

Please provide the following information, and submit to the NOAA DM Plan Repository.

Reference to Master DM Plan (if applicable)

As stated in Section IV, Requirement 1.3, DM Plans may be hierarchical. If this DM Plan inherits provisions from a higher-level DM Plan already submitted to the Repository, then this more-specific Plan only needs to provide information that differs from what was provided in the Master DM Plan.

URL of higher-level DM Plan (if any) as submitted to DM Plan Repository:

1. General Description of Data to be Managed

1.1. Name of the Data, data collection Project, or data-producing Program:

Summary of bacteria found in captive sea turtles 2002-Present

1.2. Summary description of the data:

If a sea turtle abruptly stops feeding, or ceases feeding entirely for three consecutive days, it is moved to the First Care Area [FCA] in the main sea turtle rearing barn. The First Care Area is a semi-quarantine area where turtles can get specific attention and medical care. When a turtle is moved to the FCA, it is given an identification number and a medical chart is made for that turtle. Our attending veterinarian is contacted and a treatment plan is developed. Treatment logs are used to compile the FCA logs and help keep track of sick turtles. Tissues and swabs from captive reared sea turtles that die or are euthanized are sent off to the Texas Veterinary Diagnostic Laboratory for analysis. TVMDL reports are submitted to permitting agencies when required, and are not kept in searchable digital form. When bacteriology reports return from TVMDL, they are added to this database."

The database contains a summary of bacteria which have been isolated in sea turtles dead and alive at the NOAA Galveston Laboratory and is based on reports received from the Texas Veterinary Diagnostic Laboratory in College Station, Texas.

1.3. Is this a one-time data collection, or an ongoing series of measurements?

Ongoing series of measurements

1.4. Actual or planned temporal coverage of the data:

2002 to Present

1.5. Actual or planned geographic coverage of the data:

W: -94.819688, E: -94.81456, N: 29.278028, S: 29.274811
Gulf Of Mexico

1.6. Type(s) of data:

(e.g., digital numeric data, imagery, photographs, video, audio, database, tabular data, etc.)
Table (digital)

1.7. Data collection method(s):

(e.g., satellite, airplane, unmanned aerial system, radar, weather station, moored buoy, research vessel, autonomous underwater vehicle, animal tagging, manual surveys, enforcement activities, numerical model, etc.)

1.8. If data are from a NOAA Observing System of Record, indicate name of system:**1.8.1. If data are from another observing system, please specify:****2. Point of Contact for this Data Management Plan (author or maintainer)****2.1. Name:**

Benjamin Higgins

2.2. Title:

Metadata Contact

2.3. Affiliation or facility:**2.4. E-mail address:**

ben.higgins@noaa.gov

2.5. Phone number:

409-766-3670

3. Responsible Party for Data Management

Program Managers, or their designee, shall be responsible for assuring the proper management of the data produced by their Program. Please indicate the responsible party below.

3.1. Name:

Benjamin Higgins

3.2. Title:

Data Steward

4. Resources

Programs must identify resources within their own budget for managing the data they produce.

4.1. Have resources for management of these data been identified?

No

4.2. Approximate percentage of the budget for these data devoted to data management (specify percentage or "unknown"):

0

5. Data Lineage and Quality

NOAA has issued Information Quality Guidelines for ensuring and maximizing the quality, objectivity, utility, and integrity of information which it disseminates.

5.1. Processing workflow of the data from collection or acquisition to making it publicly accessible

(describe or provide URL of description):

Lineage Statement:

If a sea turtle abruptly stops feeding, or ceases feeding entirely for three consecutive days, it is moved to the First Care Area [FCA] in the main sea turtle rearing barn. The First Care Area is a semi-quarantine area where turtles can get specific attention and medical care. When a turtle is moved to the FCA, it is given an identification number and a medical chart is made for that turtle. Our attending veterinarian is contacted and a treatment plan is developed. Treatment logs are used to compile the FCA logs and help keep track of sick turtles. Tissues and swabs from captive reared sea turtles that die or are euthanized are sent off to the Texas Veterinary Diagnostic Laboratory for analysis. TVMDL reports are submitted to permitting agencies when required, and are not kept in searchable digital form. When bacteriology reports return from TVMDL, they are added to this database."

Process Steps:

- None

5.1.1. If data at different stages of the workflow, or products derived from these data, are subject to a separate data management plan, provide reference to other plan:

5.2. Quality control procedures employed (describe or provide URL of description):

None

6. Data Documentation

The EDMC Data Documentation Procedural Directive requires that NOAA data be well documented, specifies the use of ISO 19115 and related standards for documentation of new data, and provides links to resources and tools for metadata creation and validation.

6.1. Does metadata comply with EDMC Data Documentation directive?

No

6.1.1. If metadata are non-existent or non-compliant, please explain:

Missing/invalid information:

- 1.7. Data collection method(s)

6.2. Name of organization or facility providing metadata hosting:

NMFS Office of Science and Technology

6.2.1. If service is needed for metadata hosting, please indicate:

6.3. URL of metadata folder or data catalog, if known:

<https://www.fisheries.noaa.gov/inport/item/26903>

6.4. Process for producing and maintaining metadata

(describe or provide URL of description):

Metadata produced and maintained in accordance with the NOAA Data Documentation Procedural Directive: https://nosc.noaa.gov/EDMC/DAARWG/docs/EDMC_PD-Data_Documentation_v1.pdf

7. Data Access

NAO 212-15 states that access to environmental data may only be restricted when distribution is explicitly limited by law, regulation, policy (such as those applicable to personally identifiable information or protected critical infrastructure information or proprietary trade information) or by security requirements. The EDMC Data Access Procedural Directive contains specific guidance, recommends the use of open-standard, interoperable, non-proprietary web services, provides information about resources and tools to enable data access, and includes a Waiver to be submitted to justify any approach other than full, unrestricted public access.

7.1. Do these data comply with the Data Access directive?

Yes

7.1.1. If the data are not to be made available to the public at all, or with limitations, has a Waiver (Appendix A of Data Access directive) been filed?**7.1.2. If there are limitations to public data access, describe how data are protected from unauthorized access or disclosure:****7.2. Name of organization of facility providing data access:**

NOAA National Centers for Environmental Information (NCEI)

7.2.1. If data hosting service is needed, please indicate:

No

7.2.2. URL of data access service, if known:

<http://accession.nodc.noaa.gov/0157625>

https://www.ncei.noaa.gov/archive/accession/0157625/2.2/data/0-data/Galveston_Turtle_Program/26903

7.3. Data access methods or services offered:

Download from provided links

7.4. Approximate delay between data collection and dissemination:

365

7.4.1. If delay is longer than latency of automated processing, indicate under what authority data access is delayed:

N/A

8. Data Preservation and Protection

The NOAA Procedure for Scientific Records Appraisal and Archive Approval describes how to identify, appraise and decide what scientific records are to be preserved in a NOAA archive.

8.1. Actual or planned long-term data archive location:

(Specify NCEI-MD, NCEI-CO, NCEI-NC, NCEI-MS, World Data Center (WDC) facility, Other, To Be Determined, Unable to Archive, or No Archiving Intended)

NCEI_MD

8.1.1. If World Data Center or Other, specify:

8.1.2. If To Be Determined, Unable to Archive or No Archiving Intended, explain:

8.2. Data storage facility prior to being sent to an archive facility (if any):

National Centers for Environmental Information - Silver Spring, Maryland - Silver Spring, MD

8.3. Approximate delay between data collection and submission to an archive facility:

365

8.4. How will the data be protected from accidental or malicious modification or deletion prior to receipt by the archive?

Discuss data back-up, disaster recovery/contingency planning, and off-site data storage relevant to the data collection

The data resides on a secure database server only accessible through the NMFS network requiring separate multi-factor authentication for both network and database access.

9. Additional Line Office or Staff Office Questions

Line and Staff Offices may extend this template by inserting additional questions in this section.
