It EXCLUDES all trailers, off-highway vehicles, and snowmobiles. A Damage/Salvage Disclosure Statement (SFN 18609) must be completed.

Motor vehicle body damage disclosure requirements apply only to the transfer of certificate of title on vehicles of a model year released in the current calendar year and those vehicles of a model year manufactured in the seven years before the current calendar year. The disclosure can only be removed if the vehicle has no prior "SALVAGE" history.

Trailers over 80 inches wide require:

- Two red reflectors on rear, one on each side (mounted 15 to 60 inches above ground) (39-21-05, 10).
- Two red clearance lamps on rear, one on each side (39-21-08).
- Two amber clearance lights on front, one on each side (39-21-09).
- One stop light on the rear (39-21-06, 08).
- One taillight on the rear (mounted 15 to 72 inches above ground). Trailers manufactured or assembled after January 1, 1964, shall be equipped with at least two tail lamps mounted on the rear (39-21-04).

Turn signal lights:

- Trailers over 3,000 pounds gross weight are required to have turn signal lights (39-21-06).
- Trailers less than 3,000 pounds gross weight are not required to have signal or stop lamps, if such lamps are visible from the rear of the towing vehicle (39-21-06, 08).

Pulling two trailers:

- A motor vehicle may draw two trailers. This would allow the towing of a boat behind a gooseneck or bumper hitch camping trailer.

Safety chains or brakes:

- Every trailer or semitrailer when operated upon a highway at a speed in excess of 25 miles per hour shall be equipped with safety chains or brakes (39-21-32).
- If a second trailer is pulled behind a gooseneck or fifth wheel trailer, the first trailer must be equipped with brakes; the second trailer must be equipped with safety chains. If the first trailer is a bumper hitch design, the trailer must be equipped with brakes and safety chains. If the gross weight of the second trailer exceeds 3,000 pounds, brakes are also required. The brakes must be so designed as to be applied by the driver of the truck from the cab. The brakes must be so designed and connected that in case of an accidental breakaway, the brakes will be automatically applied on the trailer that breaks loose (37-06-03-02, NDAC).

Mirrors:

Note: On highways other than the Interstate System, only the exterior bridge measurement shall be used to determine the gross vehicle weight of a vehicle or combination of vehicles.

NORTH DAKOTA AXLE WEIGHT LIMITATIONS

No single axle shall carry a gross weight in excess of 20,000 pounds. Axles spaced 40 inches or less apart are considered one axle. Axles spaced eight (8) feet apart or over are considered as individual axles. The gross weight of two individual axles may be restricted by the weight formula except that on highways other than the interstate, two axles spaced eight (8) feet apart or more may have a combined gross weight not to exceed 40,000 pounds. Spacing between axles shall be measured from axle center to axle center.

Axles spaced over 40 inches apart and less than eight (8) feet apart shall not carry a gross weight in excess of 19,000 pounds per axle. The gross weight on a tandem axle shall not exceed 34,000 pounds. The gross weight of three or more axles in a grouping is determined by the measurement between the extreme axle centers except that on highways other than the interstate, groupings of three or more axles may have a gross weight not to exceed 48,000 pounds.

The weight per inch width of tire shall not exceed 550 pounds. Metric tire sizes are converted to inches by dividing millimeters by 25.4. The width of tire for solid tires shall be the rim width. For pneumatic tires the width of tire shall be the manufacturer's width. The weight in pounds on any one wheel shall not exceed one-half the allowable axle weight. Dual tires are considered one (1) wheel.

Examples of Bridge Formula Application on the Interstate System

Note: On the Interstate System, the interior and exterior bridge measurement shall be used to determine the gross vehicle weight of a vehicle or combination of vehicles.

Examples of Bridge Formula Application on the State Highway System

Note: On highways other than the Interstate System, only the exterior bridge measurement shall be used to determine the gross vehicle weight of a vehicle or combination of vehicles. Groupings of three or more axles may have a gross weight not to exceed 48,000 pounds. See Highway Patrol for additional information on 4-axle straight trucks.
