NATIONAL WEATHER SERVICE

THE NATIONAL COOPERATIVE OBSERVER

NATIONAL CLIMATIC DATA CENTER

Editor: Steve DelGreco

NATIONAL COOPERATIVE OBSERVER is prepared, funded and distributed by the National Oceanic and Atmospheric Administration (NOAA) and is provided free of charge to Cooperative Observers.

Photographs are taken by NWS employees unless otherwise noted. Narratives are prepared and submitted by the NWS. Narratives are edited only for grammatical errors, space limitations and consistency.

The Cooperative Observers Climatological Network was created in 1890. The program is currently administered by the National Weather Service, a line of the National Oceanic and Atmospheric Administration, an agency within the Department of Commerce. One of the responsibilities of the NWS is to take meteorological observations which are used to record the climate condition in the United States. The National Weather Service relies heavily on a vast network of cooperative observer volunteers to achieve this objective.

The NWS determines where observations are needed and furnishes standard metrological instruments to individuals who volunteer their time to take a record daily weather observations of the weather. Currently, there are about 8000 published volunteer observation stations operated by individuals, many are maintained by institutions and commercial firms (universities, utility companies, etc.). All cooperative observers submit a monthly report summarizing daily observations. These contributions to the climate record of the United States are invaluable.

The publications staff of NATIONAL COOPERATIVE OBSERVER welcomes your help in acquiring stories concerning experiences by cooperative observers and significant weather events. We request our observers to mail such items to:

Shinichi Kaneshiro of Hilo, Hawaii was the recipient of the **JOHN CAMPANIUS HOLM AWARD**. In a special ceremony at the mayor's office, he had the distinction of having the Director of the National Weather Service, Jack Kelly (left) and Meteorologist in Charge, James Weyman, (right) from the Honolulu Forecast Office present to do the honors. Kaneshiro was honored for his superior dedication and continuous outstanding services to the National Weather Service cooperative network program. Recently retired from the State Department of Agriculture, he has been active in numerous community services and organizations involving the promotion of agriculture with the youths of the community. Kaneshiro has a long history of consistently accurate and timely observations. His character and dedication are exemplified by his attention to detail as reflected by the neatness and legibility of his recorded observations. His dedicated efforts to maintain a continuous observations during times of illness or absence has been duly noted.

JOHN CAMPANIOUS HOLM AWARDS

Recognizing 41 years of dedication, **Elsmere, Nebraska** resident **Lester Stufft** was a 1999 recipient of the **John Campanious Holm Award**. David Wert, Meteorologist in Charge of the North Platte Weather Service Office, presented the award during a ceremony on December 9th, in Ainsworth. Lester follows in the footsteps of his grandfather, who established the station in 1911 and his mother, **Ruby**, for whom the 70-year length of service **Stufft Award** is named. Three generations of Stuffts have provided weather data from the same site for 88 years. Pictured are; front row, Lester Stufft, daughter Shiel Barager, son Garret Stufft, son Curt Stufft, back row, Hydrometeorological Technician Michael Power and Meteorologist in Charge David Wert.

Honoring more the 50 years of dedication, the 1999 **John Campanious Holm Award** was presented to the **City of Pickstown, SD**. Presenting the award was Sioux Falls, Meteorologist in Charge Greg Harmon. On hand to accept the award were the President of the Board of Trustees, City of Pickstown **Cindy Broyhill**, our own COOP Observer **Verlyn Baker**, and **Betty Kirwan**, widow of former COOP Observer **Duane Kirwan** who passed away in 1997. **Verlyn Baker** was also presented a **25 Year Length of Service Award** for his long standing service to the COOP program. Pictured (L-R) Greg Harmon, Betty Kirwan, Verlyn Baker and Cindy Broyhill.

JOHN CAMPANIOUS HOLM AWARD

Robert Gilg (left), **Newport, Nebraska** resident was presented the prestigious **John Campanious Holm Award** by Kathleen Butler, Data Acquisition Program Manager, for more than 36 years of dedicated weather observing. Also attending were **Mrs. Gilg**, the **Rock County Leader**, and Mary White ASA from the North Platte Weather Service Office. Mr. Gilg began taking observations when **Lenord Bendig**, the cooperative observer for **Newport** showed up at his door with all the weather equipment. Mr. Bendig told Bob that he was being transferred so he would have to take over the weather duties. Bob never hesitated and they began setting up the equipment while Mr. Bendig explained the program to him. Neither of them thought to call the weather service office and notify them, they just knew it was a job that needed done. Bob is very proud of the fact that in 36 years that he has been the observer for Newport he has only missed one day, due to a death in the family.

60 Year Service Award

Earl Lynch of **Rochelle 3E, Wyoming**, was presented the **Helmut Lansberg Award** for 60 years of service. Making the presentation was Mitchell Erickson, Cooperative Program Manager from Rapid City, South Dakota.

These and other publications are available from the National Climatic Data Center

Hourly Precipitation Data

This publication contains hourly precipitation amounts obtained from recording rain gages located at National Weather Service, Federal Aviation Administration, and cooperative observer stations. Published data are displayed in inches and tenths or inches and hundredths at local standard time. **HPD** includes maximum precipitation for nine time periods from 15 minutes to 24 hours, for selected stations.

Climatological Data

Monthly editions contain station daily maximum and minimum temperatures and precipitation. Some stations provide daily snowfall, snow depth, evaporation, and soil temperature data. Each edition also contains monthly summaries for heating and cooling degree days (65 degrees F base). The July issue contains a recap of monthly heating degree days and snow data for the preceeding July through June.

The Annual issue contains monthly and annual averages of temperature, precipitation, temperature extremes, freeze data, soil temperatures, evaporation, and a recap of monthly cooling degree days.

Storm Data

Monthly issues contain a chronological listing, by states, of occurrences of storms and unusual weather phenomena. Reports contain information on storm paths, deaths, injuries, and property damage. An "Outstanding storms of the month" section highlights severe weather events with photographs, illustrations, and narratives. The December issue includes annual tornado, lightning, flash flood, and tropical cyclone summaries.

Monthly Climatic Data for the World

This publication contains monthly means for temperature, pressure, precipitation, vapor pressure, and sunshine for approximately 2,000 surface data collection stations worldwide and monthly mean upper air temperatures, dew point depressions, and wind velocities for approximately 500 observing sites.

Local Climatological Data

LCD summarizes temperature, relative humidity, precipitation, cloudiness, wind speed and direction observation for several hundred cities in the U.S. and its territories. Each monthly publication also contains the 3 hourly weather observations for that month and an hourly summary of precipitation. Annual **LCD** publications contain a summary of the past calendar year as well as historical averages and extremes.
