Subject: Re: Shasta RPA Pre-meeting

Garwin,

I have not received any further update from Josh or David, besides Josh's response on Friday (9/8). In that email he said that he would incorporate NMFS's management questions into a new draft plan for Monday (I had assumed 9/11?). I called Josh on Monday but didn't get a response. If Reclamation is planning on presenting a workplan today I haven't seen it.

I'm teleworking today so I'll call in to the meeting.

Thanks,
Evan

Evan,

You're welcome to join Barb and me in person (Maria will be calling in).

What's the status of the Science work plan? Do you think Dave M. and/or Josh will roll something out this morning? Do you have something you can share internally so we have an idea of where Reclamation is going with this?

Maria and Barb,

I finally got ahold of Jeff R. this afternoon and was able to coordinate on several fronts. For tomorrow morning's coordination meeting on the Shasta RPA amendment workshop:

- Reclamation's modelers are scrambling with the modeling and results, but won't be done in time for tomorrow or next Thursday's workshop to have meaningful results or a presentation put together.
- No formal agenda for tomorrow (that I know of), but we will talk about temperature operations to date in 2017, and an update on the modeling effort.

-- Questions we need to address:

++ Because there likely won't be any presentations or visuals, we're wondering if we should switch the workshop to a conference call, to save folks from driving multiple hours.

++ What next? We should still keep the Thursday afternoon block of time to update folks on the current status of temperature management and update on the system-wide modeling, but because it will just be an update, we should schedule an actual workshop #4 for a later date.

Maria can't make it in person, but NMFS can host a webex so we can all review materials together.

Webex info below. Kathryn, please add to the meeting info, and can you please confirm that the projection system in the meeting room can either be (a) plugged in to our laptop or (b) logged in to the webex meeting?
