

**USDA-ARS/
U.S. Wheat and Barley Scab Initiative
FY08 Final Performance Report (approx. May 08 – April 09)
July 15, 2009**

Cover Page

PI:	Mary Burrows
Institution:	Montana State University
Address:	Dept. of Plant Sciences and Plant Pathology PB 207 Bozeman, MT 5971
E-mail:	mburrows@montana.edu
Phone:	406-994-7766
Fax:	406-994-7600
Fiscal Year:	2008
USDA-ARS Agreement ID:	59-0790-8-064
USDA-ARS Agreement Title:	Uniform Fungicide Trial for Fusarium Head Scab Control in Montana Spring Wheat.
FY08 USDA-ARS Award Amount:	\$ 5,681

USWBSI Individual Project(s)

USWBSI Research Category*	Project Title	ARS Adjusted Award Amount
MGMT	Uniform Fungicide Trial for Fusarium Head Scab Control in Montana Spring Wheat.	\$5,681
	Total Award Amount	\$ 5,681

Principal Investigator

Date

* MGMT – FHB Management
FSTU – Food Safety, Toxicology, & Utilization of Mycotoxin-contaminated Grain
GDER – Gene Discovery & Engineering Resistance
PBG – Pathogen Biology & Genetics
BAR-CP – Barley Coordinated Project
HWW-CP – Hard Winter Wheat Coordinated Project
VDHR – Variety Development & Uniform Nurseries – Sub categories are below:
 SPR – Spring Wheat Region
 NWW – Northern Winter Wheat Region
 SWW – Southern Sinter Wheat Region

Project 1: *Uniform Fungicide Trial for Fusarium Head Scab Control in Montana Spring Wheat.*

1. What major problem or issue is being resolved relevant to Fusarium head blight (scab) and how are you resolving it?

Fusarium head blight affects grower yields and seed quality in Montana. We are managing Fusarium head blight using variety tolerance, fungicide applications, and cultural methods including timing of irrigation.

2. List the most important accomplishment and its impact (i.e. how is it being used) to minimize the threat of Fusarium head blight or to reduce mycotoxins. Complete both sections (repeat sections for each major accomplishment):

Accomplishment:

No Fusarium head blight was established in these plots in 2008. Therefore, the most important accomplishment of this study was the lack of phytotoxicity of the fungicide products on wheat in Montana.

Impact:

Our involvement in the uniform fungicide trial has raised awareness of Fusarium head blight as an important disease in Montana.

Include below a list of the publications, presentations, peer-reviewed articles, and non-peer reviewed articles written about your work that resulted from all of the projects included in the grant. Please reference each item using an accepted journal format. If you need more space, continue the list on the next page.

If your FY08 USDA-ARS Grant contained a VDHR-related project, include below a list all germplasm or cultivars released with full or partial support of the USWBSI. List the release notice or publication. Briefly describe the level of FHB resistance. If this is not applicable (i.e. no VDHR-related project) to your FY08 grant, please insert 'Not Applicable' below.
