

DEPARTMENT OF MECHANICAL & AEROSPACE ENGINEERING

WILLIAM MAXWELL REED SEMINAR SERIES

“Library Services, Resources and Personnel”

Valerie Perry
Science & Engineering Library
University of Kentucky

Abstract:

University of Kentucky Libraries provides valuable services, significant resources, and helpful professional personnel for all UK-affiliated faculty, staff and students. Popular services include interlibrary loan, data management support, affordable course content and reference consultations. Libraries provide access to 478 databases, including those which directly support engineering such as *Compendex*, *Engineering Index*, *TRID*, *IEEE Xplore*, *Scopus* and *Web of Science*. These databases, as well as over 230,000 e-journals and 2.6 million e-books, are available via the online gateway *OpenAthens*. This talk will highlight the services, resources and personnel available to support research and teaching information needs.

Speaker Bio:

Valerie Perry has worked as a librarian at the University of Kentucky Libraries since 1998. She has served in leadership roles as Head of the Agricultural Information Center, Director of Branch Libraries and currently as Director of the Science & Engineering Library. She obtained a Master of Library Science (1994) and a B.S in English (1998) at the University of Kentucky. She currently supports the departments of Biology, Chemistry, Earth & Environmental Science as well as the Stanley & Karen Pigman College of Engineering.
