

Hurricane Webinar May 5th at 9am EDT

This free one-hour event is geared toward 3rd through 8th grade students, and they're perfect for classrooms and homeschool families.

The National Hurricane Center will be conducting a live webinar from the Hurricane Awareness Tour in New York City about hurricanes that will focus on the job of a meteorologist, the weather hazards that come with hurricanes, and how meteorologists get you the weather information you need before a storm. Participants will have the opportunity to ask forecasters questions. Registration is required.
