

**USDA-ARS/
U.S. Wheat and Barley Scab Initiative
FY06 Final Performance Report (approx. May 06 – April 07)
July 16, 2007**

Cover Page

PI:	David F. Garvin
Institution:	USDA-ARS
Address:	Room 411 Borlaug Hall 1991 Upper Buford Circle St. Paul, MN 55108
E-mail:	garvi007@umn.edu
Phone:	612-625-1975
Fax:	612-625-1268
Fiscal Year:	2006
USDA-ARS Agreement ID:	NA
USDA-ARS Agreement Title:	Fusarium Head Blight Research.
FY06 ARS Award Amount:	\$ 5,851

USWBSI Individual Project(s)

USWBSI Research Area*	Project Title	ARS Award Amount
VDUN	Coordination of a Uniform Regional Scab Nursery for Spring Wheat Parents.	\$ 5,851
	Total Award Amount	\$ 5,851

Principal Investigator

Date

* CBCC – Chemical, Biological & Cultural Control
EEDF – Etiology, Epidemiology & Disease Forecasting
FSTU – Food Safety, Toxicology, & Utilization of Mycotoxin-contaminated Grain
GET – Genetic Engineering & Transformation
HGR – Host Genetics Resources
HGG – Host Genetics & Genomics
PGG – Pathogen Genetics & Genomics
VDUN – Variety Development & Uniform Nurseries

Project 1: *Coordination of a Uniform Regional Scab Nursery for Spring Wheat Parents.*

1. What major problem or issue is being resolved and how are you resolving it?

The significant environmental effect associated with the wheat disease scab (*Fusarium* head blight) poses an obstacle for breeding programs seeking to develop more scab-resistant germplasm. Undertaking multisite evaluations across a range of environments is the only way to adequately assess scab resistance in germplasm. The Uniform Regional Scab Nursery for Spring Wheat Parents (URSN) seeks to address this need. Interested parties from academia and private companies nominate germplasm for scab resistance evaluation at field locations in Minnesota, North Dakota, South Dakota, and Canada that provide conditions to enhance scab development on wheat. Both hard red spring wheat and durum wheat are included in the URSN. These data are supplied to the coordinator, who oversees its collation and statistical analysis, and produces an annual report. An additional aspect of the URSN is to encourage open and free germplasm exchange, in order to foster cooperation among breeders in efforts to develop scab resistant germplasm.

**2. List the most important accomplishment and its impact (how is it being used?).
Complete all three sections (repeat sections for each major accomplishment):**

Accomplishment: The URSN was grown for the 12th year in 2006, at locations in the U.S. and Canada. Entries were contributed by university, industry, and national wheat breeding programs. Scab resistance-related trait data from the locations were compiled and analyzed, and the annual report that was produced provides individual location data summaries, and data summaries and rankings across locations.

Impact: This nursery continues to function as an excellent source of data on wheat scab resistance from the field and as a vehicle for exchange of germplasm among spring wheat breeders in the Upper Midwest.

As a result of that accomplishment, what does your particular clientele, the scientific community, and agriculture as a whole have now that they didn't have before?

The 2006 annual report provides readily accessible information on scab resistance in germplasm emerging from a number of wheat breeding programs. This in turn provides guidance to wheat breeders for future parental selections in their crossing programs. No other comparable vehicle for multisite scab evaluations and subsequent germplasm exchange exists for the spring wheat region.

Include below a list of the publications, presentations, peer-reviewed articles, and non-peer reviewed articles written about your work that resulted from all of the projects included in the grant. Please reference each item using an accepted journal format. If you need more space, continue the list on the next page.

This project is designed specifically to produce a non-peer reviewed annual report for distribution to Nursery cooperators and other interested parties.

GARVIN, D.F, AND BLANKENHEIM, Z. 2007. Report of the 2006 Uniform Regional Scab Nursery for Spring Wheat Parents. The report is made available at the USWBSI web site (<http://www.scabusa.org/>) and through the Graingenes web site (<http://wheat.pw.usda.gov>).
