

Atmospheric Science: A Key Player in the Quantification & Mitigation of Insurance Risk

Dan Hartung (BS '07, MS '09)
Associate Director – Catastrophe Management
Aon Benfield – Analytics

November 10th, 2017

Aon Benfield: An Overview

Aon Benfield, a division of Aon, is the world's leading reinsurance intermediary and full-service capital advisor—providing coverage for insurance companies against catastrophic claims and helping to grow their business.

Our colleagues empower insurers and reinsurers globally to...

- Better understand and transfer risk
- Utilize innovative data and analytics to quantify exposures
- Access customized capital across the global treaty, facultative and capital markets
- Optimize capital performance to improve operational effectiveness and achieve business growth

Beauty in Numbers

| | |
|----------------------------|---|
| #1 | Reinsurance intermediary based on global annual revenues |
| USD32bn | Premium placed in the global reinsurance marketplace annually |
| USD1trn | Investment grade capital made available to clients |
| #1 | Broker in every region—Americas, Asia Pacific, EMEA and UK |
| 80 | Offices in 50 countries |
| 100+ | Industry awards since 2009 |
| USD130m + | Invested annually in analytical capabilities |

Client Promise

Challenges Our Clients Face

How do I grow my business?

How can you help me understand the risks I bear? How can I transfer these risks and into what market:

- Traditional Markets
- Non Traditional Markets
- Capital Markets

How do I improve my balance sheet strength?

How do I maintain a competitive position and financial strength under global regulatory regimes?

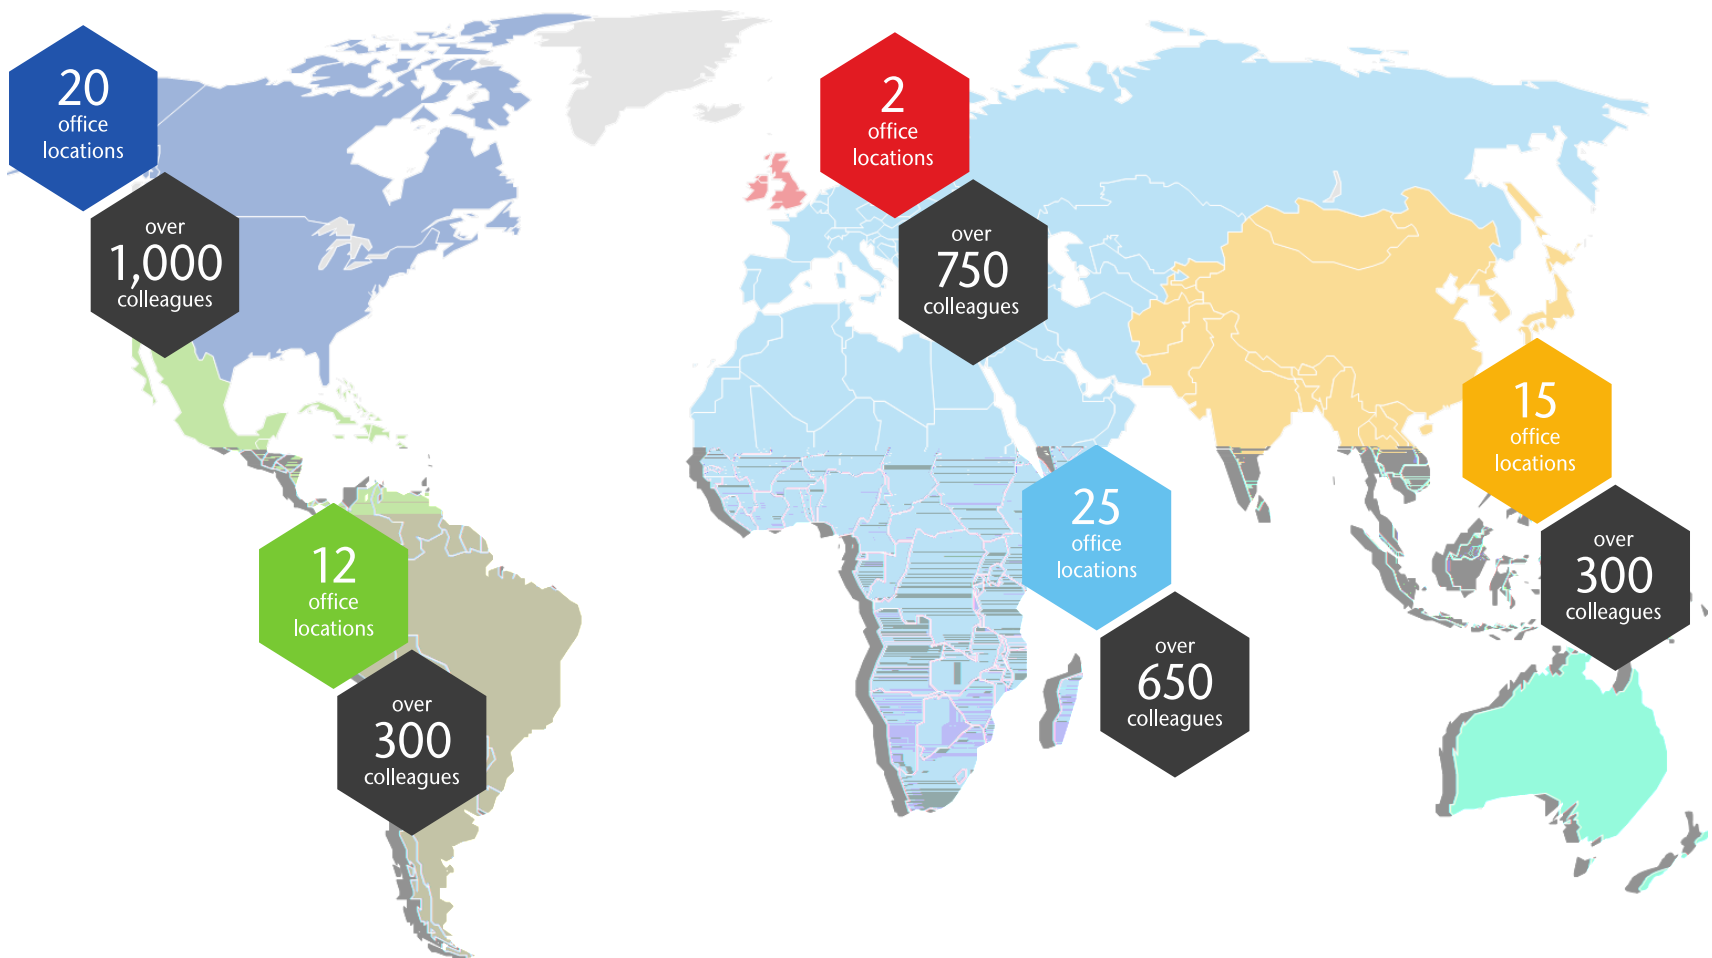

How do I increase underwriting profitability through innovation?

How do I get the best premiums?

Global Reach And Unrivalled Access For Clients

- Aon Benfield offers global knowledge and access combined with local presence with more than 80 offices in 50 countries around the world
- We have over 3,200 colleagues globally including 500 Analytics experts

Aon Benfield is The World's Leading Reinsurance Broker

- Aon Benfield's size and expertise, coupled with industry-leading data and insight, enables us to deliver a unique level of value to our clients not found anywhere else
- Value as our clients define it. Value that helps them achieve their goals and "empower results"

| Rank | Reinsurance Broker | 2013 Reinsurance Gross Revenues |
|------|----------------------------------|---------------------------------|
| 1 | Aon Benfield | \$1,505,000,000 |
| 2 | Guy Carpenter | \$1,131,267,000 |
| 3 | Willis Re | \$860,000,000 |
| 4 | JLT Reinsurance Brokers Ltd | \$375,869,460 |
| 5 | Cooper Gay Swett & Crawford Ltd. | \$158,466,000 |
| 6 | Miller Insurance Services | \$93,528,000 |
| 7 | UIB Holdings (U.K) Ltd. | \$67,463,114 |
| 8 | THB Group Ltd. | \$58,094,136 |
| 9 | BMS Group | \$54,300,000 |
| 10 | Lockton Re | \$46,028,536 |

Catastrophe Management and Modeling

Catastrophe Management Cycle

- Individuals typically work on several clients throughout the year depending on
 - Placement timelines
 - Expertise
 - Client resource demands
- Cycle is traditionally a yearly process but can vary based on client need
- Each portion of the cycle involves collaboration between divisions of Aon Benfield

What is a Catastrophe Modeling?

- Catastrophic events are extreme events (low frequency; high severity) which go beyond normal occurrences and are thus unpredictable
- Catastrophe Modeling (also known as CAT modeling) is the process of using statistical models to assess the loss which **could** occur to an insurers portfolio in a catastrophic event

The Need for Cat Modeling

- Potential for severe losses creates the necessity to prepare for such events
 - Unpredictable and infrequent nature of catastrophes
 - In cases, lack of historical information to accurately predict yearly losses
 - Increase in development within disaster prone areas
 - Catastrophic events have caused billions of insured losses bringing the importance of modeling to attention
-
- 2005: Hurricane Katrina¹ - > \$76.3 billion
 - 2011: Tohoku Earthquake¹ - \$35.7 billion
 - 2012: Hurricane Sandy¹ - \$35.0 billion

1: Source: NOAA, includes insured losses from government insurers (ex: NFIP)

What is a Catastrophe Modeler?

In a sentence...

Catastrophe modelers assess catastrophic risk using **computer models** to support the **placement of reinsurance** and **add value** to our clients.

1. Computer models

- Cat model output estimates
- Size and probability of catastrophic losses on client's exposure
- How much cat loss our client can expect in an average year

2. Placement of reinsurance

- Typically catastrophe excess of loss treaties
- Support placements with modeled data

3. Add Value

- Exposure management
- Portfolio optimization
- Pricing and cost recovery
- Much, much more

Cat Model Output

- Probable Maximum Loss (**PML**): The largest economic loss likely to occur at a specified probability of occurrence.
- Average Annual Loss (**AAL**): an estimate of the annual premium need to cover losses for the modeled peril(s) over time, assuming exposure remains constant.
- Tail Value at Risk (**TVaR**): the probability-weighted average of all possible economic losses that are greater than or equal to the PML at a specified probability of occurrence
- Standard Deviation
- Frequency

Preparing for a Career In Applied Atmospheric Sciences

Applied AOS Career: Risk, & Insurance Industry

What types of course electives should I take?

- Certificate in Business (CIB) (For Non-Business Majors - Business School)
 - 4 required classes and 2 electives to complete certificate
 - Focus 2 breadth electives on risk and insurance to enhance background knowledge and marketability
 - <https://bus.wisc.edu/degrees-programs/certificates/undergraduate/business#about>
- Risk Management and Insurance classes
- Economics, Applied Statistics, Probability classes
- Python and R programming / ARCGIS or QGIS programming
- Intro to Finance or Accounting
- Intro level Civil / Structural Engineering

Other Important Considerations:

- Utilize College of Letters & Sciences career resources for resume building and interview practice
- 1-page resume.. Period
- Attend career fairs on campus and seek out companies you are interested in
- Private sector job interviews typically last for ½ day or longer, be prepared
- Once you land an interview, do your research beforehand and make sure you fully understand the company, the role, and have a set of questions ready to ask your interviewers

ABOUT

COURSE
REQUIREMENTS

CAREERS

ADVISING

APPLY

The Certificate in Business (CIB) program provides non-business students the opportunity to earn a concentration in a clearly defined academic program in business. The coursework allows students to develop a foundational understanding of business and apply this to their specific field, such as international studies or engineering. In addition to careers related to their own fields, students who earn the certificate have also found job opportunities in management, marketing, and other business fields in the past.

Admission

There are no specific courses that must be taken before applying. If a student chooses to take CIB courses before being admitted, the courses will fulfill requirements after admission.

In order to be eligible to apply, students must meet the following requirements:

ABOUT

COURSE
REQUIREMENTS

CAREERS

ADVISING

APPLY

The CIB program consists of six courses (four core courses and two additional breadth courses), for a total of 18 credits. Students are also responsible for any pre-requisite courses needed for core or breadth courses. [Click here](#) for pre-requisite information for core courses.

Students must take at least 12 of the 18 required credits in residence at UW-Madison. Study abroad courses taken through a UW-Madison sponsored program will count toward the 12 credits in residence.

Students must earn a grade of "C" or better in all required courses for the CIB.

- Accounting 100 or 300*, 3 crs
- Finance 300, 3 crs
- Management & Human Resources 300, 3 crs
- Marketing 300, 3 crs
- Breadth course**
- Breadth course**

*CIB students are strongly encouraged to take ACCT IS 300, unless ACCT IS 100 is required by their major. Please note, however, that ACCT IS 100 is a requirement for many other upper-level Accounting and Finance courses. Students planning to take additional Accounting of Finance courses, should consult with the CIB advisor.

**CIB Breadth Requirement information:

- Breadth Courses must be at least 3 credits
- Breadth Courses must be School of Business courses (or courses cross-listed with School of Business). Breadth Courses may be from the same department as the core courses
- Breadth Courses must be from two different School of Business departments (or cross-listed with two different School of Business departments)
- Courses taken at another institution must be directly equivalent to a UW-Madison business course and title (i.e. not elective credit)
