

GUIDE TO ACQUIRING IMMUNIZATION DOCUMENTS GET STARTED TODAY WITH THESE HELPFUL TIPS

IMMUNIZATION RECORDS MAY ALREADY EXIST

Places to check:

- Home
- School
- Parent's House
- Primary Care Provider
- Healthcare Employer
- Health Department

MMR and Tdap are commonly found on childhood immunization records.

Varicella vaccinations started to become a standard in the 1990s and therefore is more common for individuals in their teens or early twenties.

VACCINATIONS AND TB TESTS CAN BE ACQUIRED

Places to check:

- Primary Care Provider
- Health Department
- Pharmacy
- Student or Employee Health Clinic
- Urgent Treatment Center

It is recommended to engage your primary care provider before receiving vaccinations.

Questions regarding cost coverage may be routed to your health insurance provider or the business providing the vaccination or TB test.

TITERS CAN TEST IMMUNITY TO MMR AND/OR VARICELLA

Places to check:

- Primary Care Provider
- Student or Employee Health Clinic
- Local Laboratory

Titer is a healthcare term for drawing blood to test.

Internet searches may be helpful in locating organizations that partner with local laboratories to provide titers.

Immunization records are a great investment for your future employment and educational experiences.
