Subject: Chris Landsea is on sick leave Re: Thank you for your comments

Chris Landsea is on sick leave. For marine forecasting issues, please contact the Lead TAFB forecaster on duty at 305-229-4424. I am not sure when I will be back in the office.

"The eyewall itself can be seen...nearly touching the sea surface...
The pancake-shaped white patches are places where the wind is
literally scooping water from the sea...This is a place of
unmitigated violence, where bubble-filled water gradually gives
way to spray- and cloud-filled air, with no definite interface that
one could call the ocean surface. It is arguably the worst place
in the world for a ship."
- Kerry Emanuel, 2005
