

Fire Prevention Measures

- 1) Be careful with open fire!
- 2) Do not empty ashtrays into the paper bin!
- 3) Do not bring inflammable liquids (such as petrol, turpentine) into the room or pour them into drains!
- 4) Do not cover bulbs or neon fluorescent tube with inflammable material!
- 5) Do not leave electric cooking devices (coffee maker, immersion heater, egg cooker, etc.) unattended. Pull the plug before leaving the room!
- 6) A permission (issued by the department *Studentisches Wohnen*) is required to place small stoves, electric heating devices or other electric devices. Electric heating devices must have a distance of at least 0.50 meters from inflammable materials. The distance in radiative direction must be at least 1.00 m.
- 7) You have to report all damages on electric installation and other supply lines to the technical staff or the department *Studentisches Wohnen* immediately!
- 8) Damages must only be repaired by experts! Electric circuits and electric devices may only be repaired by authorized personnel!
- 9) Keep all routes free of hindering and inflammable objects (such as bikes, furniture, paper, cardboard boxes, etc.)!
- 10) Emergency exits must not be blocked! The same applies to circuits and key cabinets (fuse boxes, stopcocks, etc.)!
- 11) Keep fire lanes free of parking cars!
