Thanks, Lance.

We appreciate the INRMPs and will be in touch as we make progress on the critical habitat process.

Aloha,
Jenny

Hi Jennifer, Ann Marie

Jacqueline Rice asked that I forward you copies of the current MCB Hawaii INRMP; I have sent it to you via AMRDEC (it is 60Mb). I am currently working on Updating the INRMP that will cover the next 5-year period 2017-2021. In the process of updating our INRMP we will be reviewing and updating the sections on the Hawaiian monk seal and Hawaiian sea turtles.

If you have any questions, please call me.

Hi Lance,

Can you please send a copy of your INRMP to

Jennifer Schultz - at NOAA - jennifer.schultz@noaa.gov
Ann Marie Lauritsen at USFWS - anmarie_lauritsen@fws.gov

Vr,

Jacque

Subject: HAWAII: Green Sea Turtle Critical Habitat Designation

Aloha Jacque-

I have already been in conversation with NOAA about the CH designation for the Green sea turtle. Turtles in general are discussed in our INRMP so we are covered, but I will be beefing up the section in the course of updating our INRMP, which will cover the period 2017-2021. HQMC funded my update in FY15.

Subject: Green Sea Turtle Critical Habitat Designation

Importance: High

All,

One more critical habitat designation.

National Marine Fisheries Service together with US Fish and Wildlife Service are starting the process to designate critical habitat for green sea turtles (they just proposed 11 DPSs for listing under the Endangered Species Act).

NMFS is looking for any data or INRMPS that they should consider when identifying areas important to green turtles and for consideration of excluding any areas where the INRMP provides a benefit to the species. USFWS will be considering the nesting beaches and is focused on Florida, Guam, Hawaii and the CNMI and are looking for data as well.

Please let me know ASAP if you your INRMPS cover green sea turtles or if it does not cover green sea turtles but should.

Vr,

Jacque
