and the Caribbean area. The morning product contains the low temperature for the current day and the high

temperature for the previous day. The evening product contains the low and high temperature for the current day.

• Coverage

The Pan-American Temperature and Precipitation Table includes the following stations (as shown in the map above):

Acapulco, Mexico
Barbados
Bermuda
Bogotá, Colombia
Curaçao, Netherlands Antilles
Freeport, Bahamas
