### **INTERIM APPROVED JURISDICTIONAL DETERMINATION FORM U.S. Army Corps of Engineers**

This form should be completed by following the instructions provided in the Interim Approved Jurisdictional Determination Form User Manual.

#### **SECTION I: BACKGROUND INFORMATION**

**A. COMPLETION DATE FOR APPROVED JURISDICTIONAL DETERMINATION (AJD):** April 10, 2019

**B. ORM NUMBER IN APPROPRIATE FORMAT (e.g., HQ-2015-00001-SMJ):** NAB-2018-61679

#### **C. PROJECT LOCATION AND BACKGROUND INFORMATION:**

State: MD

County/parish/borough: Dorchester

City: Hurlock

Center coordinates of site (lat/long in degree decimal format): Lat. 38.6714 N, Long. -75.8789 W.

Map(s)/diagram(s) of review area (including map identifying single point of entry (SPOE) watershed and/or potential jurisdictional areas where applicable) is/are:  attached  in report/map titled Geosyntec / Figures 2 titled "Pre-Development Subcatchments and Figure 3 titled Post-Development Subcatchments dated October 2018.

Other sites (e.g., offsite mitigation sites, disposal sites, etc.) are associated with this action and are recorded on a different jurisdictional determination (JD) form. List JD form ID numbers (e.g., HQ-2015-00001-SMJ-1):

#### **D. REVIEW PERFORMED FOR SITE EVALUATION:**

Office (Desk) Determination Only. Date:

Office (Desk) and Field Determination. Office/Desk Dates: March 8, 2019 Field Date(s): April 3, 2019.

#### **SECTION II: DATA SOURCES**

Check all that were used to aid in the determination and attach data/maps to this AJD form and/or references/citations in the administrative record, as appropriate.

Maps, plans, plots or plat submitted by or on behalf of the applicant/consultant. Title/Date: August 23, 2018.

Data sheets prepared/submitted by or on behalf of the applicant/consultant.

Data sheets/delineation report are sufficient for purposes of AJD form. Title/Date: Geosyntec JD Report dated August 23, 2018. The AGCP determination data sheets are dated July 7 to July 17, 2018.

Data sheets/delineation report are not sufficient for purposes of AJD form. Summarize rationale and include information on revised data sheets/delineation report that this AJD form has relied upon:

Revised Title/Date:

Data sheets prepared by the Corps. Title/Date:

Corps navigable waters study. Title/Date:

CorpsMap ORM map layers. Title/Date:

USGS Hydrologic Atlas. Title/Date:

USGS, NHD, or WBD data/maps. Title/Date:

USGS 8, 10 and/or 12 digit HUC maps. HUC number: 020600050303 (12-Digit HUC) Hunting Creek.

USGS maps. Scale & quad name and date: 7.5 Minute Quads / Dorchester County, MD.

USDA NRCS Soil Survey. Citation: Web Soil Survey / Dorchester County, MD at:

<https://websoilsurvey.sc.egov.usda.gov/App/WebSoilSurvey.aspx>.

USFWS National Wetlands Inventory maps. Citation: Wetland Mapper/ Dorchester County, MD at:

<https://www.fws.gov/wetlands/Data/Mapper.html>.

State/Local wetland inventory maps. Citation: MERLIN Mapper at: <http://dnrweb.dnr.state.md.us/MERLIN/>.

FEMA/FIRM maps. Citation:

Photographs:  Aerial. Citation: Google Earth acquired years 1995; 2005; 2007; 2011; 2013; 2015. or  Other.

Citation: Geosyntec photographs at sample plots as contained in the JD submittal dated August 23, 2018.

LiDAR data/maps. Citation:

- Previous JDs. File no. and date of JD letter: NAB-2013-60678 (DO DPW/ OLD BEULAH LANDFILL) dated July 25, 2013.
- Applicable/supporting case law:
- Applicable/supporting scientific literature:
- Other information (please specify): Corps site visit dated April 3, 2019.

**SECTION III: SUMMARY OF FINDINGS**

**Complete ORM "Aquatic Resource Upload Sheet" or Export and Print the Aquatic Resource Water Droplet Screen from ORM for All Waters and Features, Regardless of Jurisdictional Status – Required**

**A. RIVERS AND HARBORS ACT (RHA) SECTION 10 DETERMINATION OF JURISDICTION:**

- "navigable waters of the U.S." within RHA jurisdiction (as defined by 33 CFR part 329) in the review area.
  - **Complete Table 1 - Required**

NOTE: If the navigable water is not subject to the ebb and flow of the tide or included on the District's list of Section 10 navigable waters list, DO NOT USE THIS FORM TO MAKE THE DETERMINATION. The District must continue to follow the procedure outlined in 33 CFR part 329.14 to make a Section 10 RHA navigability determination.

**B. CLEAN WATER ACT (CWA) SECTION 404 DETERMINATION OF JURISDICTION: "waters of the U.S." within CWA jurisdiction (as defined by 33 CFR part 328.3) in the review area. Check all that apply.**

- (a)(1): All waters which are currently used, were used in the past, or may be susceptible to use in interstate or foreign commerce, including all waters which are subject to the ebb and flow of the tide. (Traditional Navigable Waters (TNWs))
  - **Complete Table 1 - Required**
  - This AJD includes a case-specific (a)(1) TNW (Section 404 navigable-in-fact) determination on a water that has not previously been designated as such. Documentation required for this case-specific (a)(1) TNW determination is attached.
- (a)(2): All interstate waters, including interstate wetlands.
  - **Complete Table 2 - Required**
- (a)(3): The territorial seas.
  - **Complete Table 3 - Required**
- (a)(4): All impoundments of waters otherwise identified as waters of the U.S. under 33 CFR part 328.3.
  - **Complete Table 4 - Required**
- (a)(5): All tributaries, as defined in 33 CFR part 328.3, of waters identified in paragraphs (a)(1)-(a)(3) of 33 CFR part 328.3.
  - **Complete Table 5 - Required**
- (a)(6): All waters adjacent to a water identified in paragraphs (a)(1)-(a)(5) of 33 CFR part 328.3, including wetlands, ponds, lakes, oxbows, impoundments, and similar waters.
  - **Complete Table 6 - Required**
  - Bordering/Contiguous.
  - Neighboring:
    - (c)(2)(i): All waters located within 100 feet of the ordinary high water mark (OHWM) of a water identified in paragraphs (a)(1)-(a)(5) of 33 CFR part 328.3.
    - (c)(2)(ii): All waters located within the 100-year floodplain of a water identified in paragraphs (a)(1)-(a)(5) of 33 CFR part 328.3 and not more than 1,500 feet of the OHWM of such water.
    - (c)(2)(iii): All waters located within 1,500 feet of the high tide line of a water identified in paragraphs (a)(1) or (a)(3) of 33 CFR part 328.3, and all waters within 1,500 feet of the OHWM of the Great Lakes.
- (a)(7): All waters identified in 33 CFR 328.3(a)(7)(i)-(v) where they are determined, on a case-specific basis, to have a significant nexus to a water identified in paragraphs (a)(1)-(a)(3) of 33 CFR part 328.3.
  - **Complete Table 7 for the significant nexus determination. Attach a map delineating the SPOE watershed boundary with (a)(7) waters identified in the similarly situated analysis. - Required**
  - Includes water(s) that are geographically and physically adjacent per (a)(6), but are being used for established, normal farming, silviculture, and ranching activities (33 USC Section 1344(f)(1)) and therefore are not adjacent and require a case-specific significant nexus determination.
- (a)(8): All waters located within the 100-year floodplain of a water identified in paragraphs (a)(1)-(a)(3) of 33 CFR part 328.3 not covered by (c)(2)(ii) above and all waters located within 4,000 feet of the high tide line or OHWM of a water identified in paragraphs (a)(1)-(a)(5) of 33 CFR part 328.3 where they are determined on a case-specific basis to have a significant nexus to a water identified in paragraphs (a)(1)-(a)(3) of 33 CFR part 328.3.

- **Complete Table 8 for the watershed boundary v**

Includes water(s) that are geographically adjacent to the watershed boundary and are used for normal farming, silviculture, and ranching activities (33 USC Section 1344(a)(6)), and therefore are not adjacent to the watershed boundary.

**C. NON-WATERS OF THE U.S. FINALLY DETERMINED**

**Check all that apply.**

The review area is comprised entirely of U.S. waters.

Potential-(a)(7) Waters: Waters that are geographically adjacent to the watershed boundary and are used for normal farming, silviculture, and ranching activities (33 CFR part 328.3).

- **Complete Table 9 and (a)(7) waters identified**

Includes water(s) that are geographically adjacent to the watershed boundary and are used for normal farming, silviculture, and ranching activities (33 CFR part 328.3) and require a case-specific significance determination.

Potential-(a)(8) Waters: Waters that are geographically adjacent to the watershed boundary and are used for normal farming, silviculture, and ranching activities (33 CFR part 328.3).

- **Complete Table 9 and (a)(8) waters identified**

Includes water(s) that are geographically adjacent to the watershed boundary and are used for normal farming, silviculture, and ranching activities (33 CFR part 328.3) and require a case-specific significance determination.

Excluded Waters (Non-Waters of U.S. Waters)

- **Complete Table 10 - R**

(b)(1): Waste treatment systems that are not subject to the CWA.

(b)(2): Prior converted cropland.

(b)(3)(i): Ditches with ephemeral flow.

(b)(3)(ii): Ditches with intermittent flow.

(b)(3)(iii): Ditches that do not flow.

(b)(4)(i): Artificially irrigated areas.

(b)(4)(ii): Artificial, constructed irrigation ponds, settling basins, and canals.

(b)(4)(iii): Artificial reflecting ponds.

(b)(4)(iv): Small ornamental water features.

(b)(4)(v): Water-filled depressions excavated for obtaining fill.

(b)(4)(vi): Erosional features, including stream channels, in the definition of tributary, non-wetland, or non-adjacent.

(b)(4)(vii): Puddles.<sup>1</sup>

(b)(5): Groundwater, including surface water.

(b)(6): Stormwater control features.

(b)(7): Wastewater recycling structures, including: groundwater recharge basins; groundwater recharge distributary structures built for reuse of water.

Other non-jurisdictional waters/features that are not excluded waters.

- **Complete Table 11 - R**

**D. ADDITIONAL COMMENTS TO SUPPORT ADDITIONAL DETERMINATIONS**

<sup>1</sup> In many cases these excluded features will be specified by contour on the ADD form, unless specifically requested. Corps Districts may, in case-by-case instances, choose to identify some or all of these features within the review area.

U.S. Army Corps of Engineers. 2010. Regional Supplement to the Corps of Engineers Wetland Delineation Manual: Atlantic and Gulf Coastal Plain Region (Version 2.0), ed. J. S. Wakeley, R. W. Lichvar, and C. V. Noble. ERDC/EL TR-10-20. Vicksburg, MS: U.S. Army Engineer Research and Development Center.

N/A	N/A	N/A	N/A

Table 10. Non-Waters/Excluded Waters and Features

Paragraph (b) Excluded Feature/Water Name	Rationale for Paragraph (b) Excluded Feature/Water and Additional Discussion.
Non-Wetland 1	Non-Wetland 1 feature has resulted in an area that is currently being mined by the county for daily soil cover for the existing landfill. This feature is distinguished from the pocketed non-tidal wetland features Wetland A, B, C, and D in that it is deeper and lacked hydrophytic vegetation indicators. Non-Wetland 1 is characteristic of a deep ripped channel created between the non-tidal wetland pockets that has formed within the mining pit. There is a perimeter berm that encloses the water-filled depression that contains an earthen access lane at top of berm.
Wetland A	Wetland A feature has resulted in an area that is currently being mined by the county for daily soil cover for the existing landfill. Wetland A is a non-tidal wetland pocket that has formed within a closed-depression inside the mining pit. These wetlands are temporarily created incidental to mining activity. No culverted outfalls were observed in the field draining to Gravel Run. There is a perimeter berm that encloses the water-filled depression with earthen access lane at top of berm.
Wetland B	Wetland B feature has resulted in an area that is currently being mined by the county for daily soil cover for the existing landfill. Wetland B is a non-tidal wetland pocket that has formed within a closed-depression inside the mining pit. These wetlands are temporarily created incidental to mining activity. No culverted outfalls were observed in the field draining to Gravel Run. There is a perimeter berm that encloses the water-filled depression with earthen access lane at top of berm.
Wetland C	Wetland C feature has resulted in an area that is currently being mined by the county for daily soil cover for the existing landfill. Wetland C is a non-tidal wetland pocket that has formed within a closed-depression inside the mining pit. These wetlands are temporarily created incidental to mining activity. No culverted outfalls were observed in the field draining to Gravel Run. There is a perimeter berm that encloses the water-filled depression with earthen access lane at top of berm.
Wetland D	Wetland D feature resulted in an area that is currently being mined by the county for daily soil cover for the existing landfill. Wetland D is a non-tidal wetland pocket that has formed within a closed-depression inside the

	mining pit. These wetlands are temporarily created incidental to mining activity. No culverted outfalls were observed in the field draining to Gravel Run. There is a perimeter berm that encloses the water-filled depression with earthen access lane at top of berm.
