"navigable waters of the U.S." within RHA jurisdiction (as defined by 33 CFR part 329) in the review area.

- **Complete Table 1 - Required**

NOTE: If the navigable water is not subject to the ebb and flow of the tide or included on the District's list of Section 10 navigable waters list, DO NOT USE THIS FORM TO MAKE THE DETERMINATION. The District must continue to follow the procedure outlined in 33 CFR part 329.14 to make a Section 10 RHA navigability determination.

B. CLEAN WATER ACT (CWA) SECTION 404 DETERMINATION OF JURISDICTION: "waters of the U.S." within CWA jurisdiction (as defined by 33 CFR part 328.3) in the review area. **Check all that apply.**

(a)(1): All waters which are currently used, were used in the past, or may be susceptible to use in interstate or foreign commerce, including all waters which are subject to the ebb and flow of the tide. (Traditional Navigable Waters (TNWs))

- **Complete Table 1 - Required**

This AJD includes a case-specific (a)(1) TNW (Section 404 navigable-in-fact) determination on a water that has not previously been designated as such. Documentation required for this case-specific (a)(1) TNW determination is attached.

(a)(2): All interstate waters, including interstate wetlands.

- **Complete Table 2 - Required**

(a)(3): The territorial seas.

- **Complete Table 4 - Required**

(a)(5): All tributaries, as defined in 33 CFR part 328.3, of waters identified in paragraphs (a)(1)-(a)(3) of 33 CFR part 328.3.

Identify flowpath to (a)(1)-(a)(3) water or attach map identifying the flowpath; explain any breaks or flow through excluded/non-jurisdictional features, etc.
Tributary 1	Perennial	Zekiah Swamp to Potomac River	No	The tributary flows through the northern portion of the site and joins with tributary 3 off site and then the tributaries flow into Zekiah Swamp and then into the Potomac River.
Tributary 2	Perennial	Zekiah Swamp to Potomac River	No	The tributary is located in the north east portion of the site site and flows into tributary 1 off site.
Tributary 3	Perennial	Zekiah Swamp to Potomac River	No	Tributary 3 is located within the middle of the project site. It flows off site where it joins with tributary 1 and flows through Zekiah Swamp into the Potomac River
Tributary 4	Perennial	Zekiah Swamp to Potomac River	No	Tributary 4 flows from the southern portion of the site to connect to tributary 3 near the western portion of the site.
Tributary 5	Perennial	Zekiah Swamp to Potomac River	No	Tributary 5 joins into tributary 4 in the south western portion of the site.

Table 6. (a)(6) Adjacent Waters

(a)(6) Waters Name	(a)(1)-(a)(5) Water Name to which this Water is Adjacent	Rationale for (a)(6) Designation and Additional Discussion. Identify the type of water and how the limits of jurisdiction were established (e.g., wetland, 87 Manual/Regional Supplement); explain how the 100-year floodplain and/or the distance threshold was determined; whether this water extends beyond a threshold; explain if the water is part of a mosaic, etc.
Wetland A	Tributary 1	Wetland A is contiguous along tributary 1. The wetland line was established using the 1987 manual and the use of the Coastal Plain Supplement. The wetland continue offsite.
Wetland B	Tributary 2	Wetland B is contiguous along tributary 2. The wetland line was established using the 1987 manual and the use of the Coastal Plain Supplement. The wetland continues off site and joins into Wetland A when the tributaries meet at the confluence.
Wetland C	Tributary 3	Wetland C is contiguous along tributary 3. The wetland line was established using the 1987 manual and the use of the Coastal Plain Supplement. The wetlands continue off site.
Wetland D	Tributary 4	Wetland D is contiguous along tributary 4. The wetland line was established using the 1987 manual and the use of the Coastal Plain Supplement. Wetland D joins into wetland C when the two tributaries meet.

Wetland E	Swanson Creek	Wetland E is in the headwaters of an unnamed tributary of Swanson Creek which flows into the Patuxent River. The wetland is located within the 100 feet of the 100-year floodplain. The portion of the wetland onsite does extend beyond the 100 feet off the 100-year floodplain but since the onsite wetland continues offsite and meets the distance threshold it has been determined that the entire wetland is jurisdictional.
