I. Introduction

This survey file contains final data on state library agencies in the 50 states and the District of Columbia for fiscal year (FY) 2002. The data were collected through the State Library Agencies (StLA) Survey, a voluntary survey conducted annually by the National Center for Education Statistics (NCES). The survey is a cooperative effort of the Chief Officers of State Library Agencies (COSLA), the U.S. National Commission on Libraries and Information Science (NCLIS), the U.S. Census Bureau (the data collection agent), and NCES. The FY 2002 StLA Survey is the ninth in the series.

Background

A state library agency is the official agency of a state charged by state law with the extension and development of public library services throughout the state and which has adequate authority under state law to administer state plans in accordance with the provisions of the Library Services and Technology Act (LSTA) (P.L. 104–208). Their administrative and developmental responsibilities affect the operation of thousands of public, academic, school, and special libraries in the nation. StLAs provide important reference and information services to state government and administer the state library and special operations such as state archives, libraries for the blind and physically handicapped, and the State Center for the Book. The StLA may also function as the state's public library at large, providing service to the general public and state government employees.

Purpose of Survey

The purpose of the StLA Survey is to provide state and federal policymakers and other interested users with information about state library agencies. The data collected are useful to (1) chief officers of StLAs, (2) policymakers in the executive and legislative branches of federal and state governments, (3) government and library administrators at federal, state, and local levels, (4) the American Library Association and its members or customers, (5) library and public policy researchers, and (6) the public, journalists, and others. Decisionmakers use this survey to obtain information about services and fiscal practices.

The data collected on StLA services to public, academic, and school libraries, and library systems, when added to the data collected through the NCES surveys of public, academic, and school libraries, will help complete the national picture of library service.

Congressional Authorization

NCES is authorized to collect these data under the Education Sciences Reform Act of 2002. NCES is the primary federal entity for collecting, analyzing, and reporting data related to education in the United States and other nations. It fulfills a congressional mandate to collect, collate, analyze, and report full and complete statistics on the condition of education in the United States; conduct and publish reports and specialized analyses of the meaning and significance of such statistics; assist state and local education agencies in improving their statistical systems; and review and report on education activities in foreign countries.

II. User's Guide

II. A. Survey Methodology

This survey file contains final data on state library agencies in the 50 states and the District of Columbia (51 total) for FY 2002.

Survey Instrument

The StLA data are collected over the Internet via a Web-based reporting system. The Web survey application includes a user guide and tutorial explaining its features and operation, the data entry form and instructions,

and an edit check tool. The Web survey was designed to minimize response burden, to improve the timeliness and quality of the data, and to require minimal or no edit follow-up for data problems.

The FY 2002 survey collected data on 436 items, including state library agency identification, governance, public service hours, service outlets, collections, library service transactions, library development transactions, services to other libraries in the state, allied operations, staff, income, expenditures, and electronic services and information. The data items and definitions are provided in the survey instrument in appendix C.

Note: The data collected for new survey items 239-245 in Part N (see survey instrument at end of this report) were not included on the data file due to significant reporting problems. NCES plans to collect the data in FY 2004 following revision of the definitions.

Reporting Period. The FY 2002 StLA Survey requested data for state fiscal year 2002, except for Part B—Governance and Part I—Staff which requested data as of October 1, 2002. The fiscal year of most states was July 1, 2001 to June 30, 2002. Exceptions were New York (April 1, 2001 to March 31, 2002); Texas (September 1, 2001 to August 31, 2002); and Alabama, the District of Columbia, and Michigan (October 1, 2001 to September 30, 2002).

Survey Universe

The state library agencies in the 50 states and the District of Columbia (51 total) comprise the survey universe.

Survey Response Rate

Unit Response. The FY 2002 StLA Survey achieved a 100 percent unit response rate.

Item Response. Most items had a 100 percent response rate. The following items had response rates below 100 percent:

<u>Item number</u>	<u>Item</u>	<u>Response rate</u>
091	Book and serial volumes	98.0
092	Audio materials	98.0
094	Video materials	98.0
095	Current serial subscriptions	98.0
096	Government documents	98.0
110	Circulation	98.0
111	Interlibrary loans provided to other libraries	98.0
112	Interlibrary loans received from other libraries and document delivery services	98.0
113	Reference transactions	98.0
114	Library visits	88.2
223a	Statewide database licensing expenditures (federal)	98.0
223b	Statewide database licensing expenditures (state)	98.0
223d	Statewide database licensing expenditures (total)	98.0

Data Collection and Processing

The StLA Survey was released on the Web to state library agencies for data entry on January 15, 2003. The survey had a due date of March 31, 2003. The U.S. Census Bureau was the data processing agent for the survey through an interagency agreement with NCES. Census administered the Web survey system, provided technical support, conducted nonresponse follow-up, and produced the data files and tabulations of the data. Census also edited the state data submissions, with additional review by NCES.

To reduce response burden, the survey was transmitted with pre-entered prior-year data for items where the data are not expected to change annually—most of Parts A through C, E, and N, or about 20 percent of the survey items. The respondent was requested to review the pre-entered data and update any information that had changed from the previous year. All other data cells were left blank for the respondent to fill in, not update. The Web application required a response of -1 to a numeric item if the respondent could not provide the data. A response was also required to all alpha-numeric items, except items that could legitimately be left blank due to skip patterns. The respondent could not "lock" the data file to signify completion of the survey unless these conditions were met. A zero (0) is a reported response and indicates the state library agency had none of the item. Missing data were imputed. See the section below on "Imputation" for a discussion of the imputation methodology.

An edit check tool, built into the Web application, alerted the respondent to questionable data during the data entry process through interactive "edit check warnings" and through edit check reports which could be viewed on-screen or printed. The edit check program enabled the respondent to submit an edited data file to NCES which usually required little or no follow-up for data problems. The edit check tool includes four types of edits:

1. **Relational edit checks.** This is a data consistency check between related data elements. For example, an edit check message is generated if the state library agency is designated as a federal depository library but does not indicate the type of federal depository library.
2. **Out-of-range edit checks.** This is a comparison of data reported for an item to the "acceptable range" of numeric values. For example, an edit check message is generated if annual circulation transactions per annual library visits is less than 0.5 circulation transactions per visit.
3. **Arithmetic edit checks.** This is an arithmetic check comparing a reported total to the sum of its parts. For example, an edit check message is generated if total operating expenditures is not equal to the sum of its parts (total staff expenditures, collection expenditures, and other operating expenditures).
4. **Blank/zero/invalid edit checks.** This is a check of reported data against acceptable values. For example, an edit check message is generated if book/serial volumes is 0 or blank.

The preliminary data file and draft tables were reviewed by the State Library Agencies Survey Steering Committee, NCES, and Census for data quality. Based on this review, states with questionable data were contacted to request verification or correction of the data.

Imputation

Missing data were imputed using one of 3 methods: the zero rule, the growth rule, or the sum rule. These methods were used in order—the zero rule first, then the growth rule, and finally the sum rule.

- ◆ **The Zero Rule.** If the state did not report a value for FY 2002 and the value is zero for FY 2001, then the value for FY 2002 was set to 0. This rule was applied first, on the assumption that there was no change since FY 2001. The 0 in the prior year could be an imputed value.
- ◆ **The Growth Rule.** If the state did not report a value for FY 2002 and the value for FY 2001 was greater than 0, the growth rate from FY 2001 to FY 2002 was calculated for all states that reported data greater than 0 in both years. The median of the growth rates was then calculated and applied to the state's FY 2001 data to obtain an estimate for FY 2002. The growth rate could be applied to an FY 2001 imputed value. Note: The growth rule looked at values for FY 2001 only, as states that cannot report a particular item tend to have ongoing problems reporting that item, so earlier data were not considered to be useful.
- ◆ **The Sum Rule.** When the details of a total and the total were missing, the details were imputed by the zero rule or the growth rule. The total was then imputed by adding up the details.

The data are identified as either imputed or reported on the survey data file through the use of imputation flags.

Using the Data to Make Comparisons

Missing data were imputed beginning with the FY 99 survey. Users should take into consideration that items which include imputations are not strictly comparable to data prior to FY 99, which include reported data only.

State comparisons should be made with caution because states vary in their fiscal year reporting periods, as indicated above, and may vary in their interpretation of the survey definitions. The District of Columbia, while not a state, is included in the survey. Caution should be used in comparing District of Columbia data with state data.

II. B. Guidelines for Processing the State Library Agencies Survey Data File

Processing the Data File

This is the final data file. The data file is provided in two formats: MS-Access (istla02a.mdb) and ASCII (istla02a.txt).¹ The record layout is provided in appendix A. The ASCII file consists of one record of fixed length for each StLA. The Access file is also one record of fixed length for each StLA, but, due to the record length, the file is split into six tables, as follows:

- *istla02a_part_1* corresponds to survey Parts A to E (see list below);
- *istla02a_part_1_flags* contains the imputation flags and their values for Parts A to E;
- *istla02a_part_2* corresponds to survey Parts F to I (see list below);
- *istla02a_part_2_flags* contains the imputation flags and their values for Parts F to I;
- *istla02a_part_3* corresponds to survey Parts J to N (see list below); and
- *istla02a_part_3_flags* contains the imputation flags and their values for Parts J to N.

¹The Microsoft Access data file has the .mdb extension, and the ASCII data file has the .txt extension.

How to remove imputed values from the data. Every variable that has the possibility of being imputed has a flag. If the value of that flag is “R” (reported) or “E” (reported and adjusted by NCES and Census based on edit follow-up), then the value for the associated variable was reported. If the value of the flag is “Z” (missing value was imputed as zero because FY 2001 value was zero), “G” (missing value imputed through growth rate applied to FY 2001 value), or “T” (missing total value imputed by summing the details), then the value for the associated variable was imputed. To remove all imputed values from the data, the values of variables that have an imputation flag of “Z”, “G”, or “T” should be removed. There are no values for variables that have an imputation flag of “B” (blank field—applies to items 239-245 only).

Do not report a Library for the Blind and Physically Handicapped, a State Center for the Book, or a contract with another library or other entity to provide a service on behalf of the StLA.

Note: An allied operation is an office, bureau, division, center, or other organizational unit or service within an StLA with staff, mission, and resources to provide service not ordinarily considered a state library agency function. It is characterized by having:

(a) a specific mission, which may be a part of the StLA's overall mission statement;

(b) staff assigned for that mission; that staff usually includes professionals other than librarians (such as historians, archivists, curators, etc.) appropriate to its mission;

(c) a high-level manager or supervisor who reports to the StLA chief officer or to a deputy designated by the chief officer;

(d) financial resources clearly identified and managed for the operation.

Note: Do not report the following as allied operations: a Library for the Blind and Physically Handicapped, a State Center for the Book, a law library, or a contract with another library or other entity to provide a service on behalf of the StLA.

040 State archives. This operation is responsible for preserving and servicing noncurrent official records of State organizations and institutions that are of continuing value (1) to the legal and administrative functioning of State government, (2) for the verification and protection of the rights of individuals, and (3) for historical and other research. It usually includes records of antecedent colonial and territorial governments. Materials are stored, arranged, and described so that needed records can be found readily.

041 Primary State legislative research organization. This operation conducts research and gathers, digests, and analyzes information in a close and confidential relationship with members of the State legislature and their staff.

Note: As an allied service, the organization is distinguished from specialized reference service which a state library agency may provide to government and other users by responding to reference questions from legislative personnel, providing information service, furnishing bibliographic and net search results, and instructing and guiding users in conducting their research. At the federal level, the parallel might be the difference between parts of the Library of Congress: (1) the Congressional Research Service, and (2) various reference services and subject divisions of the Library.

042 State history museum/art gallery. This operation collects, preserves, and displays cultural artifacts and/or works of art related to the State's political, social, economic, and cultural history.

043 State records management service. This operation manages the life cycle of the State's own records and records of local government from creation to disposition. Disposition includes the preservation of certain records as well as the disposal of nonessential records.

044 Other allied operation. If any other operations are allied with the StLA, enter Yes for this item.

Appendix C—Survey Instrument (Data Entry Screens and Instructions)

- 045 Specify. If any other operations are allied with the StLA, enter the name of the operation in this item.
3. Enter Yes or No to indicate whether the StLA contracts with a local public library or academic library to serve as a State resource center or State reference/information service center.
- 046 State resource center or State reference/information service center. This is an operation outside the StLA, administered by a local public library or academic library, which provides library materials and information services to libraries and individuals throughout the state. It is administratively separate from the StLA but receives grant or contract funds from the StLA for providing services.
4. Enter Yes or No to indicate whether the StLA is the host institution for, or provides any funding to, a State Center for the Book.
- 047 State Center for the Book. The State Center for the Book is part of the Center for the Book program sponsored by the Library of Congress which promotes books, reading, and literacy, and is hosted or funded by the State.

Part D. Services To Libraries and Systems

Appendix C—Survey Instrument (Data Entry Screens and Instructions)

- 050 Administration of State aid. Includes determining compliance with eligibility criteria and performance standards, overseeing processes through which grant recipients are determined, announcing grant recipients and disbursing funds, monitoring and receiving reports from grant recipients, and other activities involved in the management of financial assistance provided by the State to libraries.

These qualifications may include a master's degree from a graduate program accredited by the American Library Association, another level or type of educational attainment, confirmation of participation in continuing education activities, and/or residency in the State for a specified period.
- 052 Collection of library statistics. Every StLA collects statistics on public libraries and participates in the Federal-State Cooperative System (FSCS) for Public Library Data. Many StLAs collect statistics on institutional and other special libraries. Some StLAs assist in the collection of academic library statistics for the Integrated Postsecondary Education Data System (IPEDS). A few StLAs collect statistics on school library media centers. These data collections usually involve the design and administration of survey instruments as well as data entry and processing and report design and dissemination.
- 053 Consulting services. Individual or small-group contacts to help libraries to attain goals and objectives and to deal with specific needs and problems. Consultants provide guidance on problems of concern to local personnel, assistance in identifying problems not clearly recognized, and identification of opportunities for increased or improved performance to specific groups.

Activities involving bibliographic service centers or utilities, regional systems (federations or cooperatives), consortia, and resource centers, such as identifying libraries believed to own requested materials and/or transmitting interlibrary loan requests in accordance with established protocols or prevailing practices.
- 057 Library legislation preparation/review. Minimally, addresses the governance and financing of the StLA, public library service, and library service to blind and physically handicapped persons and residents of State institutions. It usually permits the types of public library structures, such as municipal, countywide, regional, federated, cooperative, and contractual agreements. It may also provide mandates for StLA functions, other types of libraries (e.g., academic, school), and multitype cooperation.
- 058 Library planning/evaluation/research. Activities involved in designing and assessing library programs and services and studying issues facing libraries. Examples: the PLA planning and role-setting process for public libraries, the TELL IT! evaluation process.
- 059 Literacy program support. Organized efforts to assist individuals with limited language and mathematical skills in developing skills in reading, writing, and computation that enable them to function in society without assistance from others.
- 060 OCLC Group Access Capability (GAC). Use of the Online Computer Library Center (OCLC) system, originally the Ohio College Library Center, by a group of libraries for resource sharing and interlibrary lending (ILL). Group Access Capability (GAC) related activities may include coordinating group profiling, establishing group policies, coordinating ILL protocols within the group, and referring requests outside of a GAC group.
- 061 Preservation/conservation services. Specific measures undertaken for the repair, maintenance, restoration, or protection of library materials, including but not limited to binding and rebinding, materials conversion (to microform for example), deacidification, and lamination.

Appendix C—Survey Instrument (Data Entry Screens and Instructions)

- 062 Reference referral services. Provision of information about or from groups or organizations. A reference referral transaction involves the provision of information about a group or organization and its activities, services or agencies, and calendar. Such a transaction typically requires the determination of the user's need and the appropriate group or organization to meet the need. Such a transaction may require directing the user to persons or organizations external to the library for an answer to a question.
- 063 Retrospective conversion of bibliographic records. Retrospective conversion involves changing bibliographic records from one format, usually cards, to machine-readable form in order to produce or make additions to an automated catalog.
- 064 State standards/guidelines. The StLA may promulgate standards or guidelines that define adequacy, equity, and/or excellence in library service. Standards or guidelines may be quantitative, qualitative, or both. Maintaining standards or following guidelines may be a requirement for receiving State aid and/or LSTA grants.

Note: Main or central outlet, bookmobiles, and other outlets (excluding bookmobiles) are defined in the instructions to question 7. Report total hours open in a typical week for all StLA outlets, regardless of whom they serve, and regardless of whether they are open on a walk-in or referral basis. Exclude data for a local public or academic library serving as a State resource center or State reference/information service center under contract with the StLA. Do not report data for non-StLA outlets, even though the StLA may provide funding or services to such outlets.

A "typical week" is a time that is neither unusually busy nor unusually slow. Avoid holidays, vacation periods, days when unusual events are taking place in the community or in the library. Choose a week in which the library is open its regular hours. Include seven consecutive calendar days from Sunday through Saturday or whenever the library is usually open.

A loan of books or total collections (whether permanent or short-term) to another agency, library, or school does not constitute an StLA outlet inasmuch as it is not administered and staffed by the StLA.

- 082 Main or central outlet. A single unit library or the unit where the principal collections are located and handled. Note: An StLA administrative center which is separate from the principal collections and is not open to users should not be included as an outlet. Note: Forty hours per week is the measure of full-time employment for this survey. FTEs (full-time equivalents) of employees in any category may be computed by taking the number of hours worked per week by all employees in that category and dividing it by 40. Report staff based on the StLA organization chart. A given position (e.g., State Data Coordinator) may be part of administration in one agency, library development in another, and library services in another agency. If an employee provides more than one service, allocate the FTE among appropriate categories.

The agency may be a local, county, state or federal agency. The cultural institution may include museums or other cultural organizations funded by tax dollars. The library does not need to be the initiator of such cooperation.
- 249 Progress in library partnerships with business/community organizations or other entities. Any activity or program that a library, or group of libraries, sponsors with the support or participation of business and community organizations. Civic associations and non-profit cultural organizations, or associations that are not government agencies, should be considered community organizations. Civic associations may include parent-teacher associations, unions and similar organizations. Non-profit cultural organizations may include historical societies, archives or similar organizations.

Appendix D—Imputation Flag Frequencies on State Library Agencies Data File

See appendix A for a description of the variables below. Imputation flags are represented as F_, where “_” is replaced by the data item number. Example: F077 is the flag for data item 077 (TOTHRSWK). The flag definitions are as follows:

- R—Reported.
- E—Reported and adjusted by NCES based on edit follow-up.
- Z—Missing value was imputed as zero because FY 2001 value was zero.
- G—Missing value imputed through growth rate applied to FY 2001 value.
- T—Missing total value imputed by summing the details.
- B—Blank field (reserved for future use).
