Subject: Initial Review of DOI Shasta Effect Section Comments

All --

I've done a first pass review of the *second* markup of the Shasta Effects Analysis provided by Interior (that is, the one with 529 comments and track changes). I've attached my review with some comment sorting. For many comments that I thought worth some time, I used a notation according to:

Red text is comment on our analysis.

Green highlight are accepted proposed changes or clarifications.

Blue text regards current/past operations in attempt to clarify or provide more info. Will also be highlighted in green if deemed to be included.

Yellow highlight it NMFS action requirement or flagged for deletion before this is distributed externally.

I've also attached a sheet of notes or points to simply facilitate capturing some of their comments. There is *significant* in-text editing, and it often "reads" like a Reclamation document. It's some very heavy-handed editing at places. I've got bullets of points as well as some entertaining excerpts.

Enjoy!

Cathy
