- 1 “Net totals of the revenues and expenditures” are the ordinary net account totals of 3,044 organizations (47 prefectures, 1,718 municipalities, 23 special wards, 1,189 partial administrative associations and 114 wide-area local public bodies).
- 2 Figures for each item that are less than the given unit are rounded off. Therefore, they do not necessarily add up exactly to the total.
- 3 In FY2011, the revenues and expenditures of ordinary accounts were divided into the regular portion (Overall settlement figures less the Great East Japan Earthquake portion) and the Great East Japan Earthquake portion (Covering the revenues and expenditures related to recovery and reconstruction work and nationwide disaster prevention work).

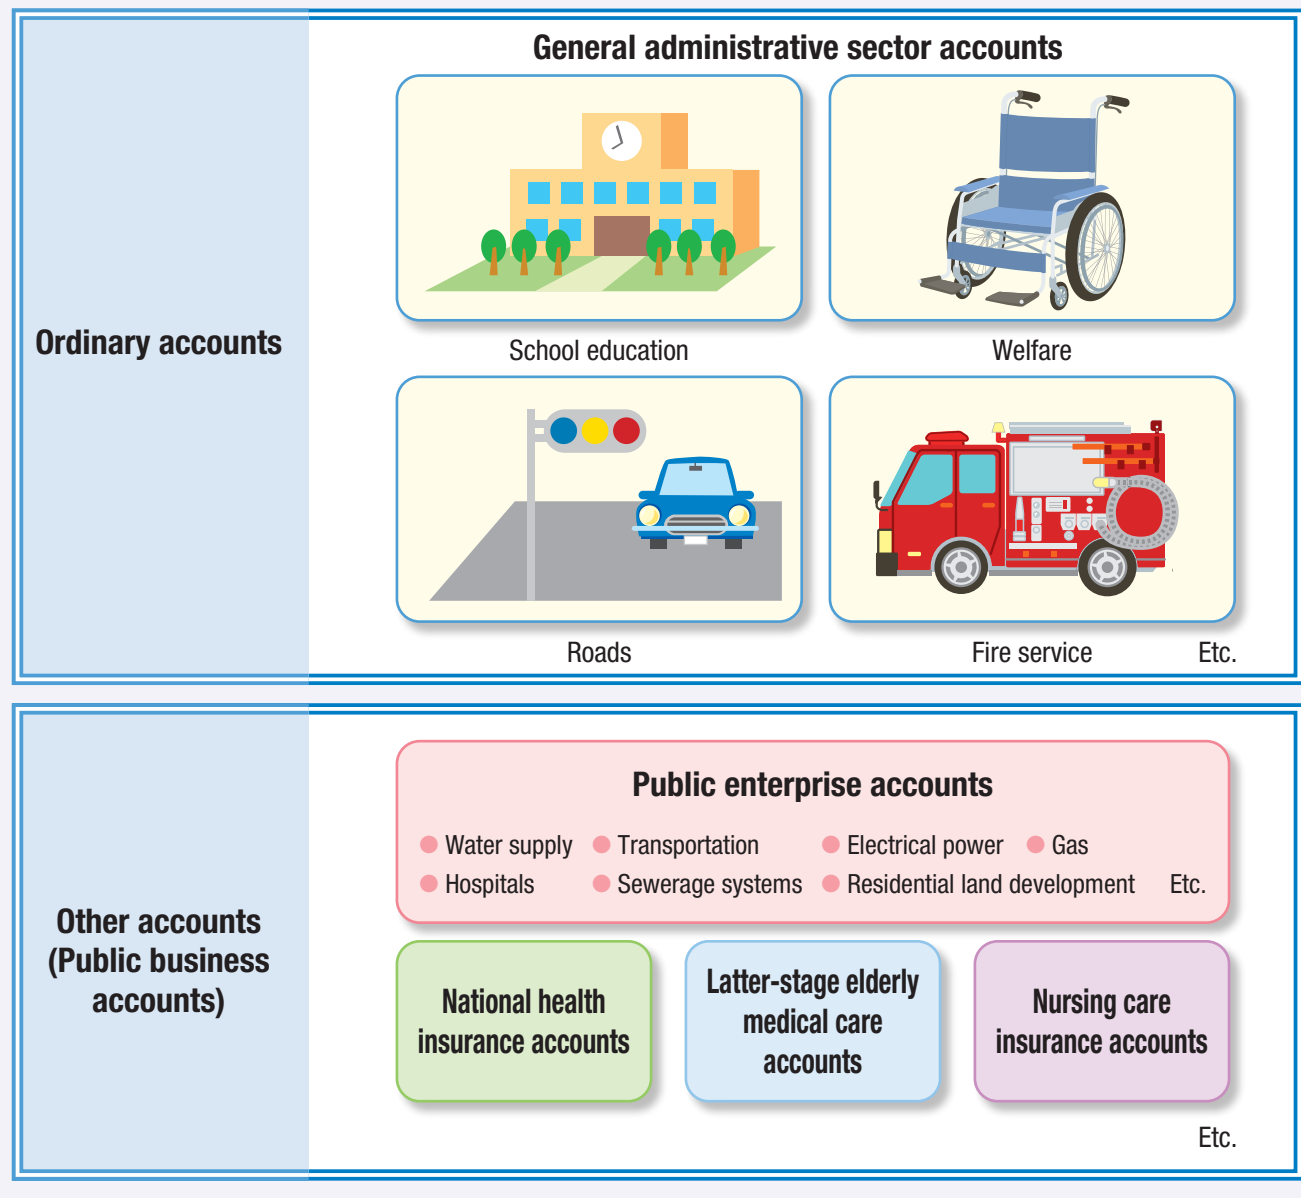

# The Role of Local Public Finance

Prefectures and municipalities (cities, towns, and villages) are the central actors in various areas of public services, including school education, public welfare and health, police and fire services, and public works such as roads and sewage systems, thereby fulfilling a major role in the lives of the citizens of the nation. This brochure describes the status of local public finance (which comprises collectively the finances of individual local governments), the state of settlements for FY2018, and the initiatives of local governments towards sound public finances (mainly the status of the ratios for measuring their financial soundness), with particular attention given to ordinary accounts (Public enterprises, such as water supply, transportation, and hospitals are described in the section on Local Public Enterprises).

## Classification of the Accounts of Local Governments Applied in the Settlement Account Statistics

The accounts of local governments are divided into the general accounts and the special accounts, but classification of these accounts varies between local governments. Therefore, the accounts are classified in a standardized manner into ordinary accounts, which cover the general administrative sector, and other accounts (public business accounts). This makes it possible to clarify the financial condition of local governments as a whole and to make a statistical comparison between local governments.

### Local Government Accounts

## How large is local public finance?

The ratio of expenditure by local governments in gross domestic product (nominal) is 10.9%, about 2.7 times that of the central government.

### Gross Domestic Product (Expenditure, nominal) and Local Public Finance (FY2018)

# The Role of Local Public Finance

## How large is local government expenditure in total public expenditure?

Looking at the breakdown of public expenditure classified by final expenditure entity, local government expenditure accounts for 42.3% of Government final consumption expenditure, and 49.1% of Public gross capital formation. As a final expenditure entity, local governments above the central government and play a major role for the national economy.

### Breakdown of public expenditures

### Trends in public expenditures

## In which areas is the share of local expenditures high?

The below graph shows central and local governments' expenditures by purpose as a share of net total expenditure, classified by final expenditure entity.

The share of local governments' expenditures is higher in areas that are deeply related to daily life, such as public welfare, sanitation, and school education.

### Share of Expenditures by Purpose of Central and Local Governments (final expenditure based)

# FY2018 Settlement Overview

## 1 Revenues

**¥101,345.3 billion** (up ¥22.0 billion, 0.0% year on year)

Regular portion: **¥98,976.3 billion** (up ¥461.1 billion, 0.5% year on year)

Great East Japan Earthquake portion: **¥2,369.0 billion** (down ¥439.1 billion, 15.6% year on year)

The increase of revenues in the regular portion resulted from an increase in Local taxes, etc.

The decrease in revenues in the Great East Japan Earthquake portion resulted from a decrease in National treasury disbursements, etc.

## 2 Expenditures

**¥98,020.6 billion** (up ¥22.2 billion, 0.0% year on year)

Regular portion: **¥95,934.1 billion** (up ¥427.6 billion, 0.4% year on year)

Great East Japan Earthquake portion: **¥2,086.5 billion** (down ¥405.3 billion, 16.3% year on year)

The increases of expenditure in the regular portion resulted from an increase in Ordinary construction work expenses, etc.

The decrease in expenditures in the Great East Japan Earthquake portion resulted from a decrease in Reserves, etc.

## 3 Revenue and Expenditure Settlement

The real balance showed a surplus of ¥1,982.8 billion.

Category	Account Settlement		No. of local governments with a deficit	
	FY2018	FY2017	FY2018	FY2017
Real balance	¥1,982.8 billion	¥2,037.9 billion	2	3
Single year balance	▲¥54.9 billion	¥78.2 billion	1,583	1,600
Real single year balance	¥35.0 billion	▲¥90.8 billion	1,690	1,733

Notes : Real balance refers to the amount calculated by subtracting the revenue resources that should be carried over to the next fiscal year from the income expenditure balance.

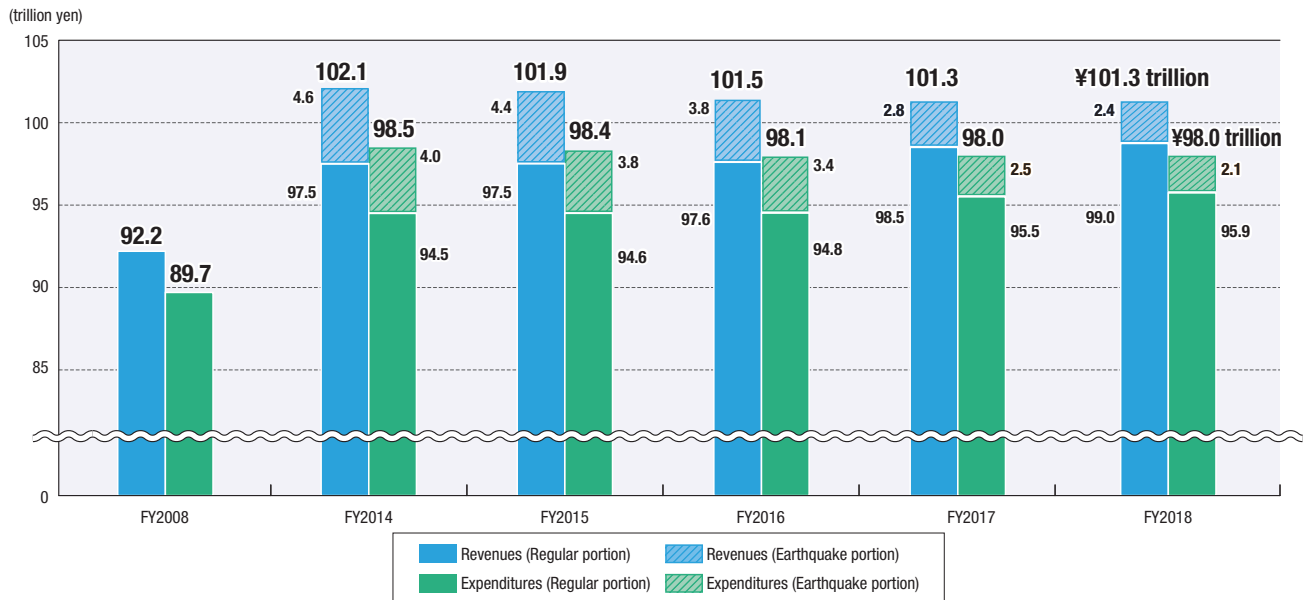

Single year balance refers to the amount calculated by subtracting the real balance of the previous fiscal year from the real balance of the relevant fiscal year.

Real single year balance refers to the amount calculated by adding reserves and advanced redemption of local loans for the public finance adjustment fund to the single year balance and subtracting public finance adjustment fund reversals.

## 4 Trend in Scale of Account Settlement

Both revenues and expenditures of the regular portion have increased for six consecutive years.

## 5 Major Financial Indices

Ordinary balance ratio declined 0.5 percentage points year on year, to 93.0%.

Real debt service ratio declined 0.4 percentage points year on year, to 8.4%.

Category	FY2018	FY2017	Change
Ordinary balance ratio	93.0%	93.5%	▲0.5
Real debt service ratio	8.4%	8.8%	▲0.4

## 6 Outstanding Borrowing Borne by Ordinary Accounts

Outstanding borrowing, which includes outstanding local government borrowing as well as borrowing borne by the special accounts for Local allocation tax and Outstanding public enterprise bonds (borne by ordinary accounts), amounted to ¥193,614.6 billion (down ¥2,023.5 billion, 1.0% year on year).

Category	FY2018	FY2017	Change amount	Change rate
Outstanding local government bonds	¥143,654.9 billion	¥144,288.9 billion	▲¥633.9 billion	▲0.4%
Outstanding local government bonds (excluding Bonds for the extraordinary financial measures)	¥89,675.7 billion	¥91,197.9 billion	▲¥1,522.2 billion	▲1.7%
Outstanding borrowing borne by the special accounts for Local allocation tax	¥31,617.3 billion	¥32,017.3 billion	▲¥400.0 billion	▲1.2%
Outstanding public enterprise bonds (borne by ordinary accounts)	¥18,342.4 billion	¥19,331.9 billion	▲¥989.5 billion	▲5.1%
<b>Total</b>	<b>¥193,614.6 billion</b>	<b>¥195,638.1 billion</b>	<b>▲¥2,023.5 billion</b>	<b>▲1.0%</b>

# Revenues

## What are the revenue sources for local governments' activities?

### 1 Revenue Breakdown

The revenue of local governments consists mainly of Local taxes, Local allocation tax, National treasury disbursements, and Local bonds, in order of share size. Among them, revenue resources which can be spent for any purpose, such as Local taxes and Local allocation tax, are called General revenue resources. It is important for local governments to ensure sufficient General revenue resources in order to handle various administrative needs properly. In FY2018, General revenue resources accounted for 59.3%.

### Composition of Revenues (FY2018 settlement)

- Local transfer tax : Collected as a national tax and transferred to local governments. Includes Local gasoline transfer tax, etc.
- Special local grants : Special local grants in FY2018 include special grants for covering decreases in local tax revenues issued to cover decreases in revenues of local governments in association with the implementation of special tax deductions for housing loans in the individual inhabitant tax.
- Local allocation tax : An intrinsic revenue source of local governments in order to adjust imbalances in tax revenue among local governments and to guarantee revenue sources so that all the local governments across the country can provide a consistent level of public services. (See page.13, "6. Local Allocation Tax.")
- National treasury disbursements : A collective term for the national obligatory share, commissioning expenses, incentives for specific policies, or financial assistance, disbursed from the central government to local governments.
- Local bonds : The debts of local governments to be repaid over a period of time in excess of one fiscal year for which redemption continues for more than one fiscal year.
- Bonds for the extraordinary financial measures : Local bonds issued as an exception to Article 5 of the Local Finance Law to address shortages of General revenue resources of local governments. Proceeds from these bonds can be used for expenses other than investment expenses.

Note : "National treasury disbursements" includes "special grants to measures for traffic safety" and "grants to cities, towns and villages where national institutions are located."

## 2 Revenues in Regular Portion and Great East Japan Earthquake Portion

### Net Total

### Prefectures

### Municipalities

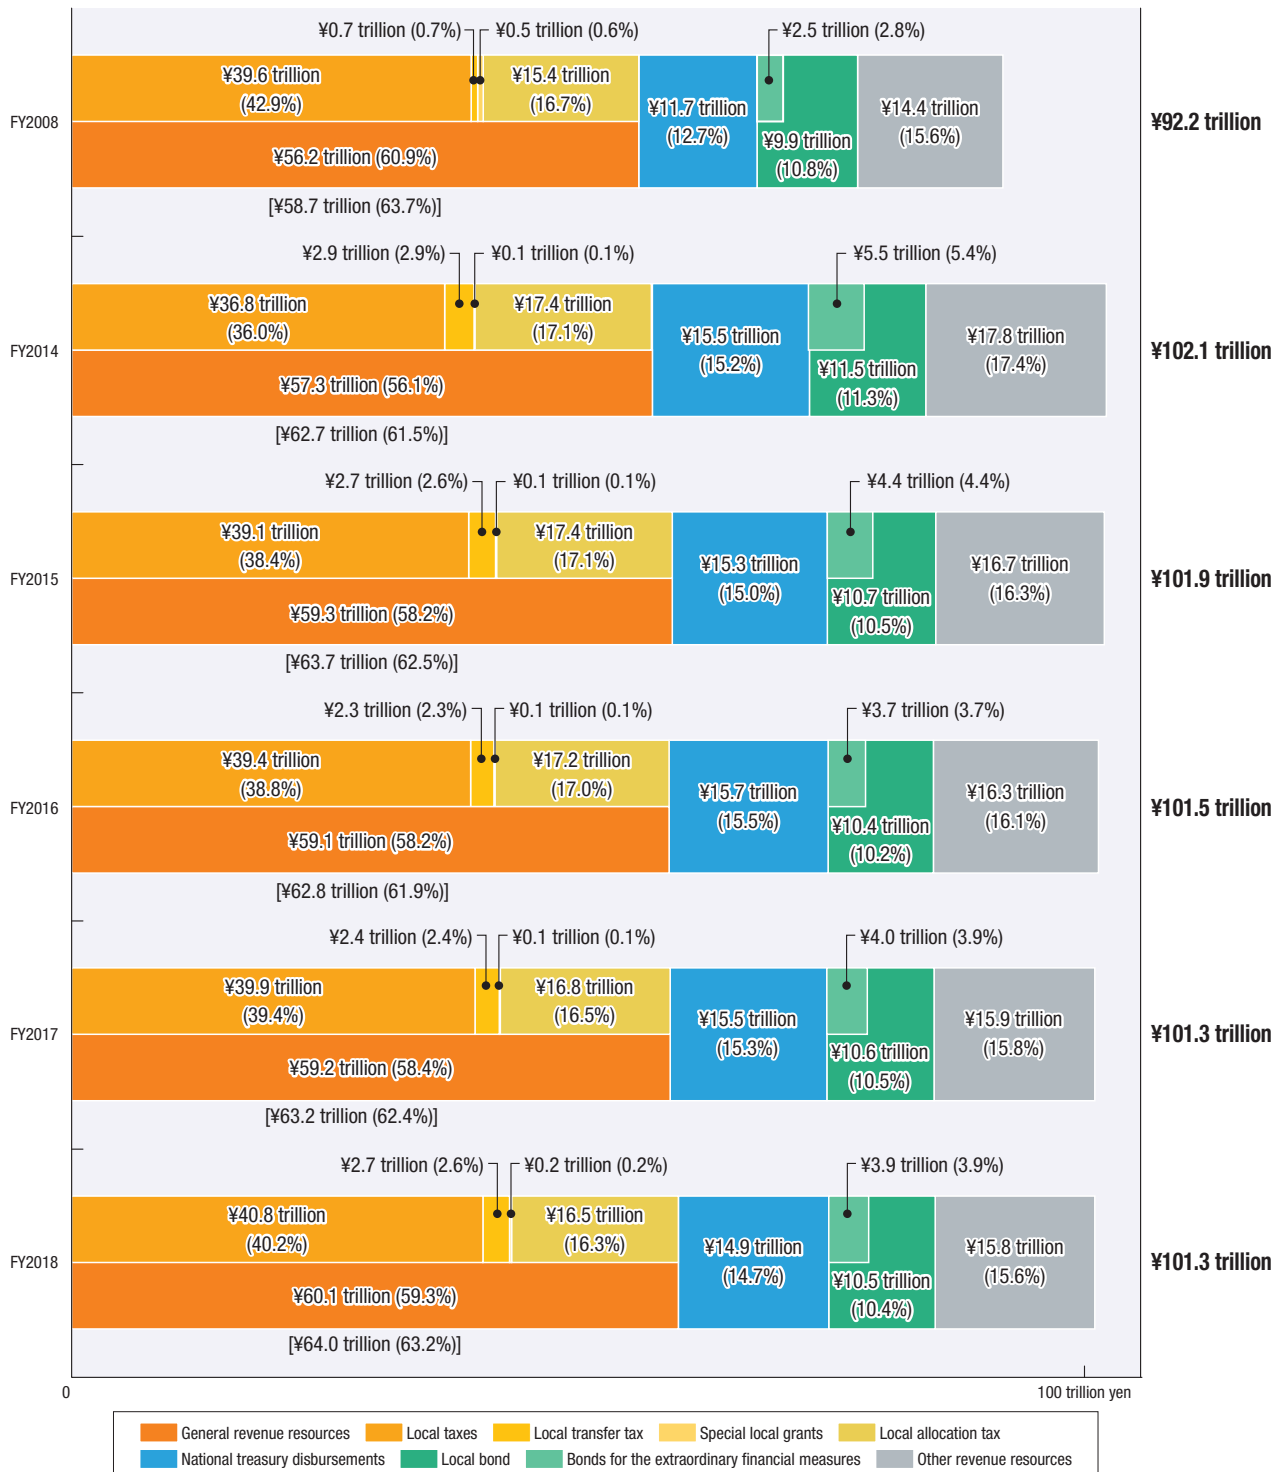

Note: "National treasury disbursements" includes "grants to cities, towns and villages where national institutions are located" and excludes "special grants to measures for traffic safety."

# Revenues

## 3 Revenue Trends

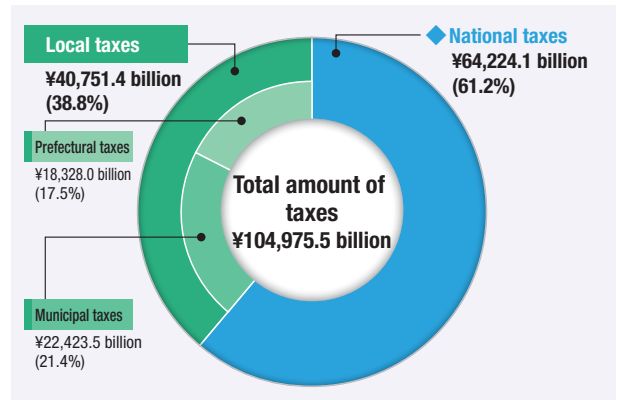

The ratio of general revenue resources turned downward in FY2011, but have been rising since FY2014.

### Net Total

## 4 Ratio of National Taxes and Local Taxes

The total of taxes collected as national and local taxes amounted to ¥104,975.5 billion. Of this amount, national and local taxes accounted for 61.2% and 38.8% respectively.

Note: Municipal taxes collected by the Tokyo Metropolitan Government are included in municipal tax revenue figures, but not included in prefectural tax revenue figures.

## 5 Local taxes

Local taxes consist of prefectural taxes and municipal taxes.

### Composition of Revenue from Prefectural Taxes (FY2018 settlement)

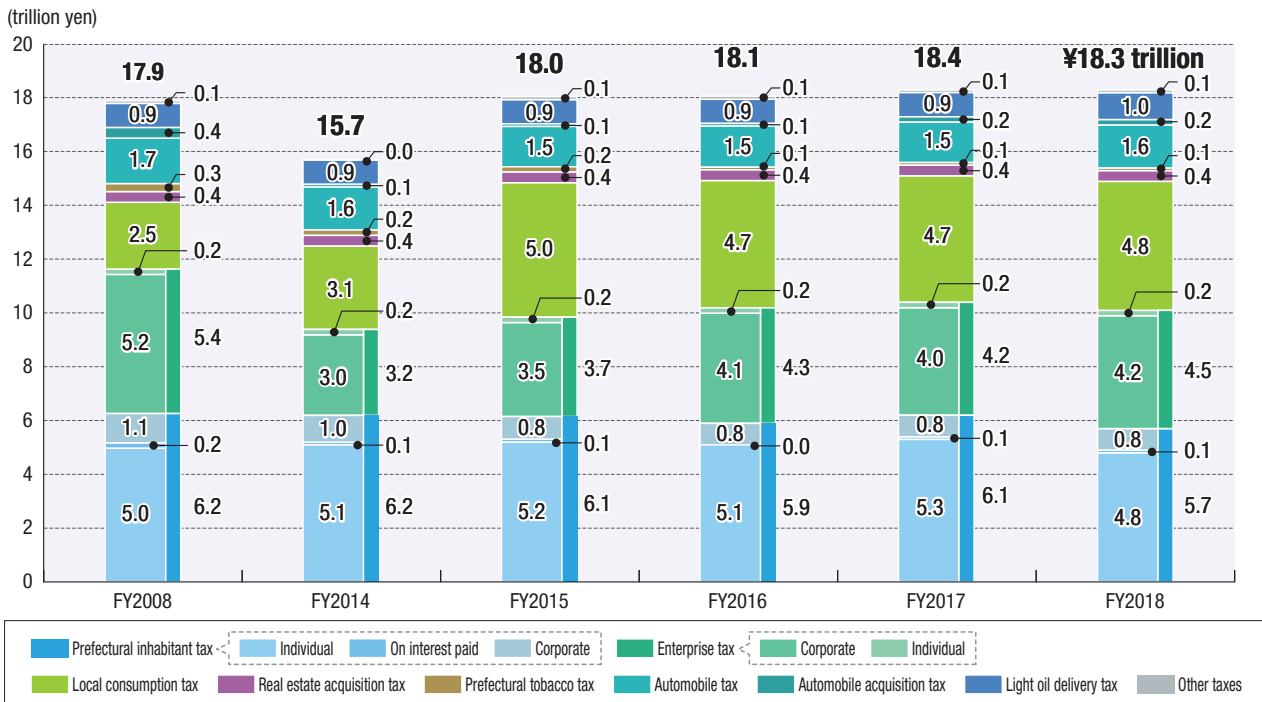

### Composition of Revenue from Municipal Taxes (FY2018 settlement)

# Revenues

Prefectural tax decreased year on year due mainly to the transfer of tax revenue sources to Government-ordinance-designated cities pertaining to review of school personnel paid by prefectures.

## Trends in Prefectural Tax Revenues

Municipal tax revenues have increased for three consecutive years since FY2016.

## Trends in Municipal Tax Revenues

Note: Municipal tax revenue figures include municipal taxes collected by the Tokyo Metropolitan Government.

In order for local governments to provide public services in response to local needs on their own responsibility and at their own discretion, it is necessary to build a less imbalanced and stable local tax system.

Comparing local tax revenue amounts, with the national average set at 100, Tokyo, the highest, was approximately 2.3 times the amount for Nagasaki Prefecture, which was the lowest.

## Index of Per Capita Revenue in Local Tax Revenue (with national average as 100)

Notes : 1. "Max/Min" indicates the value obtained by dividing the maximum value of per-capita tax revenue for each prefecture by the minimum value.

2. Local tax revenue amounts, not including the amount of local corporation special transfer tax, and exclude overassessment and discretionary taxes, etc.

3. Individual inhabitant tax revenue is the total of the prefectural individual inhabitant tax (on a per-capita basis and on an income basis) and the municipal individual inhabitant tax (on a per-capita basis and on an income basis), and excludes overassessment.

4. Revenue from the two corporate taxes is the total of the corporate prefectural inhabitant tax, the corporate municipal inhabitant tax, and the corporate business tax (excluding local corporation special transfer tax) and excludes overassessment, etc.

5. Fixed asset tax revenues include prefectural amounts, and exclude overassessment.

6. Calculations were made in accordance with the basic resident register population as of January 1, 2019.

## 6 Local Allocation Tax

From the perspective of local autonomy, it would be ideal for each local government to ensure the revenue sources necessary for their activities through Local tax revenue collected from their residents. However, there are regional imbalances in tax sources, and many local governments are unable to acquire the necessary tax revenue. Accordingly, the central government collects revenue resources that would essentially be attributable to Local tax revenue and reallocates them as Local allocation tax to local governments that have weaker financial capabilities.

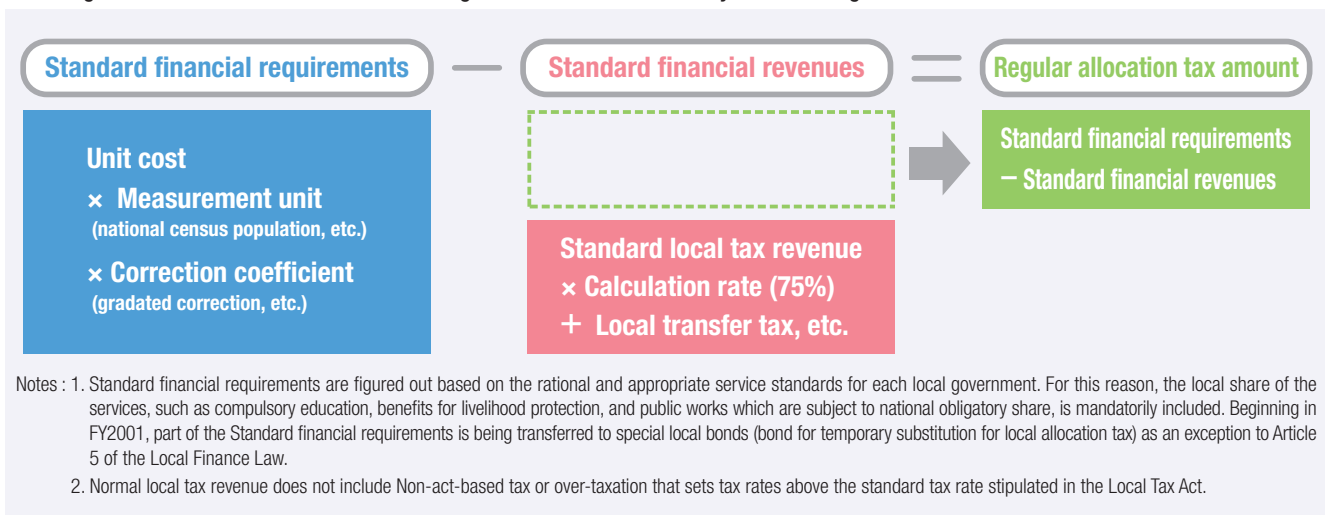

### 1. Determining the total amount of Local allocation tax

The total amount of the Local allocation tax is determined in accordance with estimates of standard revenue and expenditures in local public finance as a whole, based on a fixed percentage for national taxes (in FY2018 33.1% for Income tax and Corporate tax, 50% for Liquor tax, 22.3% for Consumption tax, and the total amount of Local corporate tax).

The total amount of the Local allocation tax in FY2018 was ¥16,548.2 billion, down 1.3% year on year.

### 2. How regular Local allocation taxes are calculated for each local government

The Regular local allocation tax for each local government is calculated by the following formula.

### 3. Function of the Local allocation tax

The function of the Local allocation tax is to adjust imbalances in revenue resources between local governments and to ensure their financial capacity to provide standard public services and basic infrastructure to residents across the country.

The adjustment of revenue resources through Local allocation tax makes the ratios of General revenue resources to the total revenues between local governments practically flat regardless of the size of population.

Ratio of Total Revenue for Municipalities Composed of General Revenue Resources

Note : A "Midsize city" refers to a city with a population of 100,000 or more excluding Government-ordinance-designated cities, Core cities, and Special cities at the time of the effective date, and a "Small city" refers to a city with a population of less than 100,000.

# Expenditures

What are expenses spent on?

## 1 Expenses Classified by Purpose

Classifying the expenses by purpose demonstrates that much of public money is appropriated for Public welfare expenses, Education expenses, and Debt service. In prefectures, Education expenses, Public welfare expenses, and Debt service have the highest shares in that order. In municipalities, Public welfare expenses, General administrative expenses, and Educational expenses account for the largest amounts in that order.

### Composition of Expenditure Classified by Purpose (FY2018 settlement)

General administration : Expenses for general administration, financial management, accounting administration, etc.  
 Public welfare : Expenses for the construction and operation of welfare facilities for children, the elderly, the mentally and physically disabled, etc., and for the implementation of public assistance, etc.  
 Education : Expenses for school education, social education, etc.  
 Civil engineering work : Expenses for the construction and maintenance of public facilities, such as roads, rivers, housing, and parks.  
 Debt service : Expenses for the payment of principal, interest, etc., on debts.

# Expenditures

## 2 Expenditures in Regular Portion and Great East Japan Earthquake Portion (Expenses Classified by Purpose)

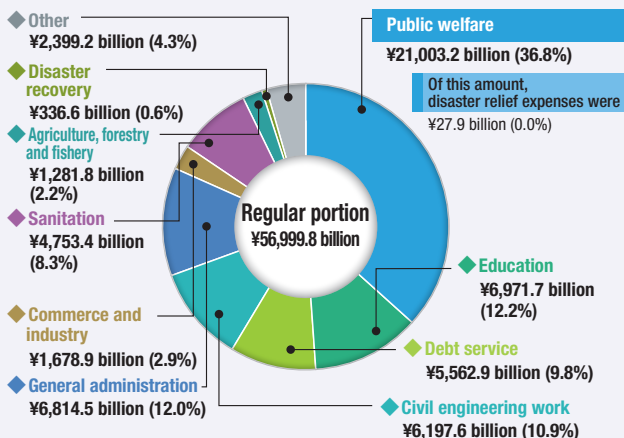

### Net total

### Prefectures

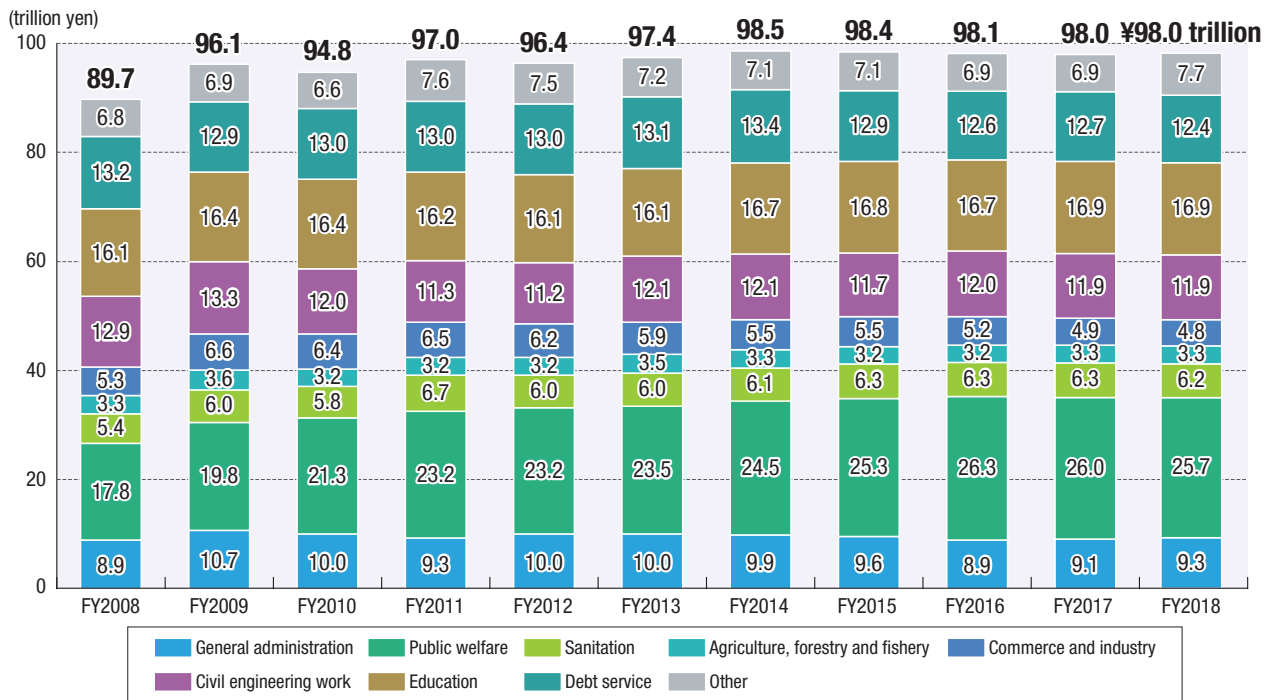

### Municipalities

### 3 Trends in Expenditures Classified by Purpose

Public welfare expenses for FY2018 rose significantly when compared to those for FY2008.

#### Trends in Expenditures Classified by Purpose

#### Trends in Breakdown of Public Welfare Expenses by Purpose

# Expenditures

## Breakdown of Public Welfare Expenses by Purpose

## Breakdown of Educational Expenses by Purpose

## Breakdown of Civil Engineering Work Expenses by Purpose

# What are expenses used for?

## 4 Expenses Classified by Type

Expenses are also classified, according to their economic nature, into “Mandatory expenses” (consisting of Personnel expenses, Social assistance expenses, and Debt service), the payment of which is mandatory and the amount of which is difficult to reduce at the discretion of individual local governments, “Investment expenses” including Ordinary construction work expenses, and “Other expenses,” (such as Goods expenses, Subsidizing expenses, Reserves, Transfers to other accounts).

### Composition of Expenditures Classified by Type (FY2018 settlement)

# Expenditures

## 5 Expenditures in Regular Portion and Great East Japan Earthquake Portion (Expenses Classified by Type)

### Net total

### Prefectures

### Municipalities

## 6 Trends in Expenditures Classified by Type

Social assistance expenses, Investment expenses, Goods expenses, and Transfers to other accounts have been rising.

### Trends in Expenditures Classified by Type

### Trends in Breakdown of Social Assistance Expenses by Purpose

# Expenditures

Personnel expenses in FY2018 remained at the same level as last year.

## Trends in Personnel Expenses

## Breakdown of Personnel Expenses by Item

Ordinary construction work expenses increased year on year due to increased number of Non-subsidized public works. In addition, Civil Engineering Work Expenses account for the largest ratio in the breakdown of Ordinary construction work expenses by purpose.

## Trends in Breakdown of Ordinary Construction Work Expenses Classified by Type

## Breakdown of Ordinary Construction Work Expenses by Purpose

# Expenditures

## Trends in Breakdown of Subsidizing Expenses by Purpose

## Trends in Breakdown of Transfers to Other Accounts

# Flexibility of the Financial Structure

## How financially capable are local governments to respond to local demands?

It is necessary that local governments have financial resources for not only the Mandatory expenses but also for the expenses for projects to properly address challenges caused by changes in the social economy and administrative needs so that they can adequately meet the needs of their residents. The extent to which the resources for such purposes are secured is called the “flexibility of the financial structure.”

### 1 Ordinary Balance Ratio

The FY2018 Ordinary balance ratio declined 0.5 percentage points year on year to 93.0%, staying above 90% for 15 consecutive years.

$$\text{Ordinary balance ratio} = \frac{\text{General revenue resources allotted to personnel expenses, Social assistance expenses, Debt service, etc.}}{\text{Ordinary general revenue resources, etc. (Local tax + Regular local allocation tax, etc.)} + \text{Special exception portion of loans for covering decreases in Local tax revenues} + \text{Bonds for temporary substitution of local allocation tax}} \times 100$$

The Ordinary balance ratio is the proportion of General revenue resources allotted to Ordinary expenses such as Personnel expenses, Social assistance expenses, Debt service and other annually disbursed expenses with regularity to a total amount of Ordinary general revenue resources primarily consisting of Local tax and Regular local allocation tax, Special exception portion of loans for covering decreases in Local tax revenues and Bonds for temporary substitution of Local allocation tax.

## Trends in the Ordinary Balance Ratio

\* Special wards and partial administrative associations, etc., are not included in total and municipalities.

## Breakdown of Ordinary Balance Ratio (Total)

# Flexibility of the Financial Structure

## 2 Real Debt Service Ratio and Debt Service Payment Ratio

Close attention should be paid to the trend of the Debt service, which is the expense required to repay the principal and interest of the debts of local governments and has an especially negative impact on financial flexibility. The Real debt service ratio and the Debt service payment ratio are indices that measure the extent of the burden of the Debt service.

### Trends in the Real Debt Service Ratio

\*Real debt service ratio: The real debt service ratio is an index of the size of the redemption amount of debts (local bonds) and similar expenditure, and represents the cash-flow level.

### Trends in the Debt Service Payment Ratio

\*Debt service payment ratio: The Debt service payment ratio indicates the ratio of general revenue resources allocated for debt service (amount of repayment of the principal and interest on local bonds) in the total amount of General revenue resources. This index is used to measure the flexibility of the financial structure by assessing the degree to which Debt service restricts the freedom of use of General revenue resources.

# Future Financial Burden

## What is the status of debt in local public finance?

### 1 Trends in Outstanding Local Government Bonds and Debt Burden

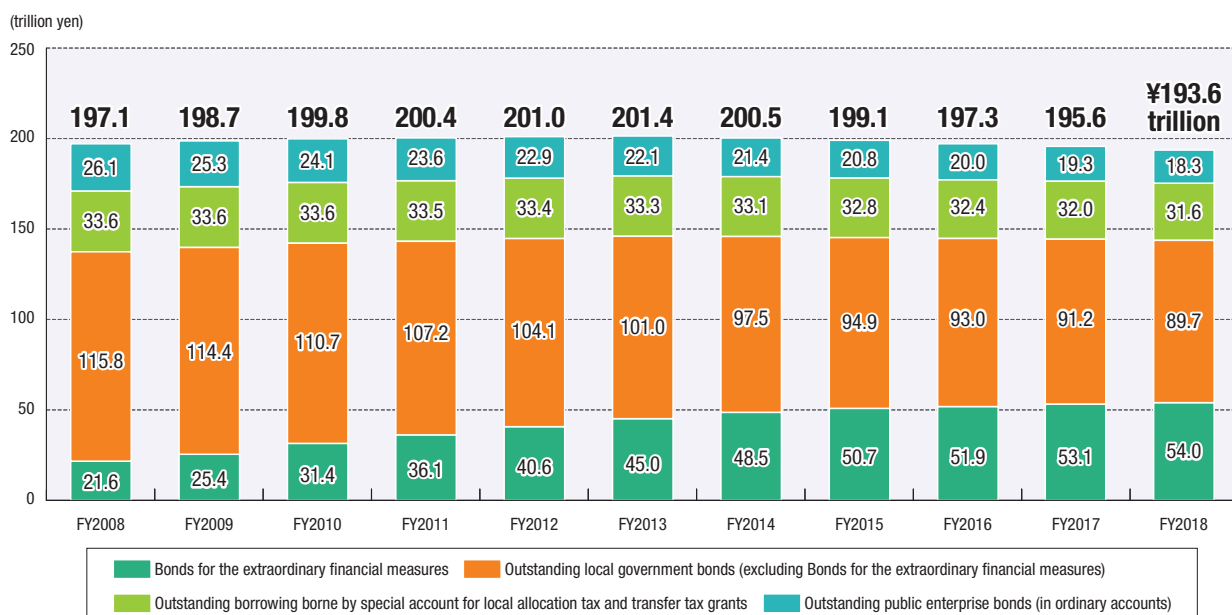

Real future financial burden resulting from Outstanding local government bonds and Debt burden amounted to ¥136,864.2 billion at the end of FY2018, down 0.2% year on year.

Notes : 1. Outstanding local government bonds excludes special fund public investment bonds.  
 2. Debt burden is the amount scheduled to be expended in the following fiscal years.

### 2 Trends in Outstanding Borrowing Borne by the Ordinary Accounts

Outstanding local public finance borrowing, which includes borrowing in the special account for Local allocation tax and Transfer tax for addressing revenue resource shortages, as well as the redemption of Public enterprise bonds borne by the Ordinary accounts, remains at a high level, amounting to ¥194 trillion at the end of FY2018.

Note : Outstanding local government bonds excludes special fund public investment bonds.

# Future Financial Burden

## 3 Trends in Reserves on hand

Reserves on hand at the end of FY2018 was ¥23.3 trillion, an increase of ¥8.0 trillion from the end of FY2008.

Note: Reserves on hand do not include the amount of reserves for Sinking fund to be appropriated for principal and interest for local government bonds to be redeemed in full on maturity.

# Local Public Enterprises

## What is the status of local public enterprises?

### 1 Presence of Local Public Enterprises

Local public enterprises play a major role in improving the standard of living of residents.

Notes : 1. The graph shows the ratio of local public enterprises when the total number of business entities nationwide is set at 100.  
2. Figures for the total number of enterprises nationwide have been compiled from statistical materials of related organizations.

### 2 Number of Businesses Operated by Local Public Enterprises

8,308 businesses are operated by local public enterprises. By type of business, sewerage accounts for the largest ratio, followed, in order, by water supply, hospitals, care services, and residential development.

### 3 Scale of Financial Settlement

The scale of total financial settlement is ¥16,979.6 billion. By type of business, sewerage accounts for the largest ratio, followed, in order, by hospitals, total water supply, transportation, and residential development.

# Local Public Enterprises

## 4 Financial Status

Local public enterprises had a surplus of ¥1,260.0 billion. By type of business, water supply, electricity, gas and sewages showed a surplus.

### Trends in the Financial Status of Local Public Enterprises

# Impact of Great East Japan Earthquake

## 1 Settlement of Disaster-Struck Organizations

### 1. Specified Disaster-Struck Prefectures

In FY2018, the total revenues of the nine specified disaster-struck prefectures amounted to ¥9,567.7 billion, decreasing by ¥427.2 billion year on year, or 4.3% (1.0% national decrease). Total expenditures of the entities amounted to ¥9,214.8 billion, decreasing by ¥371.6 billion year on year, or 3.9% (1.0% national decrease).

\* Specified disaster-struck prefectures : Prefectures stipulated in Article 2, Paragraph 2 of the Act on Special Public Finance Support and Assistance to Deal with the Great East Japan Earthquake (Act No. 40 of 2011). These prefectures are Aomori, Iwate, Miyagi, Fukushima, Ibaraki, Tochigi, Chiba, Niigata, and Nagano prefectures.

### Revenues

### Expenditures Classified by Purpose

### Expenditures Classified by Type

# Impact of Great East Japan Earthquake

## 2. Specified Disaster-Struck Municipalities

In FY2018, the total revenues of the 227 municipalities designated as specified disaster-struck municipalities amounted to ¥7,489.2 billion, decreasing by ¥164.5 billion year on year, or 2.1% (0.1% national increase). Total expenditures of the entities amounted to ¥7,139.5 billion, decreasing by ¥126.5 billion year on year, or 1.7% (0.1% national increase).

\* Specified disaster-struck municipalities : Municipalities designated in Appended Table 1 and those designated in Appended Tables 2 and 3 that are other than specified disaster-struck local public bodies of the Japanese government ordinance (No. 127, 2011) concerning Article 2, Paragraphs 2 and 3 of the Act on Special Public Finance Support and Assistance to Deal with the Great East Japan Earthquake. (A total of 227 organizations in 11 prefectures, including, 33 organizations within Iwate Prefecture, 35 organizations within Miyagi prefecture, and 59 organizations within Fukushima prefecture.)

### Revenues

### Expenditures Classified by Purpose

### Expenditures Classified by Type

## 2 Financial Status of Businesses of Local Public Enterprises of Disaster-Struck Organizations

Total revenues and expenditures of local enterprises of disaster-struck organizations amounted to a surplus of ¥98.5 billion, an increase of ¥10.2 billion year on year, or 11.6%. There were 814 businesses with surpluses, or 90.6% of all businesses, while 84 businesses had deficits, or 9.4%.

\* Local enterprises of disaster-struck organizations : Nine prefectures stipulated in Article 2, Paragraph 2 of the Act on Special Public Finance Support and Assistance to Deal with the Great East Japan Earthquake, and 178 municipalities stipulated in Appended Table 1 of the Japanese government ordinance concerning Article 2, Paragraphs 2 and 3 of the Act on Special Public Finance Support and Assistance to Deal with the Great East Japan Earthquake (including some labor unions joined by the above bodies).

### Financial Status of Businesses of Local Enterprises of Disaster-Struck Organizations

### Settlements by Businesses of Local Enterprises of Disaster-Struck Organizations

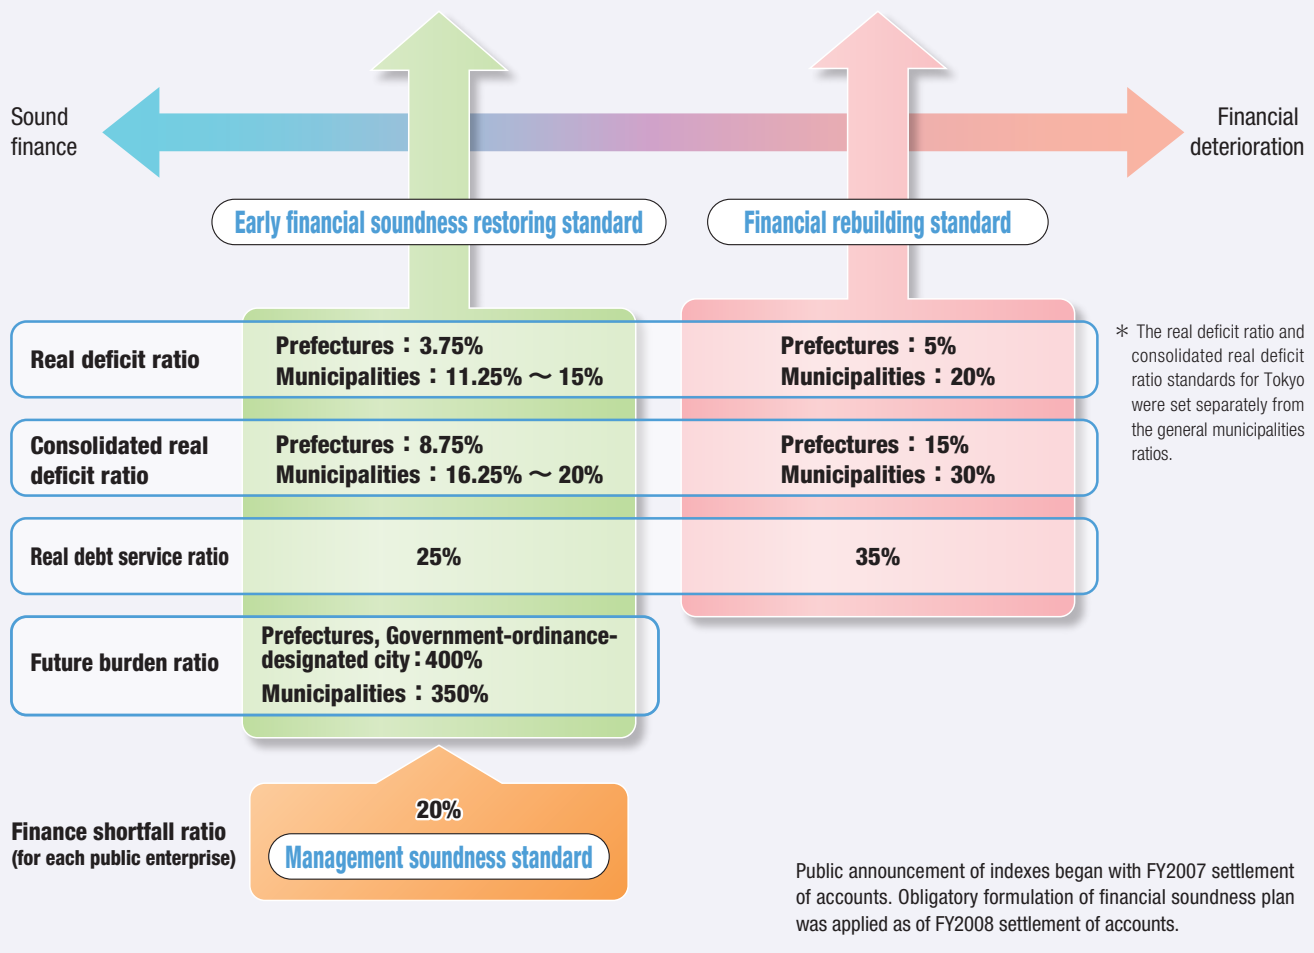

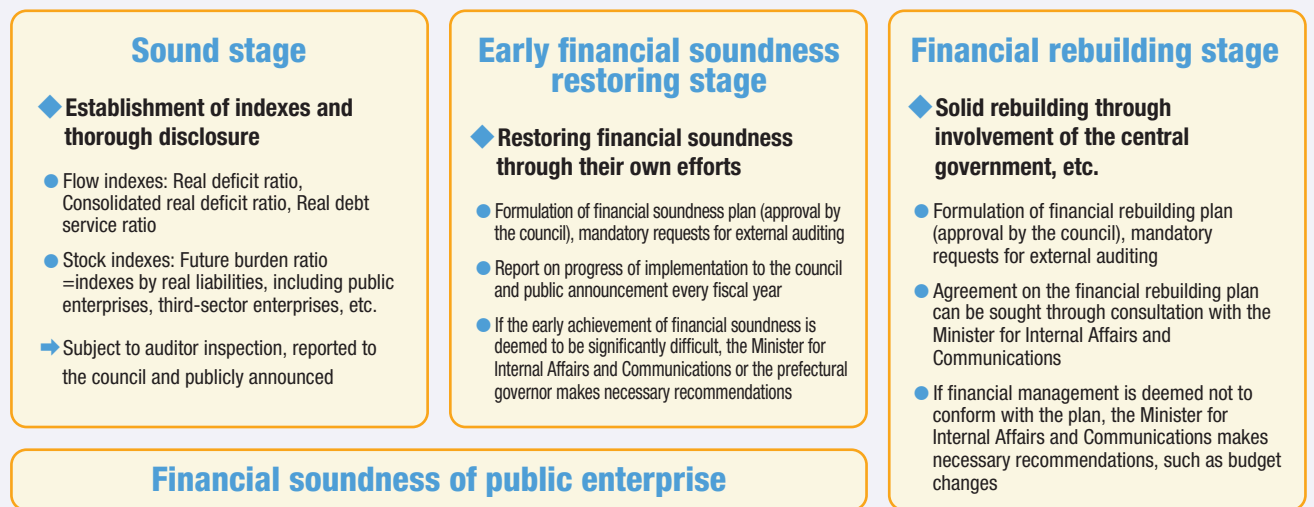

# Promotion of the Soundness of Local Public Finance

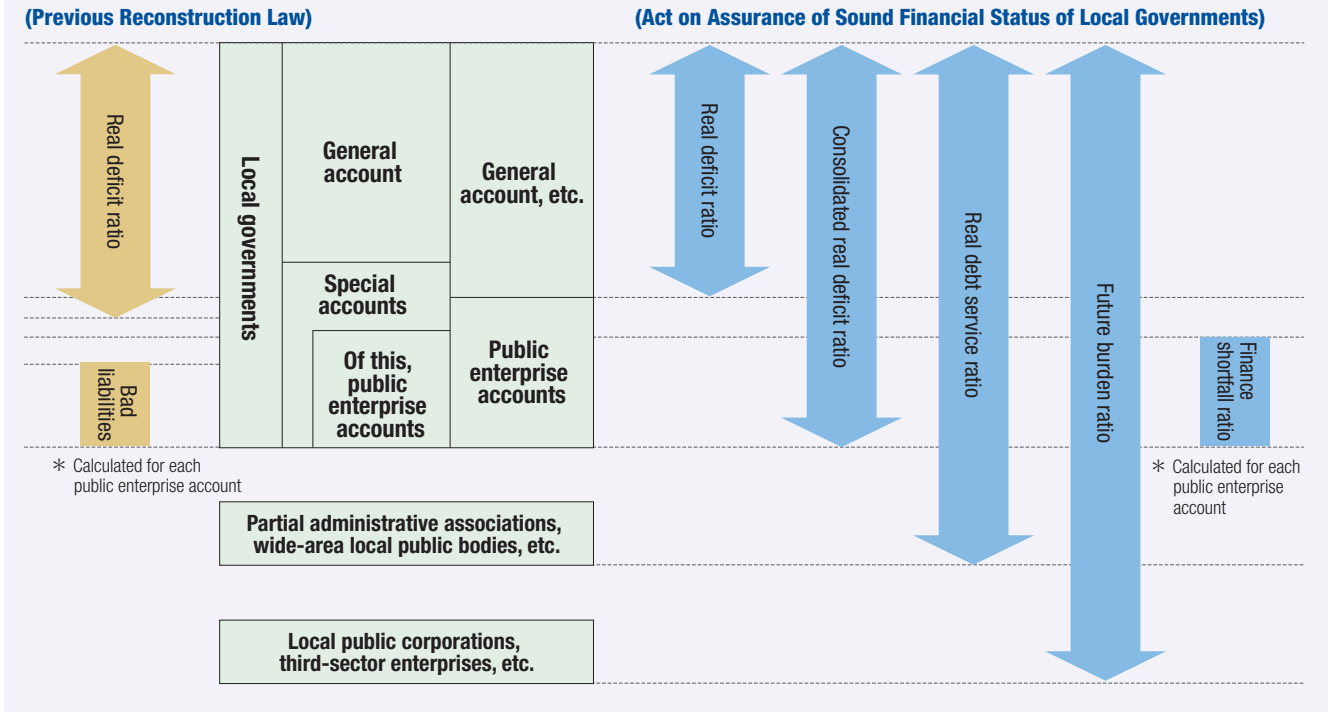

## 1 Overview of the Act on Assurance of Sound Financial Status of Local Governments

A number of drawbacks were pointed out with the conventional system of financial reconstruction of local governments, including the lack of a legal obligation to disclose comprehensible financial information and of rules for early warning. In response, the Act on Assurance of Sound Financial Status of Local Governments was enacted and has been in force since April 2009. The act establishes new indexes and requires local governments to disclose them thoroughly, aiming to quickly achieve financial soundness or rebuild.

### Outline of the Act on Assurance of Sound Financial Status of Local Governments

## Targets of the Ratio for Measuring Financial Soundness

## 2 Status of the Ratios for Measuring Financial Soundness and Financial Shortfall Ratio

### Real Deficit Ratio

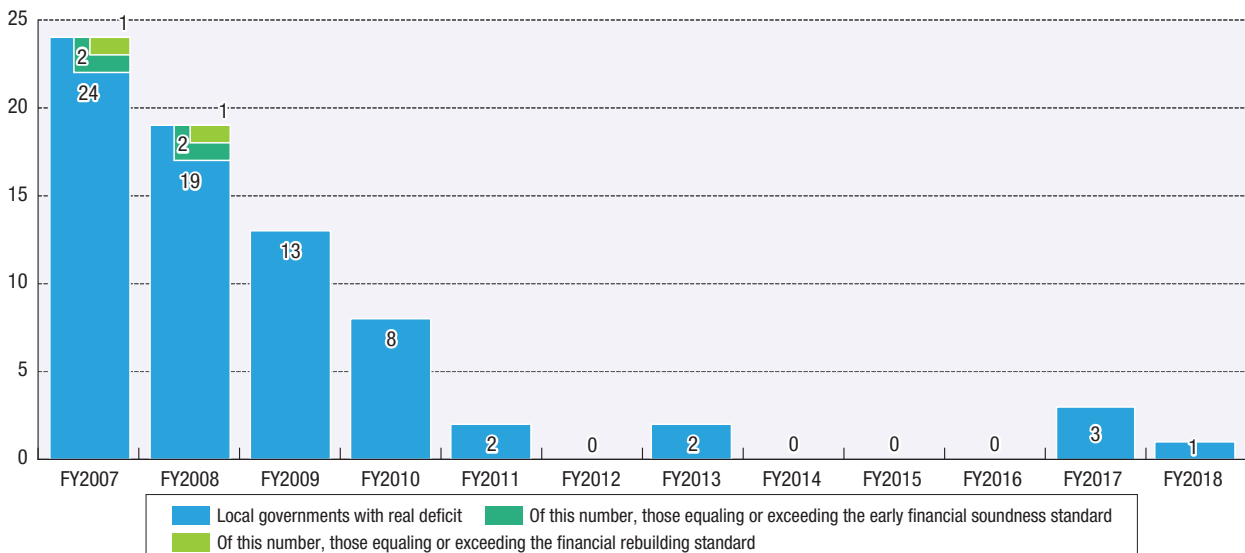

The following graph shows the trend in the number of local governments with a real deficit.

Based on FY2018 account settlements, one local government—one city/ward— had a real deficit. Its Real deficit ratio did not exceed the Early financial soundness restoring standards.

$$\text{Real deficit ratio} = \frac{\text{Real deficit amount of real account, etc.}}{\text{Standard financial scale}}$$

The Real deficit ratio is an index of the deficit level of the general account, etc. of local governments offering welfare, education, community-building, and other services, and represents the extent to which financial administration has worsened.

(No. of local governments)

# Promotion of the Soundness of Local Public Finance

## Consolidated Real Deficit Ratio

The following graph shows the trend in the number of local governments with a consolidated real deficit.

Based on FY2018 account settlements, none of them had a consolidated real deficit (i.e., a consolidated Real deficit ratio that exceeds 0%).

$$\text{Consolidated real deficit ratio} = \frac{\text{Consolidated real deficit}}{\text{Standard financial scale}}$$

The consolidated real deficit ratio is an index of the deficit level for a local governments as a whole by taking the sum of the deficits and surpluses of all accounts, and represents the extent to which financial administration has worsened for a local government as a whole.

(No. of local governments)

## Real Debt Service Ratio

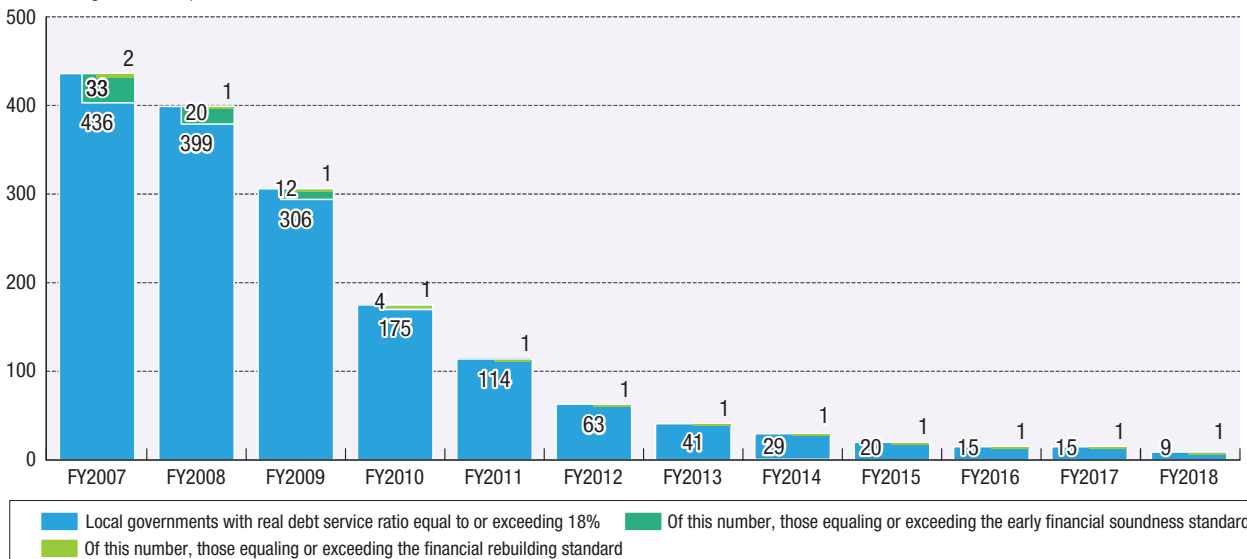

The following graph shows the trend in the number of local governments with a Real debt service ratio equal to or exceeding 18%. Based on FY2018 account settlements, there was one local municipal government with a Real debt service ratio equal to or exceeding the financial rebuilding standard.

$$\text{Real debt service ratio (3-year average)} = \frac{\begin{aligned} &(\text{Redemption of principal and interest of local bonds} + \text{quasi-redemption of principal and interest}) \\ &- (\text{special revenue resources} + \text{amount included in standard financial requirements pertaining to} \\ &\text{redemption and quasi-redemption of principal and interest}) \end{aligned}}{\text{Standard financial scale} - (\text{amount included in standard financial requirements pertaining to} \\ \text{redemption and quasi-redemption of principal and payments})}$$

The real debt service ratio is an index of the size of the redemption amount of debts (local bonds) and similar expenditure, and represents the cash-flow level.

\* Local governments with a Real debt service ratio equal to or exceeding 18% require the approval of the Minister of Internal Affairs and Communications, etc., to issue local government bonds.

(No. of local governments)

## Future Burden Ratio

The following graph shows the trend in the number of local governments with a Future burden ratio equal to or exceeding the Early financial soundness restoring standard. Based on FY2018 account settlements, there was one local municipal government with a Future burden ratio equal to or exceeding the Early financial soundness restoring standard.

$$\text{Future burden ratio} = \frac{\text{Future burden amount} - (\text{amount of appropriable funds} + \text{estimated amount of special revenue source} + \text{amount expected to be included in standard financial requirements pertaining to outstanding local government bonds, etc.})}{\text{Standard financial scale} - (\text{amount included in standard financial requirements pertaining to redemption of principal and interest and quasi-redemption of principal and interest})}$$

The Future burden ratio is an index of the current outstanding balance of burden, including that of debts (local bonds) of the general account, etc. as well as other likely future payments, and represents the extent to which finances may be squeezed in the future. No Financial rebuilding standard is established for the Future burden ratio.

(No. of local governments)

## Financial Shortfall Ratio

The following graph shows the trend in the number of local public enterprises with a financial shortfall.

Based on FY2018 account settlements, there were 86 local public enterprises with a financial shortfall (i.e., with a Financial shortfall ratio that exceeds 0%). Of these, 7 local public enterprises had a Financial shortfall ratio that equals or exceeds the Management soundness standard.

$$\text{Financial shortfall ratio} = \frac{\text{Deficit of funds}}{\text{Size of business}}$$

The Financial shortfall ratio is an index of the deficit of funds of public enterprises compared to the size of their income, which shows the size of business of local public enterprises, and represents the extent to which financial health has worsened.

(Number of enterprises)
