WHY BUY A FUEL-EFFICIENT VEHICLE?

By choosing the most fuel-efficient vehicle in a particular vehicle class, you could save yourself more than \$1,500 in fuel costs and prevent the release of roughly 15 tons of greenhouse gas pollution over the lifetime of the vehicle. Fuel-efficient models come in all shapes and sizes, so you need not sacrifice utility or size to make a difference. On page six you'll find fuel economy values for 2002 model year vehicles, a comprehensive list of the fuel economy of most vehicles on the market. As you browse through it, note the vehicles listed in bold face. These are the most fuel-efficient models of each class.

MODEL YEAR 2002 FUEL ECONOMY LEADERS

Listed below are vehicles with the highest fuel economy in the most popular classes, including both vehicles with automatic and manual transmissions. Please note that many vehicle models come in a range of engine sizes and trim lines, resulting in different fuel economy values. Check the Fuel Economy Guide or the fuel economy sticker on new vehicles to find the values for each vehicle.

TWO-SEATER CARS

Honda Insight (hybrid electric)	manual transmission	61/68
.....	automatic transmission	57/56

MINICOMPACT CARS

Audi TT Coupe	manual transmission	23/31
Mitsubishi Eclipse Spyder	automatic transmission	20/26

SUBCOMPACT CARS

Volkswagen New Beetle (diesel)	manual transmission	42/49
Honda Civic HX	automatic transmission	35/40

COMPACT CARS

Toyota Prius (hybrid electric)	automatic transmission	52/45
Volkswagen Golf (diesel)	manual transmission	42/49
Volkswagen Jetta (diesel)	manual transmission	42/49

MIDSIZE CARS

Honda Accord	manual transmission	26/32
Mazda 626	manual transmission	26/32
Saturn L100/200	automatic transmission	24/33

LARGE CARS

Chevrolet Impala	automatic transmission	21/32
------------------------	------------------------------	-------

SMALL STATION WAGONS

Volkswagen Jetta Wagon (diesel)	manual transmission	42/50
.....	automatic transmission	34/45

MIDSIZE STATION WAGONS

Ford Focus Station Wagon	manual transmission	28/36
.....	automatic transmission	26/32

CARGO VANS

Chevrolet Astro 2WD	automatic transmission	17/22
GMC Safari 2WD	automatic transmission	17/22

MINIVANS

Chevrolet Venture FWD	automatic transmission	19/26
Oldsmobile Silhouette FWD	automatic transmission	19/26
Pontiac Montana FWD	automatic transmission	19/26

PASSENGER VANS

Chevrolet Astro 2WD	automatic transmission	15/20
GMC Safari 2WD	automatic transmission	15/20

SUV

Toyota Rav4	manual transmission	25/31
.....	automatic transmission	24/29

SMALL PICKUP TRUCKS

Chevrolet S10 Picvkup 2WD FFV	manual transmission	22/28*
.....	automatic transmission	19/25
GMC Sonoma 2WD FFV	manual transmission	22/28*
.....	automatic transmission	19/25
Isuzu Hombre Pickup 2WD FFV	manual transmission	22/28*
.....	automatic transmission	19/25

STANDARD PICKUP TRUCKS

Ford Ranger Pickup 2WD	manual transmission	24/28
Mazda B2300 2WD	manual transmission	24/28
Toyota Tacoma 2WD	automatic transmission	22/25

* when operated on gasoline

FUEL ECONOMY ESTIMATES

Fuel economy estimates are determined by averaging numbers gathered through tests conducted by the U.S. Environmental Protection Agency (EPA). Vehicles in each class are tested in a controlled setting, and the results are adjusted to suit real-world driving conditions. All vehicles are tested in the same manner so you can compare the results of each with confidence. The U.S. Department of Energy (DOE) prints this guide in an effort to aid consumers.

WHY SOME VEHICLES ARE NOT IN THIS GUIDE

Some larger vans, pickup trucks, and sport utility vehicles (SUVs) belong in the heavy-duty vehicle category, which contains vehicles that weigh more than 8,500 lbs. gross vehicle weight (GVW). Fuel economy regulations do not apply to these types of vehicles. Therefore, fuel-economy labels are not posted in their windows and they are not covered in this guide. For more information on this type of vehicle class, please visit DOE's Office of Heavy Vehicle Technologies web site at www.ott.doe.gov/ohvt/.

WHY YOUR FUEL ECONOMY CAN VARY

No test can simulate all possible combinations of conditions: traffic conditions, climate, driver behavior, and car-care habits. Actual fuel economy depends on how, when, and where a vehicle is driven. EPA has found that fuel economy obtained by most drivers will be within a few miles per gallon (mpg) of the estimates in this guide.

THERE ARE TWO FUEL ECONOMY ESTIMATES FOR EACH VEHICLE

City represents urban driving where the vehicle is started in the morning after being parked all night and driven in stop-and-go rush-hour traffic.

Highway represents a mixture of rural and interstate highway driving in warmed-up vehicles typical for longer trips.

WWW.FUELECONOMY.GOV

Produced in partnership by DOE and EPA, the fuel economy web site, www.fueleconomy.gov, allows users to conveniently locate the safest, cleanest, and most fuel-efficient vehicle to meet their needs. It has all of the information provided in the print edition of the Fuel Economy Guide, plus much more! Listed here are just a few of the site's many dynamic features.

- ◆ Find safety and emissions information in addition to fuel economy data for specific vehicles
- ◆ Search for specific vehicles by class, make, model, and gas mileage
- ◆ Compare up to three vehicles at one time
- ◆ Calculate annual fuel cost for new and used vehicles dating back to 1985
- ◆ Print the entire Fuel Economy Guide
- ◆ Link to car-buying web sites
- ◆ Use gasoline price page to find links to national and regional fuel price information
- ◆ Learn answers to frequently asked questions on fuel pricing
- ◆ Link to sites that will help you find the lowest gas prices in your city
- ◆ Learn tips for improving gas mileage
- ◆ Find consumer data that tracks where the money goes after you spend it at the pump
- ◆ Learn about alternative fuel vehicles and advanced technologies
- ◆ Learn about future technologies such as fuel cells, aerodynamic design, and lightweight materials
- ◆ Read about air pollution, global warming, and oil spills

GAS GUZZLER TAX

The Gas Guzzler Tax which is marked with "Tax" in this guide applies to passenger cars of exceptionally low fuel economy. To discourage the production and sale of these cars, the government requires auto companies to pay a tax. The words "Gas Guzzler" and the amount of the tax are listed on the vehicle's fuel economy label. The gas guzzler tax does not apply to light trucks.

TIPS FOR IMPROVING FUEL ECONOMY

- ◆ Combine errands into one trip.
- ◆ Avoid carrying excess weight.
- ◆ Obey posted speed limits. Traveling at 80 instead of 70 mph reduces your mileage by over 10%.
- ◆ Anticipate traffic situations -- avoid jackrabbit starts and unnecessary braking.
- ◆ Turn your engine off rather than letting it idle for more than a minute.
- ◆ Keep tires inflated to the manufacturer's recommended maximum pressure and the wheels properly aligned.
- ◆ Keep your engine tuned, your air filter clean, and use low-friction fuel-saver engine oils.
- ◆ Maintain adequate fluid levels.

WHY FUEL ECONOMY IS IMPORTANT

HOW FUEL ECONOMY AFFECTS OUR NATIONAL ENERGY SECURITY

Reducing our dependence on imported oil is crucial to strengthening our national energy security. Today the United States imports 54% of its oil—an all time high—and that percentage is expected to increase for years into the future, as worldwide demand for oil continues to grow.

What's more, transportation accounts for two-thirds of U.S. annual petroleum consumption, using four million more barrels a day than we produce. Our imported petroleum bill has reached \$2 billion dollars a week, mostly to satisfy our growing thirst for transportation fuel.

Buying a more fuel-efficient vehicle can help reduce U.S. petroleum dependence today and will help create incentives for carmakers to produce cleaner, more energy-efficient technologies in the future.

HOW FUEL ECONOMY AFFECTS CLIMATE CHANGE

Burning fossil fuels such as gasoline or diesel adds greenhouse gases to the earth's atmosphere. Scientific evidence strongly suggests that the rapid buildup of greenhouse gases in the atmosphere is raising the earth's temperature and changing its climate leaving us vulnerable to many potentially serious consequences.

Vehicles with lower fuel economy create more carbon dioxide—the most important human-made greenhouse gas—than vehicles with higher fuel economy. **Every gallon of gasoline your vehicle burns puts 20 pounds of carbon dioxide into the atmosphere.**

One of the most important things you can do to reduce your contribution to global warming is buy a vehicle with higher fuel economy. Choosing a vehicle that gets 25 mpg rather than 20 mpg will prevent the release of roughly 15 tons of greenhouse gas pollution over the lifetime of your vehicle.

HYBRID-ELECTRIC VEHICLES

It's no accident that this year, the three vehicles achieving the highest fuel economy are hybrid-electric vehicles. Hybrid electric vehicles combine the best features of internal combustion engines and electric motors.

In the Honda Insight models and Toyota Prius, both the engine and the electric motor are connected to the wheels by the same transmission. With the assistance of the the electric motor, the engine can be smaller.

Intelligent power electronics decide when to use the motor and engine and when to store electricity in advanced batteries for future use. The electric motor is used primarily for low speed cruising or to provide extra power for acceleration or hill climbing.

When braking or coasting to a stop, the hybrid uses its electric motor as a generator to produce electricity, which is then stored in its battery pack.

Unlike all electric vehicles, hybrid vehicles do not need to be plugged into an external source of electricity. Gasoline stored in a conventional fuel tank provides all the energy the hybrid-electric vehicle needs.

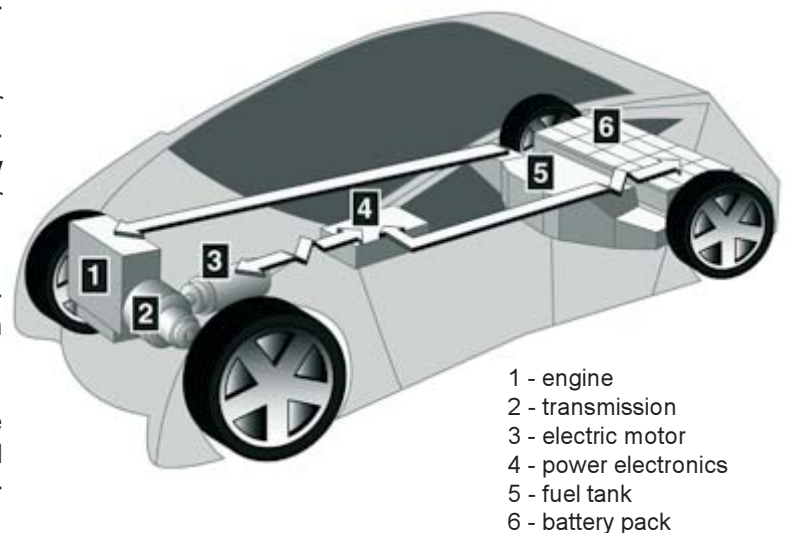

Additional information on hybrid electric vehicles may be found at these web sites:

www.ott.doe.gov/hev/

FUEL ECONOMY AND YOUR ANNUAL FUEL COSTS

Use this chart to compare estimated annual fuel costs among vehicles. This will allow you to get an idea of the money you can save each year by choosing a vehicle with better fuel economy. To estimate your annual fuel cost, based on driving 15,000 miles per year, look up the city fuel economy of the vehicle in the guide. Find that mpg in the left column of this chart and move across the line to find the estimated total annual fuel cost based on your fuel cost per gallon. If the vehicle listing indicates "P" for premium gasoline, be sure to use a higher cost per gallon than for vehicles using regular gasoline.

Consumers will find a fuel cost calculator and vehicle-specific annual fuel cost information at www.fueleconomy.gov.

ANNUAL FUEL COSTS BASED ON 15,000 MILES PER YEAR

mpg	Dollars per Gallon								
	\$2.80	\$2.60	\$2.40	\$2.20	\$2.00	\$1.80	\$1.60	\$1.40	\$1.20

COMPRESSED NATURAL GAS VEHICLES

This section supplies the driving range and fuel economy values for vehicles designed to be operated on compressed natural gas (CNG). For dual-fuel (or bi-fuel) vehicles, the values for both gasoline and CNG are shown. Dual-fuel vehicles are designed to be operated on either of two fuels, in separate tanks, and can switch between the two.

CNG fuel is normally dispensed in “equivalent gallons,” where one equivalent gallon is equal to 121.5 cubic feet of CNG. Therefore, the fuel economy values are shown in miles per gallon-equivalent.

The driving range is shown in miles and represents the distance the vehicle can travel on a full tank (or tanks) of fuel during combined city and highway driving (55% city and 45% highway).

*Driving ranges are shown for both standard and additional fuel tanks.

**Driving range shown for regular cab and super cab models, respectively.

LIQUEFIED PETROLEUM GAS (PROPANE) VEHICLES

This section contains the estimated city and highway fuel economy values and the driving range for passenger cars and light trucks designed to be operated on liquefied petroleum gas (LPG), which is commonly known as propane. For dual-fuel vehicles, both the gasoline and the LPG mpg values and driving ranges are listed, if available. Bi-fuel LPG vehicles have two fuel tanks.

DIESEL VEHICLES

This section contains fuel economy values for diesel-fueled vehicles. Diesel fuel contains approximately 10% more energy per gallon than gasoline. In addition, diesel engines have higher compression ratios, run “lean,” and are unthrottled, giving them a substantial fuel economy advantage over gasoline engines.

ELECTRIC VEHICLES

This section contains the driving range and fuel economy values for fully electric-powered passenger vehicles. The fuel economy values for electric vehicles are shown in kilowatt-hours per 100 miles, instead of miles per gallon. **A lower number of kilowatt-hours means a more efficient vehicle.**

The driving range is shown in miles and represents the maximum distance the vehicle can travel under optimum conditions before the battery needs recharging. The actual energy consumption and range of the vehicle will vary depending on driving conditions, battery condition, and accessory usage, and is strongly affected by outside temperature and the use of heating and air conditioning. Fuel costs will vary considerably because of the differences in electricity costs across the United States.

You can calculate the fuel cost (in dollars) of driving your electric vehicle for a year by multiplying the energy consumption for the vehicle as listed below (in kilowatt-hours/100 miles) by your local electricity rate (in dollars per kilowatt-hour), multiplying that by the annual miles the vehicle will be driven, and dividing by 100.

Check with your dealer for availability, as some electric vehicles may be offered for sale or lease only in certain parts of the country.

Electric Vehicle Availability:

Think City electric vehicles are initially available for lease to one major car rental agency, for use in the New York City and San Francisco, California areas. Ranger Electric vehicles are available nationwide. Explorer USPS Electric vehicles are initially available to the U.S. Postal Service, only. RAV4 electric vehicles are available nationwide, initially to fleet buyers, only.

ETHANOL FLEXIBLE-FUEL VEHICLES

This section contains the driving range and fuel economy values for ethanol flexible-fuel passenger cars and light trucks. Ethanol flexible-fuel vehicles (typically have only one fuel tank) are designed to operate on gasoline, E85 (a mixture of 85% ethanol and 15% gasoline), or any mixture of the two fuels.

The driving range and fuel economy values are shown for both gasoline and E85. When operating your FFV on mixtures of gasoline and E85, such as when alternating between using these fuels, your driving range and fuel economy values will be somewhere between those listed for the two fuels, depending on the actual percentage of gasoline and E85 ethanol in the tank.

SAMPLE FUEL ECONOMY LABEL

(Attached to New Vehicle Window)

Use these two estimates to compare to other models.

Compare this vehicle to others by using the FREE FUEL ECONOMY GUIDE available in the dealer showroom.

This is the average estimate for city driving.

This is the average estimate for highway driving.

CITY MPG
61

HIGHWAY MPG
68

Fuel Economy Information

2002 GREEN CAR 2WD, 3 CYL, 1.0 LITER, MULTIPOINT FUEL INJECTION, 5-SPEED MANUAL TRANS, CATALYST.

Estimated Annual Fuel Cost:
\$316

See www.fueleconomy.gov

Actual Mileage will vary with options, driving conditions, driving habits and vehicle's condition. Results reported to EPA indicate that the majority of vehicles with these estimates will achieve between 51 and 71 mpg in the city and between 57 and 79 mpg on the highway.

For Comparison Shopping All vehicles classified as TWO SEATERS have been issued mileage ratings ranging from 8 to 61 mpg city and 13 to 68 mpg highway.

These numbers represent the range of fuel economy for other models of this size class.

This fuel cost is based on 15,000 mi/yr at \$1.35 per gallon.

These numbers represent a range of fuel economy that most drivers achieve with this particular model.

Check the fuel economy label on the vehicle at the dealer showroom for its specific fuel economy (mpg) ratings. The ratings may vary slightly from the values in this Guide because of engine and fuel system differences not listed here.

THE DEPARTMENT OF ENERGY AND THE U.S. ENVIRONMENTAL PROTECTION AGENCY HAVE PROVIDED ELECTRONIC VERSIONS OF THIS GUIDE ON THE INTERNET:
