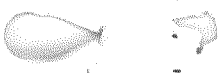
Transmittal of 1993 Income Limits for Low-Income and Very Low-Income Families Under the Housing Act of 1937 (**Effective May 5, 1993**)

This notice transmits revisions in the income limits used to define the terms "very low-income" and "low-income" in accordance with Section 3(b)(2) of the United States Housing Act of 1937, as amended, and with Title VIII of Cranston-Gonzalez National Affordable Housing Act of 1990. These income limits, which are listed by dollar amount and family size, are available for each Metropolitan Statistical Area (MSA), Primary Metropol-itan Statistical Area (PMSA), and nonmetropolitan county in the attached lists. The metropolitan area definitions in effect at the start of FY 1993 rather than the revised definitions released by the Office of Management and Budget on December 28, 1992, were used in developing these income limits and are applicable.

Section 8 income limits are primarily used to determine if an applicant for the Public Housing, Section 8, or other program subject to Section 3(b)(2) meets the relevant income eligibility requirement for admission. The revised income limits are based on HUD estimates of median family income for Fiscal Year 1993, and are the first to make use of 1990 Census data. Use of the new Census data produces both increases and decreases in the median family income estimates and income limits. Decreases in income limits do not affect the eligibility of those already receiving HUD housing assistance. **To provide for sufficient time for distribution of income limits to program sponsors, the effective date of these income limits is 45 days after they have been signed into effect.**

: Distribution: W-3-1,



As required by statute, the definition of "very low-income" is tied to 50 percent of the median income for the area, and the definition of "low-income" is tied to 80 percent of the median income for the area. The term "area" is defined such that the higher of the local median income or the State nonmetropolitan median income is used in income limit calculations. Using the appropriate median, a four-person income limit is calculated, and adjustments are then made for other family sizes. In accordance with the statute, additional adjustments are made for areas with unusually high or low incomes or housing costs.

The first step is to calculate income limits as if there were no adjustments for unusually high or low incomes or housing costs. Adjustments are then made only if the resulting income limits are outside of formula constraints. More specifically, the very low-income limit for a four-person family is set as the higher of:

- 50 percent of the area median family income; or,

- 50 percent of the State nonmetropolitan median family income for the State in which all or most of the area is located; or,

- the income at which 35 percent of income would pay for a unit renting at 85 percent of the typical rent for an existing two-bedroom unit in the area, as measured by the Section 8 Fair Market Rent (FMR) standard.

The purpose of the last calculation is to adjust for areas where rental housing costs are unusually high in relation to the median income level. A parallel adjustment to constrain income limits is made for a small number of areas where rental housing costs are unusually low relative to income levels. The guideline used is that the maximum income limit for a four-person very low-income family is set such that 30 percent of that amount will permit a family to afford a unit renting at 120 percent of the FMR (the statutory rent limit in the Section 8 Certificate and Voucher programs). In no instance, however, are adjustments made that reduce income limits below those based on the State nonmetropolitan median income level.

Most low-income limits are based on 80 percent of the appropriate area median family income estimate. For areas where very low-income limits were adjusted because of unusually high or low income-to-housing-cost ratios, the low-income limits also were proportionately adjusted. As in previous years, the U.S. median family income estimate ($39,700 for FY 1993) is used as a "cap" on the four-person limit.

The family size adjustment factors required by statute are intended to provide higher income limits for larger families and

lower income limits for smaller families. The factors used are as follows:

Number of Persons in Family and Percentage Adjustments

1	2	3	4	5	6	7	8
70%	80%	90%	Base	108%	116%	124%	132%

Income limits for families with more than eight persons are not included in the printed lists because of space limitations. For each person in excess of eight, 8 percent of the four-person base should be added to the eight-person income limit. (E.g., the nine-person limit equals 140 percent [132 + 8] of the relevant four-person income limit.) All income limits are rounded to the nearest $50 to reduce administrative burden.

For purposes of HUD programs, income limits approved for Indian Trust Lands remain in effect unless superseded by higher FY 1993 income limits.

HUD Field Offices are responsible for maintaining complete and up-to-date records of all current income limits established for areas within their jurisdiction. Notice of all income limit revisions should be promptly distributed to program participants, and Field Offices should be prepared to make income limits available to the public upon request.

Requests from the public for sets of national or regional income limits may be referred to HUD USER, whose toll-free number is 1-800-245-2691 (301-251-5154 in the Washington, DC area). Questions related to how these income limits apply to the programs of State and other Federal agencies should be referred to those agencies. Questions concerning the methodology used to develop these income limits are addressed in the briefing material supplied to all HUD Field Office economists and also available through HUD USER.

Estimated Median Family Incomes for Fiscal Year 1993

This memorandum transmits median family income (MFI) and income distribution estimates for Fiscal Year 1993 (FY 1993) for all Metropolitan Statistical Areas (MSAs), Primary Metropolitan Statistical Areas (PMSAs) and nonmetropolitan counties. These estimates are the first to incorporate 1990 Census data and, as a result, some areas have median incomes that are significantly higher or lower than last year's estimates. The estimated median family income for the United States for FY 1993 is $39,700, which is 3 percent higher than last year's estimate.

The FY 1993 MFI estimates are based on 1990 Census information on median family incomes. Because county level data on income changes were not yet available for the post-1990 period, local 1990 Census data updated with Census Divisional P-60 data were used to estimate FY 1993 median family income levels for metropolitan areas and nonmetropolitan counties. Attachment 1 provides an explanation of the methodology used to develop these estimates. Attachment 2 provides median income estimates for States, and Attachment 3 provides local estimates of median family incomes. All estimates are based on metropolitan definitions in effect at the start of FY 1993, rather than the revised definitions released by the Office of Management and Budget on December 28, 1992.

Please note that the use of the HUD median family income estimates and income limits is subject to individual program guidelines covering definitions of income and family, family size, effective dates and other factors. If there are any

: Distribution: W-3-1,

questions concerning the income estimates, pleaseplease request your Office's economist to contact his or her Head- quarters' counterparts. Public inquiries may be referred to HUD USER, whose toll-free number is 1-800-245-2691 (use 301-251-5154 in the Washington metropolitan area).

Lawrence L. Thompson,
General Deputy Assistant Secretary
For Policy Development and Research, T

Attachment 1

HUD METHODOLOGY FOR ESTIMATING FY 1993 MEDIAN FAMILY INCOMES (ECONOMIC AND MARKET ANALYSIS DIVISION, OFFICE OF ECONOMIC AFFAIRS, PD&R)

FY 1993 median family income (MFIs) estimates are developed for all Metropolitan Statistical Areas (MSAs), Primary Metropolitan Statistical Areas (PMSAs), and nonmetropolitan counties. The starting point for these estimates is 1990 Census data. These data are aggregated to the metropolitan area and nonmetropolitan county level to produce estimates of median family incomes. Census Divisional P-60 survey data are then used to update these estimates from mid-189 to mid-1991, and the resulting estimates then trended forward to the start of the second quarter of 1993 (i.e., mid-FY 1993). The Federal metropolitan area definitions used were those in force at the start of FY 1993 (i.e., October 1, 1992).

Because post-1990 county-level data were not yet available, the income estimation process is simpler than that used in previous years. Past income estimates were developed in several steps using average wage information from County Business Patterns (CBP) data, from Census Division MFIs from the Current Population Reports (CPS) P-60 Series, and from HUD projections from the most recent actual data point to the mid-point of the Fiscal Year for which an estimate is provided. For the FY 1993 estimates, the most current data available were the 1990 Census and 1989-91 CPS income data. CBP and Bureau of Labor Statistics data were available on average wage incomes, but only through 1990. It therefore was decided to use only 1990 Census and Census CPS data to prepare the FY 1993 income estimates, and to introduce use of local data in the FY 1994 estimates.

FY 1993 estimates are the first to be based on 1990 Census data. The Census income data question produces answers which yield a mid-1989 income figure, so incomes are adjusted with a mid-1989 starting point. The income estimation methodology used to produce the FY 1993 HUD median family income estimates was as follows:

(1) Increase factors for the P-60 Series median family incomes are calculated for Census Divisions for the 1989-1991 period.

$$\frac{\text{Census Division P-60 MFI (1991)}}{\text{Census Division P-60 MFI (1989)}} = \text{2-year increase factor for Census Division P-60 Median Family Income}$$

(2) Income adjustment factors from Step 1 were trended forward at the rate of 4 percent per year for the June 1992 to June 1993 period, and an average increase of three-fourths of that amount was used for the following nine months (June 1992 to April 1993) to obtain mid-FY 1993 update factors. Use of projected increases is necessary because of data availability lags.

(Step 2 Factors) * 1.04 * 1.03 = mid-1989 to mid-1993 adj. factor

(3) Calculation of median family incomes for FY 1993 is completed by multiplying the 1989 median family incomes obtained from the 1990 Census by the income adjustment factors derived in Step 2.

1989 Census Median Family Income * Step 2 factor = FY 1993 MFI est.

In some instances the estimated median family income for FY 1993 was less than the estimate published for FY 1992. The FY 1993 estimates were not held constant in such instances, as was done during the intercensal period, because the 1990 Census-based estimates are more statistically reliable than the FY 1992 estimates.
