

## Galileo Terrestrial Reference Frame (GTRF)

Activities performed by GGSP Consortium  
presented by Werner Enderle (ESA/ESOC)

ICG-08 Meeting, 11 – 15 November 2013, Dubai, United Arab Emirates

- GGSP Consortium
- GGSP Function
- GTRF Implementation
- Results
- Conclusion

The Galileo Geodetic Service Provider (GGSP) Consortium consists of 5 partners :

|        |                                       |             |
|--------|---------------------------------------|-------------|
| ● AIUB | Astro. Institute University of Bern   | Switzerland |
| ● BKG  | Bundesamt fuer Kartogr. und Geodaesie | Germany     |
| ● ESOC | European Space Operations Centre      | ESA         |
| ● GFZ  | Geo Forschungszentrum Potsdam         | Germany     |
| ● IGN  | Intitute Geographique National        | France      |

Consortium Leader is ESOC

The GGSP FOC activities are managed since Sept. 2013 by ESA – Galileo Project through the EC TGVF-OVF contract. Prime contractor for the TGVF contract is GMV, Spain

- Realisation and maintenance of a highly precise and stable Galileo Terrestrial Reference Frame (GTRF), the basis for all Galileo products and services

## Requirement for GTRF:

- The GTRF shall be compatible with the International Terrestrial Reference Frame (ITRF) at a precision of 3 cm (2 Sigma)
  - Provide positions and velocities for all Galileo Sensor Stations (GSS)
- Additional GGSP products:
    - Generation of precise products for
      - Satellite orbits
      - Clock parameters for satellites and stations
      - Earth Rotation Parameters (ERPs)
  - Monitoring the quality of products of the Galileo Mission Segment (GMS)

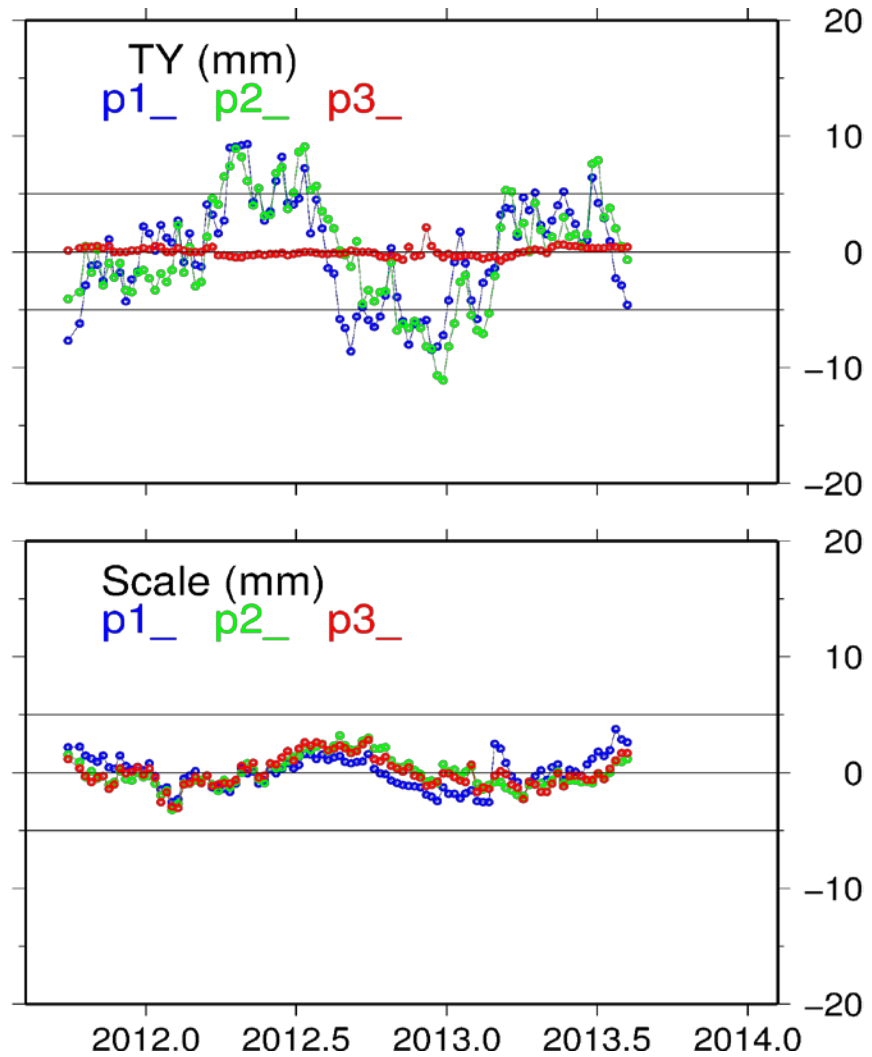

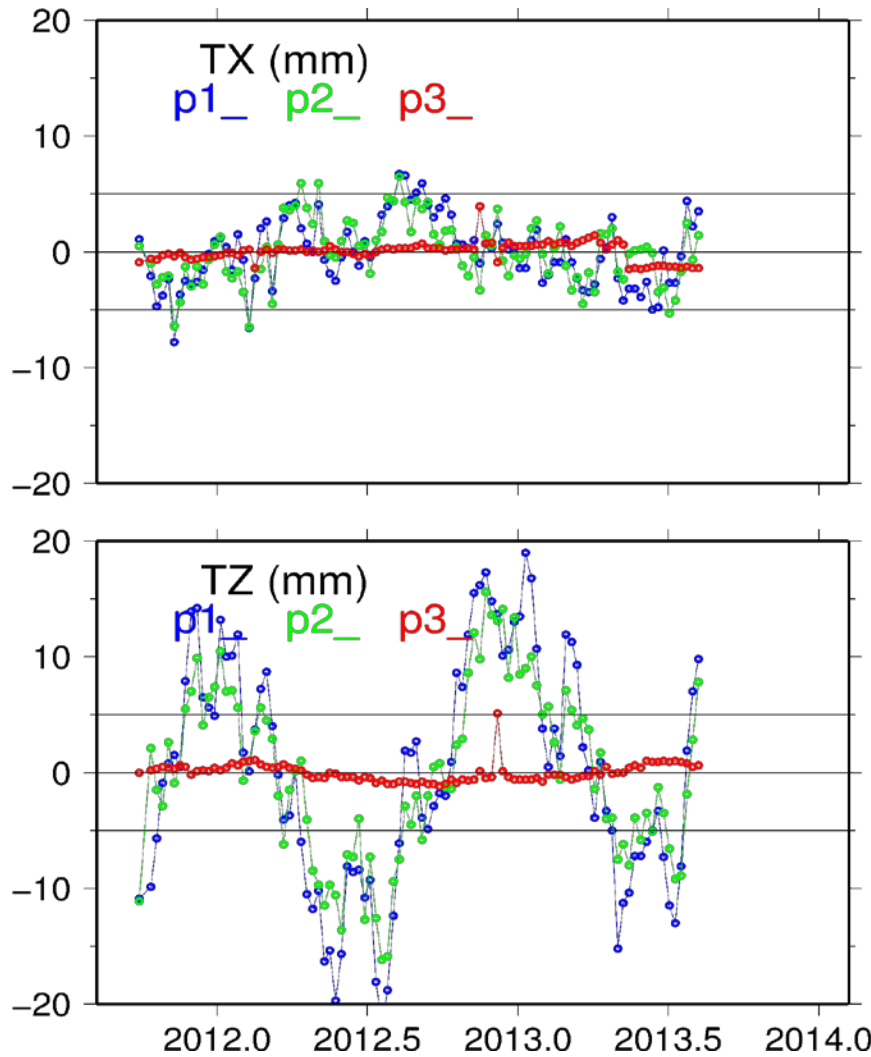

GTRF13v01 network.  
 blue squares: ITRF/IGS stations  
 red triangles: GESS/GSS sites

- Weekly solutions (station positions and ERPs) generated by 3 independent Processing Facilities (PF) (AIUB, GFZ and ESOC)
- Weekly combination of station positions and ERPs
  - Detailed analysis with summary report
  - Combined solution provided in SINEX
  - Quality assessment
  - Transformation to ITRF
- Weekly orbit and clock combination
- Initial GTRF (station positions & velocities) and its updates:
  - Latest GTRF releases
    - GTRF13v01 – on 18 May 2013
    - GTRF13v02 – update of GTRF 13v01 on 27 May 2013

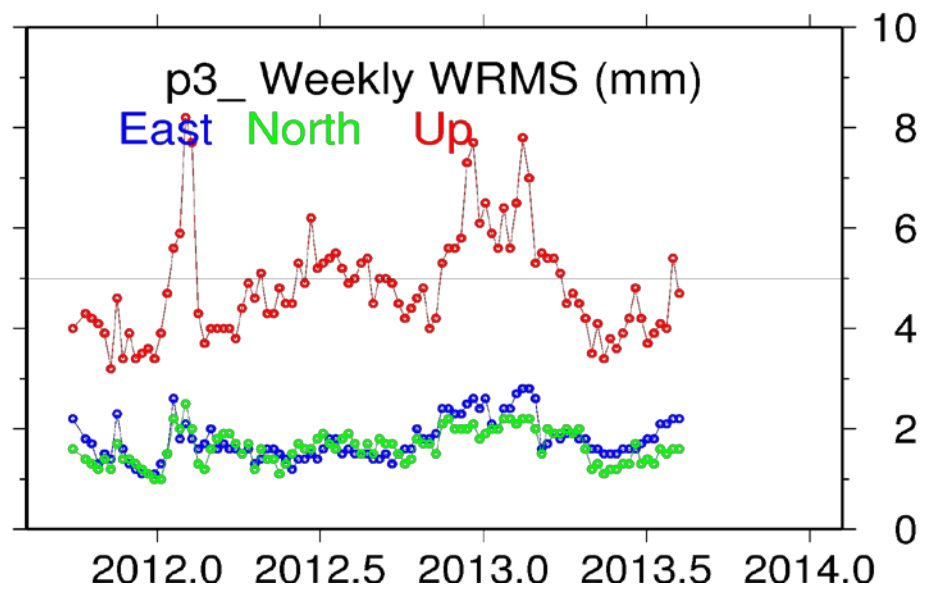

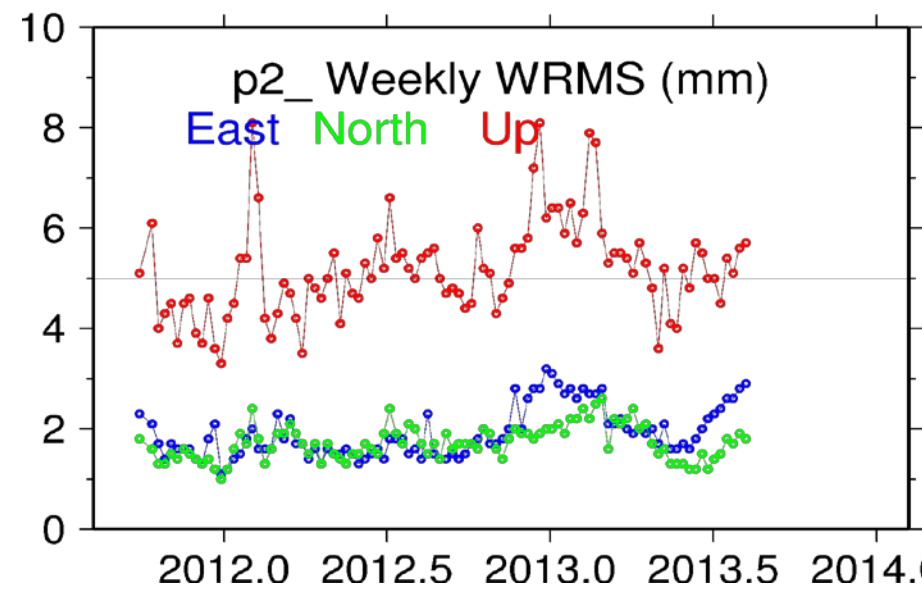

- Use Normal Equations from the 3 independent PFs
- Analyse and combine a 3 solutions
- Combine TRF using Minimum Constraint

$$= 0 \quad \overbrace{X_R = X_c + A\theta}^{\theta=0} \xrightarrow{\text{Normal Equations}} (A^T A)^{-1} A^T (X_R - X_c) =$$

GLEN\_12724M003

Transformation parameters from GTRF13v01 to IGB08 (ITRF2008)

|       | T1  | T2  | T3  | D                | R1    | R2    | R3    | Epoch  |
|-------|-----|-----|-----|------------------|-------|-------|-------|--------|
|       | mm  | mm  | mm  | 10 <sup>-9</sup> | mas   | mas   | mas   | y      |
|       | 0.0 | 0.0 | 0.0 | 0.00             | 0.000 | 0.000 | 0.000 | 10:285 |
| +/-   | 0.2 | 0.2 | 0.2 | 0.04             | 0.009 | 0.009 | 0.010 |        |
| Rates | 0.0 | 0.0 | 0.0 | 0.00             | 0.000 | 0.000 | 0.000 |        |
| +/-   | 0.2 | 0.2 | 0.2 | 0.04             | 0.009 | 0.009 | 0.010 |        |

RMS differences between GTRF13v01 and IGB08 (ITRF2008) station coordinates and velocities

| Station # | RMS-Pos. |     |     | Epoch  | RMS-Vel. |      |     |
|-----------|----------|-----|-----|--------|----------|------|-----|
|           | E        | N   | U   |        | E        | N    | U   |
|           | mm       |     |     |        | y        | mm/y |     |
| 91        | 2.1      | 1.8 | 3.7 | 10:285 | 0.7      | 0.7  | 1.4 |

- Orbit RMS agreement btw PFs and combined (co\_) orbits for GPS satellites
  - mostly in the level of 5-10 mm
  - co\_ difference to the IGS Final is at the same level

- agreement for the clocks shows RMS of about 15 to 25 ps (all biases subtracted)

- **Very good performance of PFs and GTRF combined solutions repeatability:**
  - 1 - 2 mm Horizontal
  - 2 - 5 mm Vertical
  
- **Good agreement between PF solutions in origin and scale**
  
- **GTRF Maintenance**
  - Maintenance as planned
  - The latest release of the GTRF is GRTF13v02
  - Performance meets requirements (with very good margin)
  
- **Perfect alignment to the ITRF at the sub-mm level**
