

USDA-ARS
U.S. Wheat and Barley Scab Initiative
FY19 Performance Report
Due date: July 24, 2020

Cover Page

Principle Investigator (PI):	Esten Mason
Institution:	University of Arkansas
E-mail:	esten@uark.edu
Phone:	479-575-5725
Fiscal Year:	2019
USDA-ARS Agreement ID:	59-0206-7-005
USDA-ARS Agreement Title:	Development of FHB-Resistant Wheat Cultivars for the Midsouth
FY19 USDA-ARS Award Amount:	\$ 89,782
Recipient Organization:	University of Arkansas 305 Administration Bldg. Fayetteville, AR 72701
DUNS Number:	191429745
EIN:	71-6003252
Recipient Identifying Number or Account Number:	0403-05710-24-2538
Project/Grant Reporting Period:	6/1/19 - 5/31/20
Reporting Period End Date:	5/31/2020

USWBSI Individual Project(s)

USWBSI Research Category*	Project Title	ARS Award Amount
VDHR-SWW	Development of FHB Resistant Wheat Cultivars for the Midsouth	\$ 79,657
VDHR-SWW	Developing Doubled Haploids to Expedite Variety Development in Soft Red Winter Wheat	\$ 10,125
FY19 Total ARS Award Amount		\$ 89,782

Principal Investigator

7/22/20

Date

* MGMT – FHB Management
FST – Food Safety & Toxicology
GDER – Gene Discovery & Engineering Resistance
PBG – Pathogen Biology & Genetics
EC-HQ – Executive Committee-Headquarters
BAR-CP – Barley Coordinated Project
DUR-CP – Durum Coordinated Project
HWW-CP – Hard Winter Wheat Coordinated Project
VDHR – Variety Development & Uniform Nurseries – Sub categories are below:
 SPR – Spring Wheat Region
 NWW – Northern Soft Winter Wheat Region
 SWW – Southern Soft Red Winter Wheat Region

FY19 Performance Report
PI: Mason, Esten
USDA-ARS Agreement #: 59-0206-7-005
Reporting Period: 6/1/19 - 5/31/20

Project 1: *Development of FHB Resistant Wheat Cultivars for the Midsouth*

1. What are the major goals and objectives of the research project?

- 1) Develop and release high yielding, FHB resistant cultivars.
- 2) Increase breeding efficiency through collaborative phenotyping, marker development and introgression of new genes using marker-assisted (MAS) and genomic selection (GS).
- 3) Screen and report the reactions of breeding lines and currently grown commercial cultivars to FHB using misted inoculated nurseries.

2. What was accomplished under these goals or objectives? (For each major goal/objective, address items a-b) below.)

• **Objective 1: Develop and release high yielding, FHB resistant cultivars adapted to Arkansas and the mid-south.**

a) What were the major activities?

The major activities on a yearly cycle for this objective include developing new breeding populations, advancement of breeding populations and lines using phenotypic, molecular marker and genomic prediction data and release of breeding lines as varieties.

b) What were the significant results?

- i. 681 crosses made, the majority containing moderate resistance and FHB.
- ii. 4,800 breeding lines and varieties screened for FHB resistance
- iii. ~1,800 samples were harvested for FDK and sent for DON analysis
- iv. Numerous breeding lines containing *FHB1* were yield tested in FY19.

c) List key outcomes or other achievements.

Breeding lines with increased levels of FHB resistance and high grain yield were identified. AR06146E-1-4 was released.

• **Objective 2: Increase breeding efficiency through collaborative phenotyping, marker development and introgression of new genes using marker-assisted (MAS) and genomic selection (GS).**

a) What were the major activities?

The major activities of this objective include genotyping of new breeding lines with markers for known QTL and whole genome genotyping of new breeding lines for determining genomic estimated breeding values (GEBV).

FY19 Performance Report
PI: Mason, Esten
USDA-ARS Agreement #: 59-0206-7-005
Reporting Period: 6/1/19 - 5/31/20

b) What were the significant results?

- i. Molecular marker data was used to select parents for crossing.
- ii. 550 new breeding lines genotyped and FHB prediction models developed
- iii. Molecular marker data generated on 550 breeding lines
- iv. Manuscript on development of genomic prediction models was published.
- v. Review manuscript published related to genomic selection methodology.

c) List key outcomes or other achievements.

Molecular markers and genomic selection are identifying FHB resistant lines earlier in the breeding cycle and at higher frequency.

• **Objective 3: Screen and report the reactions of breeding lines and currently grown commercial cultivars to FHB using misted inoculated nurseries.**

a) What were the major activities?

Evaluating multiple SunGrains, USDA and commercial nurseries for reaction to FHB in misted and inoculated nurseries.

b) What were the significant results?

- i. 96 entries in the Official Variety Trial were screened for FHB
- ii. Other cooperative nurseries screened included GAWN, SUNWHEAT, SUNPRE, UESSRWWN, and USSRWWN.

c) List key outcomes or other achievements.

Results of the Official Variety Test were published in print and online (<http://www.arkansasvarietytesting.com/>) and are accessible through ScabSmart. Data for the USDA nurseries was published by the nursery organizers.

3. Was this research impacted by the COVID-19 pandemic (i.e. university shutdowns, reduced or lack of support personnel, etc.)? If yes, please explain how this research was impacted or is continuing to be impacted.

This research was not impacted by COVID-19.

FY19 Performance Report

PI: Mason, Esten

USDA-ARS Agreement #: 59-0206-7-005

Reporting Period: 6/1/19 - 5/31/20

4. What opportunities for training and professional development has the project provided?

During the granting period, four graduate students (2 Ph.D. and 2 M.S.) were trained in the rating and breeding for FHB resistance, the use of molecular markers and genomic selection.

5. How have the results been disseminated to communities of interest?

Research results were published in scientific journals, extension publications and presented at meetings where target audience and stakeholders were present, including the annual United States Wheat and Barley Scab Initiative Meeting. Material was also available online through the state of Arkansas Variety Testing website (<http://www.arkansas-variety-testing.com/>) which is easily accessible to researchers, seedsmen and others. Specific outputs are listed in the Publications, Conference Papers, and Presentations section of this report.

Reporting Period: 6/1/19 - 5/31/20

Project 2: *Developing Doubled Haploids to Expedite Variety Development in Soft Red Winter Wheat*

1. What are the major goals and objectives of the research project?

The goal of this proposal is use double haploid technology to combine favorable loci for more rapid improvement of FHB resistance. This is done in a collaborative manner with exchange of DH lines.

3. What was accomplished under these goals or objectives? (*For each major goal/objective, address items a-b) below.*)

a) What were the major activities?

F₁ plants from two populations were sent to North Carolina State University with a target of producing 300 double haploid lines. Based on molecular marker screening, all were positive for *FHB1*. In total, 350 new double haploids produced through the scab initiative were evaluated in misted and inoculated nurseries in FY19 with a select number harvested for future evaluation. There were 2,655 total doubled haploids (including USWBSI and other sources) tested in the program.

b) What were the significant results?

- Yield data was collected on 250 double haploids.
- Selected double haploids were sent to other breeders for cooperative testing.
- Three lines with FHB1 were tested in the Arkansas Official Variety Trial.

c) List key outcomes or other achievements.

Double haploid lines with a high level of resistance were identified and advanced.

3. Was this research impacted by the COVID-19 pandemic (i.e. university shutdowns, reduced or lack of support personnel, etc.)? If yes, please explain how this research was impacted or is continuing to be impacted.

This research was not impacted by COVID-19

4. What opportunities for training and professional development has the project provided?

During the granting period, four graduate students (2 Ph.D. and 2 M.S.) were trained in the rating and breeding for FHB resistance, the use of molecular markers and genomic selection.

Training of Next Generation Scientists

Instructions: Please answer the following questions as it pertains to the FY19 award period (6/1/19 - 5/31/20). The term “support” below includes any level of benefit to the student, ranging from full stipend plus tuition to the situation where the student’s stipend was paid from other funds, but who learned how to rate scab in a misted nursery paid for by the USWBSI, and anything in between.

- 1. Did any graduate students in your research program supported by funding from your USWBSI grant earn their MS degree during the FY19 award period?**

Yes

If yes, how many? One MS student (Jamison Murry)

- 2. Did any graduate students in your research program supported by funding from your USWBSI grant earn their Ph.D. degree during the FY19 award period?**

No

If yes, how many?

- 3. Have any post docs who worked for you during the FY19 award period and were supported by funding from your USWBSI grant taken faculty positions with universities?**

No

If yes, how many?

- 4. Have any post docs who worked for you during the FY19 award period and were supported by funding from your USWBSI grant gone on to take positions with private ag-related companies or federal agencies?**

No

If yes, how many?

Release of Germplasm/Cultivars

Instructions: In the table below, list all germplasm and/or cultivars released with full or partial support through the USWBSI during the FY19 award period. All columns must be completed for each listed germplasm/cultivar. Use the key below the table for Grain Class abbreviations.

NOTE: Leave blank if you have nothing to report or if your grant did NOT include any VDHR-related projects.

Name of Germplasm/Cultivar	Grain Class	FHB Resistance (S, MS, MR, R, where R represents your most resistant check)	FHB Rating (0-9)	Year Released
AR06146E-1-4	SRWW	R	1	2019

Add rows if needed.

NOTE: List the associated release notice or publication under the appropriate sub-section in the 'Publications' section of the FPR.

Abbreviations for Grain Classes

- Barley - BAR
- Durum - DUR
- Hard Red Winter - HRW
- Hard White Winter - HWW
- Hard Red Spring - HRS
- Soft Red Winter - SRW
- Soft White Winter - SWW

Publications, Conference Papers, and Presentations

Instructions: Refer to the FY19-FPR_Instructions for detailed more instructions for listing publications/presentations about your work that resulted from all of the projects included in the FY19 grant award. Only citations for publications published (submitted or accepted) or presentations presented during the **award period (6/1/19 - 5/31/20)** should be included. If you did not publish/submit or present anything, state ‘Nothing to Report’ directly above the Journal publications section.

NOTE: Directly below each citation, you **must** indicate the Status (i.e. published, submitted, etc.) and whether acknowledgement of Federal support was indicated in the publication/presentation. See example below for a poster presentation with an abstract:

De Wolf, E., D. Shah, P. Paul, L. Madden, S. Crawford, D. Hane, S. Canty, R. Dill-Macky, D. Van Sanford, K. Imhoff and D. Miller. 2019. “Impact of Prediction Tools for Fusarium Head Blight in the US, 2009-2019.” In: S. Canty, A. Hoffstetter, H. Campbell and R.
