NOAA Updates Arctic Future Website

NOAA has updated the Arctic Future website to reflect recent observations and add results in the Arctic Council 2011 **Snow, Water, Ice and Permafrost in the Arctic assessment**. Other topics include: satellites show the Arctic losing summer sea ice for the past 30 years, an increased linkage between the Arctic and mid-latitudes, and glacier melt contributing to sea level rise. Read more at [NOAA's Arctic Future website](#).
