

USDA-ARS
U.S. Wheat and Barley Scab Initiative
FY20 Annual Performance Progress Report
Due date: July 29, 2021

Cover Page

Principle Investigator (PI):	Ruth Dill-Macky
Institution:	University of Minnesota
E-mail:	ruthdm@umn.edu
Phone:	612-625-2227
Fiscal Year:	2020
USDA-ARS Agreement ID:	59-0206-0-132
USDA-ARS Agreement Title:	Management of Fusarium Head Blight in Small Grains
FY20 USDA-ARS Award Amount:	\$ 41,592
Recipient Organization:	Regents of the University of Minnesota Suite 450 Sponsored FIN RPT-P100100001 Minneapolis, MN 55455-2003
DUNS Number:	555917996
EIN:	41 -6007513
Recipient Identifying Number or Account Number:	CON000000088217
Project/Grant Reporting Period:	5/6/20 - 5/5/21
Reporting Period End Date:	5/5/2021

USWBSI Individual Project(s)

USWBSI Research Category*	Project Title	ARS Award Amount
MGMT	Minnesota Component of the FHB Integrated Management Coordinated Project	\$ 24,682
GDER	A Field Nursery for Testing Transgenic Spring Wheat and Barley from the USWBSI	\$ 16,910
FY20 Total ARS Award Amount		\$ 41,592

7/29/2021

Principal Investigator

Date

* MGMT – FHB Management
FST – Food Safety & Toxicology
R- Research
S – Service (DON Testing Labs)
GDER – Gene Discovery & Engineering Resistance
PBG – Pathogen Biology & Genetics
EC-HQ – Executive Committee-Headquarters
BAR-CP – Barley Coordinated Project
DUR-CP – Durum Coordinated Project
HWW-CP – Hard Winter Wheat Coordinated Project
VDHR – Variety Development & Uniform Nurseries – Sub categories are below:
SPR – Spring Wheat Region
NWW – Northern Soft Winter Wheat Region
SWW – Southern Soft Red Winter Wheat Region

Project 1: *Minnesota Component of the FHB Integrated Management Coordinated Project*

1. What are the major goals and objectives of the research project?

Demethylation inhibitor (DMI) fungicides such as prothioconazole, metconazole, and tebuconazole have proven to be the most effective for Fusarium head blight (FHB) and deoxynivalenol (DON) management. When applied at or up to 6 days after anthesis to moderately resistant cultivars, these fungicides provide more than 70% reduction of both FHB index and DON, relative to an untreated, susceptible check. Preliminary results from trials conducted over the past few years showed that Miravis Ace[®] (adepidyn; pydiflumetofen), a new succinate dehydrogenase inhibitor fungicide, has comparable efficacy against FHB and DON to the DMI fungicides Prosaro[®] and Caramba[®] when applied at anthesis (Feekes 10.5.1) or at 50% head emergence (Feekes 10.3). This project represented the Minnesota participation in two experiments proposed in the overall MGMT-CP, an integrated management trial (IM) and a uniform fungicide trial (UFT). In combination these trials have contributed to the overall effort to test Miravis Ace across grain market classes and growing conditions.

2. What was accomplished under these goals or objectives? *(For each major goal/objective, address these three items below.)*

a) What were the major activities?

We participated annually in the two nationally coordinated experiments in the MGMT-CP, the integrated management (IM) and a uniform fungicide (UF) trials in 2020. In combination the data from these trials will contribute to the overall effort to test Miravis Ace across grain market classes and growing conditions. Experiments were established at two locations (St Paul and Crookston) for hard red spring wheat in 2020. The experiments were completed following the experimental design as established by the coordinating group.

b) What were the significant results?

In 2020 we generated significant levels of FHB and obtained data from the two locations where the experiments were established. The toxin data for these trials was obtained in March 2021 and the data has been compiled ready for submission to the project coordinator.

c) List key outcomes or other achievements.

Results of these experiments will be used to advance the development of best

management practices for FHB and DON.

3. Was this research impacted by the COVID-19 pandemic (i.e. university shutdowns and/or restrictions, reduced or lack of support personnel, etc.)? If yes, please explain how this research was impacted or is continuing to be impacted.

All field trials planned for 2020, were completed as planned although the post-harvest activities, including the DON testing were delayed following the closure of campus in response to the pandemic. Activities taking place inside the buildings were limited by staffing, we had no summer interns to help with field work in 2020 and I was training a new field technician who started the day the campus closed. All samples for DON analyses in 2020 were submitted later than normal and the data were returned from the UMN mycotoxin testing lab in some months later than normal. The data analyzes for both seasons were therefore delayed until after the subsequent years fieldwork was completed.

In 2021 we were able to hire a regular number of summer interns to help with field work so we do expect our schedule of activities to return normal schedule by the end of 2021, though it may take us some months to catch up on the backlog.

4. What opportunities for training and professional development has the project provided?

Undergraduate researchers utilized this project to gain experience in field-based research techniques.

5. How have the results been disseminated to communities of interest?

The data collected from these trials, along with trials conducted by other colleagues as part of the integrated management coordinated project funded by the USWBSI, will ultimately be used in a meta-analysis that will be published in peer-reviewed scientific journals. The outcome of this large collaborative research effort will ultimately provide information of the efficacy of fungicide treatments for FHB that would not be obtainable by any individual scientist.

FY20 Annual Performance Progress Report
PI: Dill-Macky, Ruth
USDA-ARS Agreement #: 59-0206-0-132
Reporting Period: 5/6/20 - 5/5/21

Project 2: A Field Nursery for Testing Transgenic Spring Wheat and Barley from the USWBSI

1. What are the major goals and objectives of the research project?

This project had the objective of establishing an annual nursery to provide a central field-testing site for transgenic spring wheat and barley lines developed by researchers in the USWBSI.

2. What was accomplished under these goals or objectives? (For each major goal/objective, address these three items below.)

a) What were the major activities?

In 2020 and 2021 no nurseries were conducted as no entries were received. Monitoring for volunteers, as required to be in compliance with 2019 APHIS permits was conducted as necessary throughout the 2020 field season and has commenced for the 2021 field season.

b) What were the significant results?

No data were collected but we completed the required monitoring, conducted that the site at least every 21 days for the entire growing season (thaw to hard freeze) for volunteers and remained in compliance with the APHIS permits.

c) List key outcomes or other achievements.

In 2020 we met all APHIS permit requirements.

3. Was this research impacted by the COVID-19 pandemic (i.e. university shutdowns and/or restrictions, reduced or lack of support personnel, etc.)? If yes, please explain how this research was impacted or is continuing to be impacted.

No. All work in this project was completed as planned.

4. What opportunities for training and professional development has the project provided?

None. Given the nature of the project, only personnel with considerable experience in running transgenic nurseries and with APHIS and IBC authorization are allowed on the trial site.

FY20 Annual Performance Progress Report

PI: Dill-Macky, Ruth

USDA-ARS Agreement #: 59-0206-0-132

Reporting Period: 5/6/20 - 5/5/21

5. How have the results been disseminated to communities of interest?

The USWBSI-funded PIs with wheat and barley entries in the nursery have been provided their data and copied on all communications with APHIS regarding post harvest site monitoring as necessary to meet permit obligations.

Training of Next Generation Scientists

Instructions: Please answer the following questions as it pertains to the FY20 award period (5/6/20 - 5/5/21). The term “support” below includes any level of benefit to the student, ranging from full stipend plus tuition to the situation where the student’s stipend was paid from other funds, but who learned how to rate scab in a misted nursery paid for by the USWBSI, and anything in between.

- 1. Did any graduate students in your research program supported by funding from your USWBSI grant earn their MS degree during the FY20 award period?**

Yes No

If yes, how many? n/a

- 2. Did any graduate students in your research program supported by funding from your USWBSI grant earn their Ph.D. degree during the FY20 award period?**

Yes No

If yes, how many? n/a

- 3. Have any post docs who worked for you during the FY20 award period and were supported by funding from your USWBSI grant taken faculty positions with universities?**

Yes No

If yes, how many? n/a

- 4. Have any post docs who worked for you during the FY20 award period and were supported by funding from your USWBSI grant gone on to take positions with private ag-related companies or federal agencies?**

Yes No

If yes, how many? n/a

Reporting Period: 5/6/20 - 5/5/21

Release of Germplasm/Cultivars

Instructions: In the table below, list all germplasm and/or cultivars released with full or partial support through the USWBSI during the FY20 award period (5/6/20 - 5/5/21). All columns must be completed for each listed germplasm/cultivar. Use the key below the table for Grain Class abbreviations.

NOTE: Leave blank if you have nothing to report or if your grant did NOT include any VDHR-related projects.

Name of Germplasm/Cultivar	Grain Class	FHB Resistance	FHB Rating (0-9)	Year Released

Reporting Period: 5/6/20 - 5/5/21

Publications, Conference Papers, and Presentations

Instructions: Refer to the PR_Instructions for detailed more instructions for listing publications/presentations about your work that resulted from all of the projects included in the FY20 grant award. Only citations for publications published (submitted or accepted) or presentations presented during the **award period (5/6/20 - 5/5/21)** should be included. If you did not publish/submit or present anything, state 'Nothing to Report' directly above the Journal publications section.

NOTE: Directly below each citation, you **must** indicate the Status (i.e. published, submitted, etc.) and whether acknowledgement of Federal support was indicated in the publication/presentation. See example below for a poster presentation with an abstract:
