I. Introduction

This survey file contains data on state library agencies in the 50 states and the District of Columbia for fiscal year (FY) 1999. The data were collected through the State Library Agencies (StLA) Survey which is conducted annually by the National Center for Education Statistics (NCES). The StLA Survey is a cooperative effort of the Chief Officers of State Library Agencies (COSLA), the U.S. National Commission on Libraries and Information Science (NCLIS), the U.S. Census Bureau, and NCES. The FY 1999 StLA Survey is the sixth in the series.

Note: The file was previously released in September 2000. This revised file is identical except for the removal of selected items to comply with federal laws (see <http://nces.ed.gov/statprog/confid3.asp>) which cover the protection of the confidentiality of individually identifiable information collected by NCES.

Background

A state library agency is the official agency of a state charged by state law with the extension and development of public library services throughout the state and which has adequate authority under state law to administer state plans in accordance with the provisions of the Library Services and Technology Act (LSTA) (P.L. 104-208). StLAs are increasingly receiving broader legislative mandates affecting libraries of all types. Their administrative and developmental responsibilities affect the operation of thousands of public, academic, school, and special libraries in the nation. StLAs provide important reference and information services to state government and administer the state library and special operations such as state archives, libraries for the blind and physically handicapped, and the State Center for the Book. The StLA may also function as the state's public library at large, providing service to the general public and state government employees.

Purpose of Survey

The purpose of the StLA Survey is to provide state and federal policymakers and other interested users with information about state library agencies. The data collected are useful to (1) Chief Officers of StLAs, (2) policy makers in the executive and legislative branches of Federal and state governments, (3) government and library administrators at Federal, state, and local levels, (4) the American Library Association and its members or customers, and (5) library and public policy researchers. The survey asks each StLA about the kinds of services it provides, its staffing practices, its collections, income and expenditure data, and more. Decision-makers use the NCES survey to obtain information about services and fiscal practices.

The StLA Survey collects data on state library agency services to public, academic, school, and library systems. When added to the data collected through the NCES surveys of public, academic, school, federal libraries, and library cooperatives, these data help complete the national picture of library service.

Congressional Authorization

NCES is the primary federal entity for collecting, analyzing, and reporting data related to education in the United States and other nations. It fulfills a congressional mandate to to collect, collate, analyze, and report full and complete statistics on the condition of education in the United States; conduct and publish reports and specialized analyses of the meaning and significance of such statistics; assist state and local education agencies in improving their statistical systems; and review and report on education activities in foreign countries.

Reporting Period

The FY 1999 StLA Survey requested data for state fiscal year 1999, except for Part B—Governance and Part I—Staff, which requested data as of October 1, 1999. The fiscal year of most states is July 1 to June 30. Exceptions are New York (April 1 to March 31); Texas (September 1 to August 31); and Alabama, the District of Columbia, and Michigan (October 1 to September 30).

Survey Instrument

The FY 1999 survey was redesigned to collect data over the Internet via a Web-based reporting system (replacing the downloadable DOS software used in past years). The Web survey application includes a user guide which explains the proper use of the survey application, the data entry form and instructions, a 'Help' function which links each survey data item to the instructions for the item, and an edit check tool. The Web survey was designed to minimize respondent burden and to provide NCES with state-edited data requiring minimal or no follow-up for data problems.

Survey Release Date, Editing, and Follow-up

The FY 1999 StLA Survey was conducted over the Internet via a Web-based reporting system. The survey was released on the Web to state library agencies for data entry on December 16, 1999. The survey had a due date of February 15, 2000 and a firm close-out date of March 15, 2000. The U.S. Census Bureau was the data processing agent for the survey through an interagency agreement with NCES. Census administered the Web survey system, provided technical support, conducted nonresponse follow-up, and produced tabulations of the data. NCES edited the state data submissions. Nonresponse follow-up was conducted a few weeks before the survey due date due to the firm close-out date. The data were edited on a flow basis (i.e., soon after receipt). After data were received from all 50 states and the District of Columbia, the preliminary national file was created, and the data were reviewed for data quality by the StLA Survey Steering Committee, Census, and NCES. States were contacted to request verification or correction of questionable data before the final file was produced.

To reduce response burden, the survey was transmitted with pre-entered prior-year data for items where the data are not expected to change annually—all or some of Parts A through E and N, or about 40 percent of all items. The respondent was requested to review the pre-entered data and update any information that had changed. All other data cells were left blank for the respondent to fill in, not update. The respondent was instructed to answer -1 to any numeric item if they could not provide the data. The Web application required a response to all alpha-numeric items, except items that could legitimately be left blank due to skip patterns. The respondent could not "lock" their data file to signify their completion of the survey unless these conditions were met. A zero (0) is a reported response and indicates the StLA had none of the item. Missing data were imputed, unlike prior years. See the section below on "Imputation" for a discussion of the imputation methodology.

An edit check tool was built into the Web application which alerted the respondent to questionable data during the data entry process through interactive "error warnings" and through error reports which could be viewed on-screen or printed. The edit check program enabled the respondent to submit an edited data file to NCES which usually required little or no follow-up for data problems.

The Web application edit tool performed four types of edit checks on the data:

1. Relational edit checks . This is a data consistency check between related data elements. For example, an error message was generated if the StLA was designated as a Federal depository library but did not indicate the type of Federal depository library.
2. Out-of-range edit checks. This is a comparison of data reported for an item to the "acceptable range" of values. For example, an error message was generated if annual Circulation per annual Library Visits was less than 0.5.
3. Arithmetic edit checks. This is an arithmetical accuracy check of a reported total and its parts to the generated total. For example, an error message was generated if Total Operating Expenditures was not equal to the sum of its parts (Total Staff Expenditures, Collection Expenditures, and Other Operating Expenditures).
4. Blank/zero/invalid edit checks. This is a check of reported data against acceptable values. For example, an error message was generated if Book/Serial Volumes was 0 or blank.

Imputation

Missing data were imputed using one of 3 methods: the zero rule, the growth rule, or regression modeling. These methods were used in order -- the zero rule first, then the growth rule, with regression modeling as the last resort. These methods are explained below.

- **The zero rule.** If the state did not report a value for FY 1999 and reported 0 for FY 1998, then the value for FY 1999 was set to 0. This rule was applied first, on the assumption that there was no change from the prior year.
- **The growth rule.** If the state did not report a value for FY 1999 and the value for FY 1998 was greater than 0, the growth rate from FY 1998 to FY 1999 was calculated for all states that reported data greater than 0 in both years. The median of the growth rates was then calculated and applied to the state's previously reported data to obtain an estimate for FY 1999. Note: The growth rule looked at values for the prior year only, as states that cannot report a particular item tend to have ongoing problems reporting the item, so earlier data were not considered to be useful.
- **Regression Modeling.** If the state did not report a value for FY 1999 and there is no value for FY 1998, regression was used. The regression model used only the FY 1999 data file. This method used 3 to 6 auxiliary items reported by all states, to determine the regression model that best fit the data. The missing value was then replaced with the regression-predicted value. The auxiliary items were selected by calculating the correlations between the imputed item and all other numeric items on the data file, and, after a process of stepwise elimination, using the items that had significant correlations to the imputed item. The backward elimination technique was used, which calculates all the statistics for the model, and then deletes variables from the model one by one until all the variables remaining in the model produce significant F statistics. Only two regression models were used to impute FY99 data. The regression model for library visits (item 114) showed significant correlations with reference transactions (item 113) and total library services staff who are ALA-MLS Librarians (item 129(a)). Interlibrary loan/document delivery received from other libraries and document delivery services (item 112) showed significant correlations with public service hours from Monday-Friday after 5:00 p.m. (item 078) and interlibrary loan/document delivery provided to other libraries (item 111).

Using the Data to Make Comparisons. Missing data were imputed beginning with the FY 1999 survey. Users should take into consideration that the 15 items which include some imputed data are not strictly comparable to prior-year data files, which include reported data only.

State comparisons should be made with caution because states may vary in their fiscal year reporting periods (as discussed above) and in their interpretation of the survey definitions. The District of Columbia, while not a state, is included in the survey. Caution should be used in comparing District of Columbia data with state data.

Survey Data Items

The survey collected data on 421 items, including governance, public service hours, service outlets, collections, library service and development transactions, electronic services, allied operations, staff, income, and expenditures. The survey data items and definitions are provided in the survey instrument at the end of this document.

Survey Changes

The FY 1999 StLA survey included these major changes, by survey part:

Part B - Governance. 1. Former item 024 (Judicial branch) was deleted since no StLAs are located in the judicial branch. 2. Former items 032 (Ex-officio members) and 033 (Elected members) were deleted since no StLA reported such data on the FY 1994 through FY 1998 survey.

Part E - Public Service Hours, Outlets, and User Groups. Former question 7 ("*On what basis are StLA outlets that serve the general public open to them?*") was deleted based on questionable data quality.

Part I - Staff. Former question 16 on was revised to delete the collection of full-time equivalent staff data by race/ethnicity due to respondent burden and lack of demand for these data.

Part N - Electronic Services and Information. 1. New question 24 on Internet speed of connection was added. 2. Former item 220 (Internet terminals used by StLA staff only) was deleted due to lack of demand for these data. 3. New questions 28, 29, and 30 on statewide database licensing were added.

II. B. Guidelines for Processing the State Library Agencies Survey Data File

Processing the Data File

The StLA Survey file is provided in two formats: MS-Access (istla99b.mdb) and ASCII (istla99b.txt).¹ The data file name was changed (1) to include 'i' (for imputed file) as the first character of the file name and (2) to add a new last character ('b' for this file) to indicate the file version. See the note in the *Introduction* for the changes to this revised file. The record layout is provided in appendix A. The ASCII file consists of one record of fixed length for each StLA. The Access file is also one record of fixed length for each StLA, but, due to the record length, the file is split into four tables, as follows:

- *istla99b_part 1* corresponds to survey Parts A to E (see list below);
- *istla99b_part 2* corresponds to survey Parts F to I (see list below);
- *istla99b_part 3* corresponds to survey Parts J to O (see list below); and
- *istla99b_part 4_flags* (imputation flags and their values).

048 Accreditation of libraries. The StLA may endorse or approve officially libraries which meet criteria specified by the State.

049 Administration of LSTA grants. Includes determining compliance with eligibility criteria and performance standards, overseeing processes through which grant recipients are determined, announcing grant recipients and disbursing funds, monitoring and receiving reports from grant recipients, submitting plans and reports to the Office of Library Services within the Institute of Museum and Library Services, and other activities involved in the management of financial assistance provided by the federal government to libraries under the Library Services and Technology Act.

050 Administration of State aid. These qualifications may include a master's degree from a graduate program accredited by the American Library Association, another level or type of educational attainment, confirmation of participation in continuing education activities, and/or residency in the State for a specified period.

Appendix C—Survey Instrument (Data Entry Screens and Instructions)

052 Collection of library statistics. Every StLA collects statistics on public libraries and participates in the Federal-State Cooperative System (FSCS) for Public Library Data. Many StLA's collect statistics on institutional and other special libraries. Some StLA's assist in the collection of academic library statistics for the Integrated Postsecondary Education Data System (IPEDS). A few StLA's collect statistics on school library media centers. These data collections usually involve the design and administration of survey instruments as well as data entry and processing and report design and dissemination.

053 Consulting services. Individual or small-group contacts to help libraries to attain goals and objectives and to deal with specific needs and problems. Consultants provide guidance on problems of concern to local personnel, assistance in identifying problems not clearly recognized, and identification of opportunities for increased or improved performance to specific groups.

054 Continuing education programs. Includes staff development events for library personnel at all levels as well as training events for trustees and other State and local government officials who have authority over or responsibility for libraries.

055 Cooperative purchasing of library materials. Two or more independent libraries of any type engaging in joint activities related to purchasing materials, together with the maintenance of the necessary records of these additions. Also included are joint activities related to the identification and verification of titles, fund accounting, processing payments, and claims.

056 Interlibrary loan referral services. Activities involving bibliographic service centers or utilities, regional systems (federations or cooperatives), consortia, and resource centers, such as identifying libraries believed to own requested materials and/or transmitting interlibrary loan requests in accordance with established protocols or prevailing practices.

057 Library legislation preparation/review. Minimally, addresses the governance and financing of the StLA, public library service, and library service to blind and physically handicapped persons and residents of State institutions. It usually permits the types of public library structures, such as municipal, countywide, regional, federated, cooperative, and contractual agreements. It may also provide mandates for StLA functions, other types of libraries (e.g., academic, school), and multitype cooperation.

058 Library planning/evaluation/research. Activities involved in designing and assessing library programs and services and studying issues facing libraries. Examples: the PLA planning and role-setting process for public libraries, the TELL IT! evaluation process.

059 Literacy program support. Organized efforts to assist individuals with limited language and mathematical skills in developing skills in reading, writing, and computation that enable them to function in society without assistance from others.

060 OCLC Group Access Capability (GAC). Use of the Online Computer Library Center (OCLC) system, originally the Ohio College Library Center, by a group of libraries for resource sharing and interlibrary lending (ILL). Group Access Capability (GAC) related activities may include coordinating group profiling, establishing group policies, coordinating ILL protocols within the group, and referring requests outside of a GAC group.

061 Preservation/conservation services. Specific measures undertaken for the repair, maintenance, restoration, or protection of library materials, including but not limited to binding and rebinding, materials conversion (to microform for example), deacidification, and lamination.

062 Reference referral services. Provision of information about or from groups or organizations. A reference referral transaction involves the provision of information about a group or organization and its activities, services or agencies, and calendar. Such a transaction typically requires the determination of the user's need and the appropriate group or organization to meet the need. Such a transaction may require directing the user to persons or organizations external to the library for an answer to a question.

Appendix C—Survey Instrument (Data Entry Screens and Instructions)

063 Retrospective conversion of bibliographic records. Retrospective conversion involves changing bibliographic records from one format, usually cards, to machine-readable form in order to produce or make additions to an automated catalog.
