

Please provide the following information, and submit to the NOAA DM Plan Repository.

### Reference to Master DM Plan (if applicable)

As stated in Section IV, Requirement 1.3, DM Plans may be hierarchical. If this DM Plan inherits provisions from a higher-level DM Plan already submitted to the Repository, then this more-specific Plan only needs to provide information that differs from what was provided in the Master DM Plan.

## 1. General Description of Data to be Managed

### 1.1. Name of the Data, data collection Project, or data-producing Program:

Sea turtle acoustic and radio telemetry data in the Atlantic Ocean from 2013-2014 (NCEI Accession 0160089)

Lineage Statement:

data collected in the field are recorded on paper and key-entered into a computer upon returning to the lab or data are downloaded directly from the receiver into a computer

brought into the field.

Process Steps:

- data collected in the field are recorded on paper and key-entered into a computer upon returning to the lab or data are downloaded directly from the receiver into a computer brought into the field.

## 7. Data Access

*NAO 212-15 states that access to environmental data may only be restricted when distribution is explicitly limited by law, regulation, policy (such as those applicable to personally identifiable information or protected critical infrastructure information or proprietary trade information) or by security requirements. The EDMC Data Access Procedural Directive contains specific guidance,*

*recommends the use of open-standard, interoperable, non-proprietary web services, provides information about resources and tools to enable data access, and includes a Waiver to be submitted to justify any approach other than full, unrestricted public access.*
