Jennifer and Annmarie,

I was asked to forward sections of Camp Lejeune's Integrated Natural Resources Management Plan (INRMP) that pertain to sea turtle protection and management that would preclude designation of critical habitat for green sea turtles. Camp Lejeune was recently exempted from critical habitat designation (both in-water and on-land), for the loggerhead sea turtle.

Please see the attached sections of Camp Lejeune's INRMP. Let me know if you need anything else or have any questions.

Thanks,  
Craig

Hi John,

Can someone please send a copy of the Camp Lejeune INRMP, or maybe just the applicable sections, to

Jennifer Schultz - at NOAA - [jennifer.schultz@noaa.gov](mailto:jennifer.schultz@noaa.gov)

Ann Marie Lauritsen at USFWS - [annmarie\\_lauritsen@fws.gov](mailto:annmarie_lauritsen@fws.gov)

Thank you so much.

Jacque:

Camp Lejeune's INRMP does cover green sea turtles.

Subject: Green Sea Turtle Critical Habitat Designation  
Importance: High

All,

One more critical habitat designation.

National Marine Fisheries Service together with US Fish and Wildlife Service are starting the process to designate critical habitat for green sea turtles (they just proposed 11 DPSS for listing under the Endangered Species Act).

NMFS is looking for any data or INRMPS that they should consider when identifying areas important to green turtles and for consideration of

excluding any areas where the INRMP provides a benefit to the species.  
USFWS will be considering the nesting beaches and is focused on Florida,  
Guam, Hawaii and the CNMI and are looking for data as well.

Please let me know ASAP if you your INRMPs cover green sea turtles or if it  
does not cover green sea turtles but should.

Jacque
