NEWS FOR SRP AGRICULTURAL & OTHER URBAN SHAREHOLDERS | SUMMER 2024

Wildfire Prevention

Arizona's forests offer ample recreation opportunities to escape the Valley's heat. But with wildfire season in full force, it's important to be aware of how you can prevent wildfires while enjoying the great outdoors. Do your part this summer by incorporating these tips into your vacation planning:

1. Do not drag chains or other equipment on the ground.
2. Never leave a campfire unattended and check Forest Service fire restrictions before lighting a fire.
3. Check your tires before a road trip; rims from a flat tire can strike pavement and cause sparks.
4. Never park on dry grass or vegetation.
5. Sign up for emergency notifications in the area in which you're recreating through Smart 911.

Receiving email alerts?

Stay informed and in control with SRP's email alert system, which offers a convenient way to receive updates on water delivery schedules, facility notices and billing reminders. You have the flexibility to add multiple email addresses, ensuring that all relevant parties are promptly notified. This service is designed to keep you well informed and help avoid any missed water deliveries. To manage your alerts, log in to your SRP My Account™ profile at srp.net/myaccount.

SRP
Reservoirs at
90%

As of June 12, 2024, the SRP reservoir system was **90%** full at **2,051,609** acre-feet in storage. A year ago, the total system was **98%** full. On the Salt River system, we have four reservoirs: Roosevelt, Apache, Canyon and Saguaro lakes. On the Verde River system, we have two reservoirs: Horseshoe and Bartlett.

Stay up to date on reservoir levels daily at watershedconnection.com.

Data is accurate as of June 12, 2024.

Right Tree, Right Place

SRP has partnered with cities throughout the Valley to remove and replace trees that are encroaching on power lines. For every tree that must be removed for safety reasons, two to three new trees are planted along roadways or at nearby parks, schools or neighborhoods. More than 1,200 trees have been removed, and more than 4,000 new trees have been planted in the Valley since the program started in 2018. If customers see trees in their area growing too close to overhead power lines, they should call SRP at **(602) 236-8888**. Before digging underground, residents are instructed to call Arizona **811** to locate underground power lines.

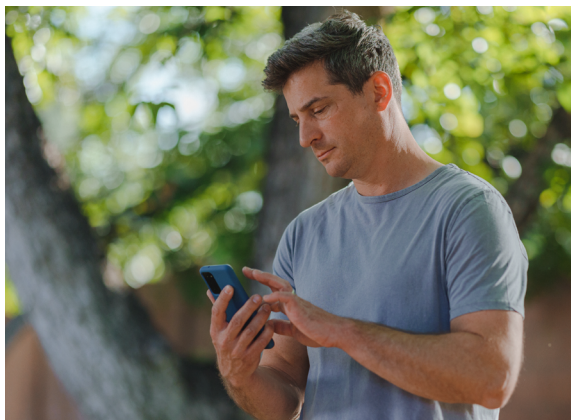

Did you know?

SRP Irrigation offers free educational appointments with a Field Services Liaison to help you become an irrigation expert. Liaisons have extensive knowledge of irrigation and are available to meet with you in person or virtually. A Field Services Liaison can help you learn how to operate the private system, recommend a routine maintenance cycle for the private system, help identify system issues and offer solutions for improvements or repairs, and more! To schedule an appointment, give us a call at **(602) 236-3333**.
