	Description of Instrumentation and Flights conducted with FIAMS' Cessna 340A Aircraft "EOS" During the International Experiment TOGA COARE	Technical Report No 10. Description of Instrumentation and Flights conducted with FIAMS' Cessna 340A Aircraft "EOS" During the International Experiment TOGA COARE. Flinders Institute for Atmospheric and Marine Sciences, August 1993.	August 1993	This report describes the instrumentation systems mounted aboard the EOS research aircraft (owned and operated by FIAMS) at the time of these flights in January and February of 1993. In addition to describing the instrumentation systems, this report provides a comprehensive "road map" to the raw data set collected, including information regarding data quality, failures, and other peculiarities. In addition, a summary of calibration information and the steps used for the preliminary processing of the data are described.	https://trove.nla.gov.au/work/22417505?q&versionId=27099417
	RAMF User's Manual (2nd edition)	Technical Report No 11. RAMF User's Manual (2nd edition). Flinders Institute for Atmospheric and Marine Sciences, November 1993.	November 4th, 1993	RAMF (Routinen zur Auswertung Meteorologischer Forschungsflüge) is a software package developed by J.M. Hacker at the Meteorological Institute of the University of Bonn, F.R. Germany. This software processes data from research flights with the three motogliders owned by the DFVLR's (German Aero-Space Agency) Institute for Atmospheric Physics.	
	NASA TOGA-COARE Mission Summaries (Draft)	NASA TOGA-COARE Mission Summaries, draft. NASA, July 1993.	July 1993	Document NASA's airborne experiment operations at Townsville, Australia during January and February 1993.	
	TOGA-COARE Intensive Observing Period Operations Summary	TOGA-COARE Intensive Observing Period Operations Summary. UCAR, June 1993.	June 1993	Forecast, satellite, ship, and other information received and monitored in the COARE Operations Center provided a regular, though occasionally incomplete, record of COARE operations. This publication presents this material in raw form, in most cases exactly as they were viewed during COARE operations.	
	TOGA COARE Meteorological Atlas	Bond, G. & Alexander, D. TOGA COARE Meteorological Atlas. TOGA COARE International Project Office, Boulder, Colorado, June 1994.	June 1994	This volume provides, in text and figures, a summary of the meteorological conditions as observed day-to-day during COARE operations, produced by the forecasters who supported those operations.	
	SEASOAR and CTD Observations During a COARE Surveys Cruise, W9211C, 22 January to 22 February 1993	Huyer, A., Kosro, P.M., O'Malley, R., & Fleischbein, J. SEASOAR and CTD Observations During a COARE Surveys Cruise, W9211C, 22 January to 22 February 1993. Data Report 154, Reference 93-2. Oregon State University College of Oceanic and Atmospheric Sciences, October 1993.	October 1993	This report summarizes the Seasoar and CTD observations from Wecoma's third COARE Surveys cruise, W9211C. It also provides a cruise narrative, and a brief description of the data processing procedures.	

This spreadsheet consists of physical documents available at the NCAR/UCAR Earth Observing Laboratory.
