I. Introduction

This survey file contains final data on state library agencies in the 50 states and the District of Columbia for fiscal year (FY) 2000. The data were collected through the State Library Agencies (StLA) Survey, a voluntary survey conducted annually by the National Center for Education Statistics (NCES). The survey is a cooperative effort of the Chief Officers of State Library Agencies (COSLA), the U.S. National Commission on Libraries and Information Science (NCLIS), the U.S. Census Bureau (the data collection agent), and NCES. The FY 2000 StLA Survey is the seventh in the series.

Note: The file was previously released in November 2001. This revised file is identical except for the removal of selected items to comply with federal laws (see <http://nces.ed.gov/statprog/confid3.asp>) which cover the protection of the confidentiality of individually identifiable information collected by NCES.

Background

A state library agency is the official agency of a state charged by state law with the extension and development of public library services throughout the state and which has adequate authority under state law to administer state plans in accordance with the provisions of the Library Services and Technology Act (LSTA) (P.L. 104–208). StLAs are increasingly receiving broader legislative mandates affecting libraries of all types. Their administrative and developmental responsibilities affect the operation of thousands of public, academic, school, and special libraries in the nation. StLAs provide important reference and information services to state government and administer the state library and special operations such as state archives, libraries for the blind and physically handicapped, and the State Center for the Book. The StLA may also function as the state's public library at large, providing service to the general public and state government employees.

Purpose of Survey

The purpose of the StLA Survey is to provide state and federal policymakers and other interested users with information about state library agencies. The data collected are useful to (1) chief officers of StLAs, (2) policymakers in the executive and legislative branches of Federal and state governments, (3) government and library administrators at Federal, state, and local levels, (4) the American Library Association and its members or customers, and (5) library and public policy researchers. The survey asks each StLA about the kinds of services it provides, its staffing practices, its collections, income and expenditure data, and more. Decisionmakers use the NCES survey to obtain information about services and fiscal practices.

The StLA Survey collects data on state library agency services to public, academic, and school libraries, and library systems. When added to the data collected through the NCES surveys of public, academic, and school libraries, these data help complete the national picture of library service.

Congressional Authorization

NCES is the primary federal entity for collecting, analyzing, and reporting data related to education in the United States and other nations. It fulfills a congressional mandate to to collect, collate, analyze, and report full and complete statistics on the condition of education in the United States; conduct and publish reports and specialized analyses of the meaning and significance of such statistics; assist state and local education agencies in improving their statistical systems; and review and report on education activities in foreign countries.

II. User's Guide

A. Survey Methodology

This survey file contains final data on state library agencies in the 50 states and the District of Columbia (51 total) for FY 2000.

Survey Instrument

The StLA data are collected over the Internet via a Web-based reporting system. The Web survey application includes a user guide explaining its features and operation, the data entry form and instructions, a 'Help' function which links data items to their definitions, and an edit check tool. The Web survey was designed to minimize response burden, to improve the timeliness and quality of the data, and to require minimal or no edit follow-up for data problems.

The FY 2000 survey collected data on 423 items, including state library agency identification, governance, public service hours, service outlets, collections, library service transactions, library development transactions, services to other libraries in the state, allied operations, staff, income, expenditures, and electronic services and information. The data items and definitions are provided in the survey facsimile at the end of appendix C.

Reporting Period. The FY 2000 StLA Survey requested data for state fiscal year 2000, except for Part B—Governance and Part J—Staff which requested data as of October 1, 2000. The fiscal year of most states is July 1, 1999 to June 30, 2000. Exceptions are New York (April 1, 1999 to March 31, 2000); Texas (September 1, 1999 to August 31, 2000); and Alabama, the District of Columbia, and Michigan (October 1, 1999 to September 30, 2000).

Survey Universe

The state library agencies in the 50 states and the District of Columbia (51 total) comprise the survey universe.

Survey Response Rate

Unit Response. The FY 2000 StLA Survey achieved a 100 percent unit response rate.

Item Response. Most items had a 100 percent response rate. Items with less than a 100 percent response rate are listed below.

Data item number	Data item	Response rate
114	Library visits	90.2
223a	Statewide database licensing expenditures (federal)	98.0
223b	Statewide database licensing expenditures (state)	98.0
223c	Statewide database licensing expenditures (other)	98.0
223d	Statewide database licensing expenditures (total)	98.0
239	Pre-kindergarten learning ("readiness for school")	98.0
240	Adult literacy and family literacy	98.0

Data Collection and Processing

The StLA Survey was released on the Web to state library agencies for data entry on October 16, 2000 and had a due date of February 16, 2001. The U.S. Census Bureau was the data processing agent for the survey through an interagency agreement with NCES. Census administered the Web survey system, provided technical support, and conducted nonresponse follow-up. Census also produced the data files and tabulations and edited the data, with additional review by NCES.

To reduce response burden, the survey was transmitted with pre-entered prior-year data for items where the data are not expected to change annually—most of Parts A through E and N, or about half of all survey items. The respondent was requested to review the pre-entered data and update any information that had changed from the previous year. All other data cells were left blank for the respondent to fill in, not update. The respondent was instructed to answer -1 to any numeric item if they could not provide the data. The Web application required a response to all alpha-numeric items, except items that could legitimately be left blank due to skip patterns. The respondent could not "lock" his/her data file to signify completion of the survey unless these conditions were met. A zero (0) is a reported response and indicates the state library agency had none of the item. Missing data were imputed. See the section below on *Imputation* for a discussion of the imputation methodology.

An edit check tool, built into the Web application, alerted the respondent to questionable data during the data entry process through interactive "edit check warnings" and through edit check reports which could be viewed on-screen or printed. The edit check program enabled the respondent to submit an edited data file to NCES which usually required little or no follow-up for data problems. The edit check tool includes four types of edits:

1. Relational edit checks. This is a data consistency check between related data elements. For example, an edit check message is generated if the state library agency is designated as a federal depository library but does not indicate the type of federal depository library.
2. Out-of-range edit checks. This is a comparison of data reported for an item to the "acceptable range" of numeric values. For example, an edit check message is generated if annual circulation per annual library visits is less than 0.5 circulation transactions per visit.
3. Arithmetic edit checks. This is an arithmetic check comparing a reported total to the sum of its parts. For example, an edit check message is generated if total operating expenditures is not equal to the sum of its parts (total staff expenditures, collection expenditures, and other operating expenditures).
4. Blank/zero/invalid edit checks. This is a check of reported data against acceptable values. For example, an edit check message is generated if book/serial volumes is 0 or blank.

The preliminary data file and draft tables were reviewed by the State Library Agencies Survey Steering Committee, Census, and NCES for data quality. States with questionable data were contacted to request verification or correction of such data.

Using the Data to Make Comparisons

Missing data were imputed beginning with the FY 99 survey. Users should take into consideration that items which include imputations are not strictly comparable to data prior to FY 99, which include reported data only.

State comparisons should be made with caution because states vary in their fiscal year reporting periods, as indicated above, and may vary in their interpretation of the survey definitions. The District of Columbia, while not a state, is included in the survey. Caution should be used in comparing District of Columbia data with state data.

Imputation

Missing data were imputed¹ using one of 4 methods: the zero rule, the growth rule, regression modeling, or the sum rule. These methods were used in order—the zero rule first, then the growth rule, then regression modeling, and finally the sum rule. These methods are explained below.

¹ The survey items that have imputations are listed on the previous page under *Item Response*.

- ◆ **The zero rule.** If the state did not report a value for FY 2000 and the value is 0 for FY 99, then the value for FY 2000 was set to 0. This rule was applied first, on the assumption that there was no change from the prior year. The 0 in the prior year could be an imputed value.
- ◆ **The Growth Rule.** If the state did not report a value for FY 2000 and the value for FY 99 was greater than 0, the growth rate from FY 99 to FY 2000 was calculated for all states that reported data greater than 0 in both years. The median of the growth rates was then calculated and applied to the state's FY 99 data to obtain an estimate for FY 2000. The growth rate could be applied to an FY 99 imputed value. Note: The growth rule looked at values for the prior year only, as states that cannot report a particular item tend to have ongoing problems reporting the item, so earlier data were not considered to be useful.
- ◆ **Regression Modeling.** If the state did not report a value for FY 2000 and there was no comparable value for FY 99 (e.g., a new item was added to the survey), regression was used. The regression model used only the FY 2000 data file. Regression was used to impute adult literacy and family literacy (ADFAMLIT),² a revised item on the FY 2000 file that did not directly correspond to the FY 99 item (adult literacy). Total literacy program support staff (LITPRSED), total state expenditures for financial assistance to libraries (AIDPLSB), and total LSTA expenditures for services to children in poverty (SERPOVXU) were chosen as the predictor items reported by all states. Due to response scaling problems, a log transform was used on ADFAMLIT. The model was fitted to states that reported a positive value for ADFAMLIT. The missing value of ADFAMLIT was then replaced with the regression-predicted value.
- ◆ **The Sum Rule.** When the details of a total and the total were missing, the details were imputed by the zero rule, the growth rule or regression modeling. The total was then imputed by adding up the details.

B. Guidelines for Processing the State Library Agencies Survey Data File

Processing the Data File

The data file is provided in two formats: MS-Access (istla00b.mdb) and ASCII (istla00b.txt).³ The data file name was changed (1) to include 'i' (for imputed file) as the first character of the file name and (2) to add a new last character ('b' for this file) to indicate the file version. See the note in the *Introduction* for the changes to this revised file. The record layout is provided in appendix A. The ASCII file consists of one record of fixed length for each StLA. The Access file is also one record of fixed length for each StLA, but, due to the record length, the file is split into four tables, as follows:

- *istla00b_part 1* corresponds to survey Parts A to E (see list below);
- *istla00b_part 2* corresponds to survey Parts F to I (see list below);
- *istla00b_part 3* corresponds to survey Parts J to O (see list below); and
- *istla00b_part 4_flags* (imputation flags and their values).

Appendix C—Survey Instrument (Data Entry Screens and Instructions)

30. Enter <Y>es or <N>o to indicate whether your statewide database licenses paid for by the funds reported in question 28 cover access for remote users.
- 230 Remote users. Authorized users having access to and use of licensed database(s) from sites outside of a library building.
31. Enter <Y>es or <N>o to indicate whether the StLA facilitates or subsidizes electronic access to the holdings of other libraries in the state, by the specified categories.
- 231 CD-ROM union catalog. A CD-ROM union catalog lists the holdings of participating libraries on one or more compact discs. The electronic indexes and bibliographic records can be accessed only by libraries with compatible hardware (computer, CD-ROM drives) and proprietary software.
- 232 OCLC participation (GAC, retrospective conversion). Use of the Online Computer Library Center (OCLC, Inc.) system by a group of libraries for resource sharing and interlibrary lending (ILL). Group Access Capability (GAC) related activities may include coordinating group profiling, establishing group policies, coordinating ILL protocols within the group, and referring requests outside of a GAC group. Retrospective conversion of bibliographic records involves changing bibliographic records from one format, usually cards, to machine-readable form in order to produce or make additions to an automated catalog.
- 233 Telnet gateway. A Telnet gateway allows users to log onto the on-line catalogs of other libraries via the Internet. Telnet access is available in text format only.
- 234 Web-based union catalog (statewide, multistate, regional). A Web-based union catalog makes the aggregated electronic holdings of libraries in a region, a multitype system, or a state available via the World Wide Web. Holdings and indexes for a Web-based union catalog are mounted on a server that is connected to the Internet. Access to the bibliographic information in a Web-based union catalog is available to any user with an Internet connection and a standard Web browser.
- 235 Z39.50 gateway (regional, multitype). A Z39.50 gateway uses the ANSI/NISO Z39.50 information retrieval protocol to create an Internet-based library information and resource sharing network which enables libraries to make their on-line public access catalogs available and enables users to access on-line catalogs with a standard Web browser.
- 236 Other type of electronic access. If the StLA facilitates or subsidizes a type of electronic access to the holdings of other libraries in the state not covered in items 231 to 235, enter <Y> for this item.

Appendix C—Survey Instrument (Data Entry Screens and Instructions)

Part O. Public Policy Issues

33. Enter in the spaces provided the total grants and contracts expenditures (from all sources) by the StLA to assist public libraries in responding to goals in a state or federal education reform initiative in the following areas. These expenditures should also be reported in Part K.

239 Readiness for school. Pre-kindergarten learning that helps a child to enter kindergarten or first grade. Grants and contract purposes for “readiness for school” may include cooperative programs for children’s learning between or among public libraries and day care centers, schools, and other education and cultural organizations, including summer reading programs, toddler programs, etc.

240 Adult literacy and family literacy.

Note: Adult literacy and family literacy are defined separately below, but report the total grant and contract expenditures for “adult literacy” and “family literacy” as one sum.

Adult literacy. Any library or cooperative program with other agencies or literacy organizations that helps adults learn to develop or improve reading skills to function as learners, workers, consumers, and effective members of society.

Family literacy (exclude Readiness for School). Any library or cooperative program with other agencies or literacy organizations that provides integrated educational services for families, including adult education for parents to help them improve reading skills in conjunction with childhood education for their children. Exclude Readiness for School expenditures which should only be reported in item 239.

34. Enter <Y>es or <N>o to indicate whether the StLA monitors or tracks developments in interagency cooperation or progress in library partnerships with business.

Note: 1. The distinction is made between “developments in interagency cooperation” and “progress in library partnerships with business,” recognizing new initiatives versus ongoing partnerships, and recognizing initiatives directed at government agencies and the arts versus initiatives directed at business and civic organizations.

2. “Monitoring” means the StLA maintains a list of libraries engaging in such cooperation and information about the participating organization and the purpose of the cooperation to the extent feasible.

241 Developments in interagency cooperation between libraries and other educational and cultural institutions. Any activity or program that a library, or group of libraries, sponsors with the assistance of, or in cooperation with, another government agency or cultural institution. The agency may be a local, county, state or federal agency. The cultural institution may include museums or other cultural organizations funded by tax dollars. The library does not need to be the initiator of such cooperation.

242 Progress in library partnerships with business/community organizations or other entities. Any activity or program that a library, or group of libraries, sponsors with the support or participation of business and community organizations. Civic associations and non-profit cultural organizations, or associations that are not government agencies, should be considered community organizations. Civic associations may include parent-teacher associations, unions and similar organizations. Non-profit cultural organizations may include historical societies, archives or similar organizations.
