

Means of information dissemination on GNSS

Growth of business community interest to the navigation technologies in Russia

Association
GLONASS/GNSS – Forum

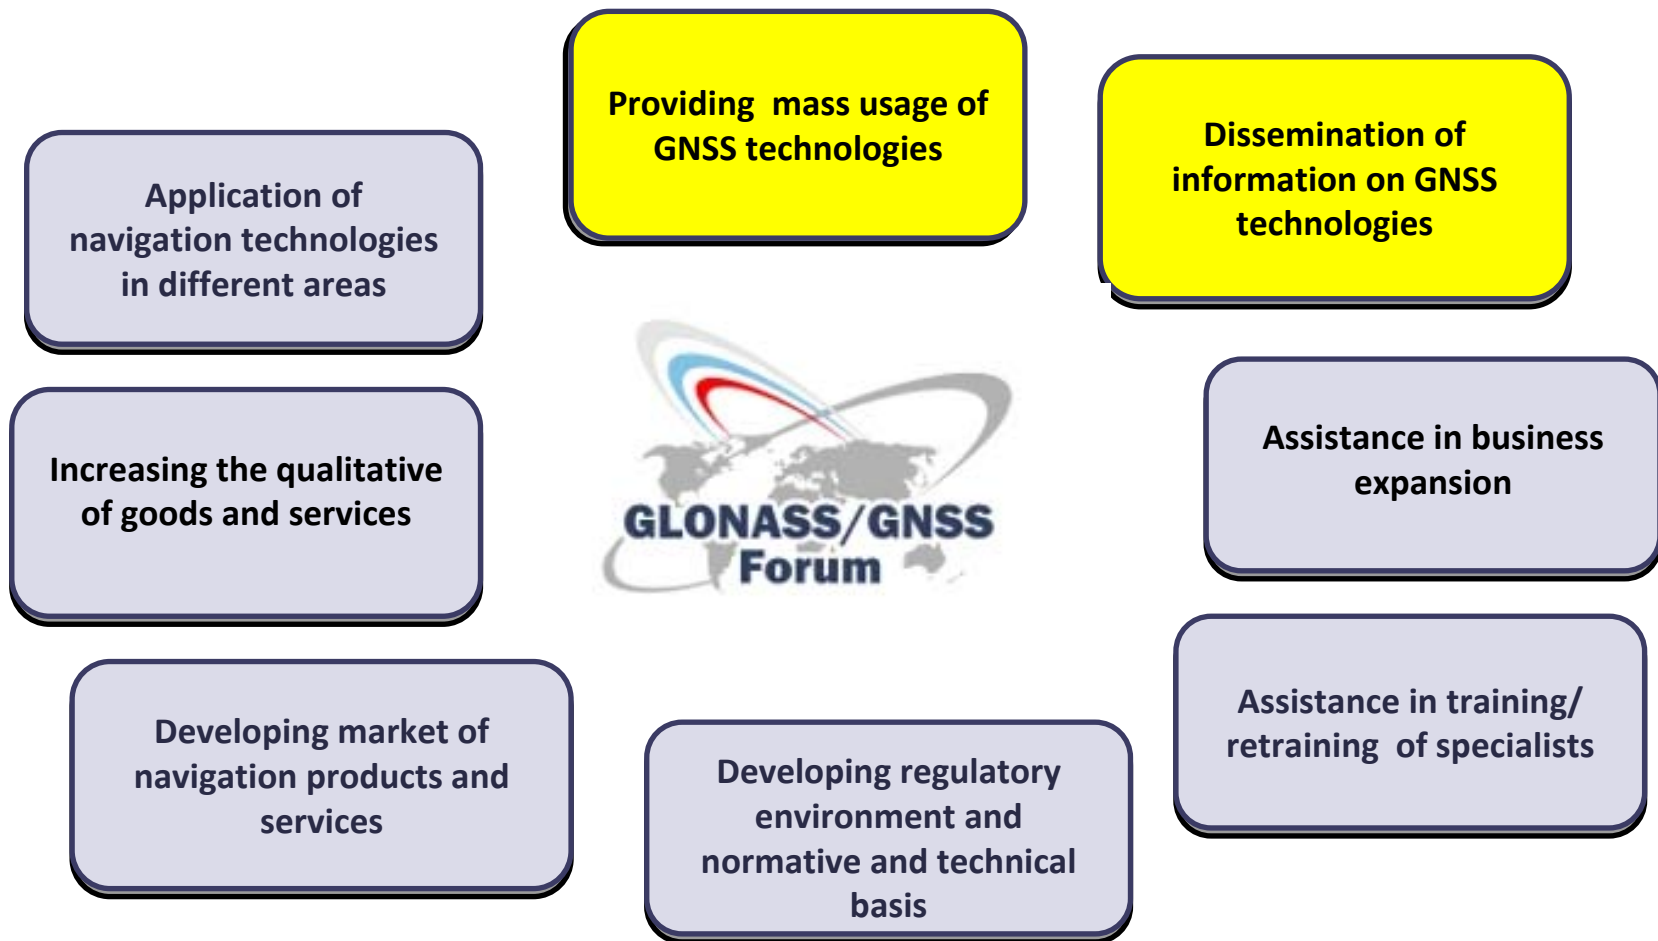

Association unites about 60 enterprises, growth for the year 10%

International Committee on GNSS
October 19, 2010 Turin, Italy

Primary areas of association activity

Association
GLONASS/GNSS – Forum

Our activities

Means of information dissemination

- International events (Calendar of GNSS-related events is available on our web site www.aggf.ru)
- Russian inter-regional conferences
- Practical workshops
- Thematic panel discussions
- Sessions in the frame of branch events
- International and regional exhibitions

We actively study international experience about usage of navigation technologies, monitor new products and trends on the international navigation market, using any accessible platforms to inform GNSS customers about potential possibilities for business

Our activities

Association
GLONASS/GNSS – Forum

The 5th International Satellite Navigation Forum

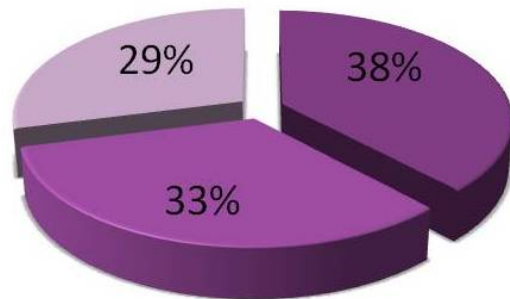

Navitech-Expo'2011 International Exhibition

**SPRING
2011**

EXPOCENTRE FAIRGROUNDS
Moscow, Russia

Satellite Navigation Forum – central event in Russia focusing on applications of satellite navigation technologies, related national and international policies and practices, future development of satellite navigation programs worldwide as well as discusses applications of satellite navigation versus terrestrial location based services.

How we extend the frontiers?

Association
GLONASS/GNSS – Forum

www.video.aggf.ru

Video Server

Presented information easily perceived and understood by the audience, visualization, no need to read, easy approach

Release of analytical review “Russian market of professional navigation equipment” – our commercial product, free of charge for state, scientific and educational organizations.

Electronic and printing mass-media – articles, comments, expert opinions. We continue release the electronic magazine for specialists (B2B).

Average video server attendance has exceeded attendance of the main Association website!

How we extend the frontiers?

Association
GLONASS/GNSS – Forum

With our support firstly in Russia took place competition of pilotless car-robots “ROBOCROSS” within the Youth Forum “Seliger 2010”

New section at IV Satellite Navigation Forum – Educational programs GLONASS. Within the section Russian educational institutes and enterprises present training programs, courses in the field of satellite navigation.

In order to raise public awareness about new GNSS-based technologies, application possibilities of GNSS products in various sectors of economy we work over a new project – **magazine for Users** (not professionals B2C)

Magazine for the end users of GNSS products & services

How we see cooperation with International organizations?

Association
GLONASS/GNSS – Forum

We invite international organizations to take part in our projects:

- ✓ The publication of news on website www.aggf.ru
- ✓ Subscription to our news mailing
- ✓ Thematic video-clips on the video-server
- ✓ We invite you to take part in the International Forum on Satellite Navigation (Moscow, spring 2011)
- ✓ Project for students and young experts
- ✓ Publications of thematic articles in periodical magazine “ISNS”

We are open for cooperation, creation of the new projects and involvement in already existing!

International Committee on GNSS
October 19, 2010 Turin, Italy

Thank you for attention!
