Financing Options

Check one of the three boxes below and complete the information

2.5% Nebraska Energy Office (NEO) Construction Loan.

Amount to be Requested \$ _____

A NEO loan for construction of a new house can include the costs of the lot, Home Energy Rating, design and plans, material and equipment to be installed in the house, building permits, utility installation or connection, general contractor, subcontractors and wages paid to employees, as well as loan fees charged by the lender. The cost of services by the borrower and the borrower's family or friends who are not actual employees or contractors engaged in the construction business are not eligible.

To qualify for financing as a new home, application must be made to the Energy Office and loan approval received through a Nebraska lender prior to application for a building permit, if required, and any construction or ground breaking. The home design must achieve a HERS rating score and meet other requirements as outlined in the Energy Efficient Housing Application Guidelines.

Nebraska lender to be used for 2.5% construction financing, if applicable:

Name _____

Mailing Address _____

Telephone _____

Contact Person _____

Conventional Construction Loan

Self Financing with Cash

To qualify as an ENERGY STAR®, Five Star Plus new home with a HERS rating score and other requirements as outlined in the Energy Efficient Housing Application Guidelines under the Nebraska Energy Efficient Housing Loan Program, application must be made to the Energy Office and the Energy Office's approval of the application received in writing prior to application for a building permit, if required, and any construction or ground breaking. Under these options, numbers 5 and 6 of the instructions would not apply.

Lender to be used for conventional construction financing, if applicable:

Name _____

Mailing Address _____

Telephone _____

Contact Person _____

Instructions

1. Verify compliance with program eligibility requirements:

- Applicant is a resident of Nebraska
- House is a single-family, detached house located in Nebraska and will be the home owner's primary residence
- Construction on house has **not** yet started
- If requesting a 2.5% NEO Construction Loan, the loan amount will not exceed \$417,000 or the cost of construction, whichever is less up to the appraised value of the home as completed. The construction loan may be for 100% of the appraised value of the home as completed, or more than the permanent loan take-out commitment, as long as the lender determines the borrower has sufficient resources, or can provide additional collateral, to cover any amount over the permanent loan take-out commitment.

2. Along with this form, you should have downloaded a copy of the "Energy Efficient Housing Application Guidelines" (Guidelines) <http://www.neo.ne.gov/loan/pdf/EEHAG.pdf>. You should have provided a copy of these Guidelines to your: Home Energy Rating System (HERS) rater, Building Contractor, Design Professional and Heating Ventilation and Air Conditioning (HVAC) Contractor.

3. Complete this form and send it to the Energy Office at the address listed below along with hardcopies of:

- This Form M10, completed with original (not copied) signatures.
- Completed Form A(s) with original signature(s).
- ONE set of professional, computer generated house plans.
- AHRI and/or HVI Equipment Certificate(s).
- Documentation showing that the HVAC contractor, Builder, and HERS Rater have *completed* all required ACCA/ENERGY STAR® Version 3 orientations and trainings.
- HERS rating reports, consisting of a Building Summary, Equipment Sizing Summary, Air Leakage Report, Home Performance with ENERGY STAR® and a Home Energy Rating Certificate that shows the design will meet 2009 IECC & ENERGY STAR® V3 requirements and achieve a HERS score

as outlined on page 5 of 34, and all other requirements of the Energy Efficient Housing Application Guidelines.

4. The Energy Office will review the application for compliance with the requirements and notify you that either (a) the plans and application comply and you may apply for a loan from your lender, or (b) the plans and/or application is deficient in specific areas and you have the opportunity to revise and resubmit. (The plans must reflect all efficiency criteria in the HERS reports, proper duct sizing and sealing and proper equipment sizing.)

5. Apply for a construction loan to the Nebraska lender of your choice identified on the front page. You must provide the lender with proof of Energy Office acceptance, cost quotes and whatever other documentation the lender may require.

6. Lender will notify you when the loan has been approved (by the lender's underwriters) and a Commitment Agreement has been signed by the Energy Office.

7. Do NOT apply for a building permit, break ground, or begin construction prior to receiving notification from your lender that the Energy Office has given you written notice that your application has been approved and your plans meet the program requirements.

8. During and after construction the HERS Rater will need to inspect the home to ensure the construction is completed according to the plans and ENERGY STAR® requirements and provide the Energy Office with final HERS reports and completed checklists.

9. The design professional, contractor and HERS Rater must work together to ensure inspections are properly completed during construction. The HERS Rater should provide the design professional with a copy of the "ENERGY STAR® Requirements and Checklists," with the design professional providing copies to the contractors. From those checklists the design professional, contractors and HERS Rater will need to coordinate times that inspections will be required. The contractors will then need to ensure that the HERS Rater is contacted to perform inspections when required.

Signatures (all signatures must be original)

I hereby authorize the Nebraska Energy Office to obtain future utility usage, cost and billing information for the property listed above. I also certify that all the information supplied on this form and attachments is true and correct to the best of my knowledge and belief and that I will permit my lender and the Nebraska Energy Office, as they deem necessary, to have access to the subject property and records in order to make on-site inspections of the construction being financed.
