Subject: Dr. Jacobs' remarks in Huntsville

Matt-

It would seem obvious the need for Dr. Jacobs to give remarks tomorrow to the National Weather Association in Huntsville to address the sharp criticism that the unattributed NOAA statement has received. While nearly the entire NOAA political team (b)(5) agree, I have concerns that not everyone is of the same mind.

Would Sen. Shelby issue a public comment strongly urging Dr. Jacobs to keep his commitment to speak to the weather forecasters in Alabama?

We are scheduled to depart at 4 PM.

Stu
