Dear Julie and Dennis,

I am a reporter at Vox Media's The Verge who is writing about the [statement](#) NOAA released Friday that stated that, "The Birmingham National Weather Service's Sunday morning tweet spoke in absolute terms that were inconsistent with probabilities from the best forecast products available at the time." I'd appreciate a response from your agency on reports that Craig McLean said in an [email](#) that he will pursue "the potential violations of our NOAA Administrative Order on Scientific Integrity" as a result of that release.

My Deadline is 12pm EST, and I can be reached via email or at 347-687-5990. I appreciate your time and consideration.

Best regards,

Justine Calma
