Not really. I can incorporate comments at any point in the review process prior to publication. It's out for peer review now and may be a couple of more weeks before we get those reviews. After that, it goes to the printing office for a review by a technical editor. Then it gets a policy review.

I'd say we're at least a month out (likely more) before these reviews are finished and we're in a position to post the final publication.

Hi Russ and Adam,

Is there an ETA on this report?

Hi Vamsi,

I'm happy to review the document if Eric does not have time. What is the desired turnaround time?

Hi Eric and Miles,

Would one of you be able to quickly review this report? It doesn't have to be a detailed review; just needs to satisfy the center's requirements. Russ and Adam have done a very good job, and it is also going through USGS review. It can also be an expedited review: just needs to go to Steve for final comments.

Regards,  
Vamsi
