# CARIBE WAVE 2021

CARIBE WAVE 21 s'est tenu dans des circonstances de pandémie le 11 mars 2021. Chaque État membre et territoire a déterminé son niveau de participation.

Dans les Caraïbes et les régions adjacentes, **47 États membres et territoires** ont participé à cet exercice avec un total de plus de **335 000 personnes** engagées.

- La participation des MS représente un taux de **98%** (contre 92% en 2020).

CARIBE WAVE 21: British Virgin Islands (a) , Trinidad and Tobago (b) , and Mexico (c), France (d), Venezuela (e) Regional Hot-wash (f), Colombia (g).

# Objectifs CARIBE WAVE 22

## 1. Exercer et évaluer les communications entre le fournisseur régional de services aux tsunamis et les États membres/territoires.

- A. Valider l'**émission** des produits tsunami du PTWC.
- B. Valider la **réception** et la diffusion des produits tsunami par les points focaux d'alerte aux tsunamis du CARIBE EWS (TWFP) et/ou du Centre National d'alerte aux Tsunamis (NTWC).

## 2. Évaluer les procédures et les programmes relatifs aux tsunamis dans les États membres/territoires.

- A. Valider l'état de préparation de la réponse à un tsunami.
- B. Valider la capacité opérationnelle des points focaux d'alerte aux tsunamis (TWFP, ou fonction similaire) et/ou du Bureau national de gestion des catastrophes (NDMO).
- C. Améliorer la préparation opérationnelle. Avant l'exercice, s'assurer que des outils et des plans d'intervention appropriés ont été élaborés, y compris du matériel d'éducation publique.
- D. Valider que la diffusion des alertes et des informations/conseils par les TWFP et les NTWC aux agences nationales pertinentes et au public soit exacte et opportune.
- E. Évaluer l'état de la mise en œuvre du programme de reconnaissance Tsunami Ready pour le système Caribe EWS.

# PRODUITS PTWC

#CARIBEWAVE  
#TSUNAMIREADY

# Pour CARIBE WAVE 22, le PTWC émettra les produits suivants:

- Le message dummy initial pour les deux scénarios sera émis le **10 mars 2022 à 1400 UTC** et diffusé sur tous les canaux de diffusion standards.
- Le PTWC publiera également un message de début d'exercice via son compte Twitter à **1400 UTC**.
- À partir **1407 UTC**, les courriels du PTWC contenant tous les produits améliorés simulés (texte et graphique) seront envoyés aux serveurs Web Caribe EWS, TWFP et NTWC désignées pour l'un des scénarios.
  - D'ici le **25 Février 2022**, chaque État membre doit sélectionner un scénario et remplir le questionnaire suivant ([https://www.surveymonkey.com/r/CW22\\_ScenarioSelection](https://www.surveymonkey.com/r/CW22_ScenarioSelection)) pour sélectionner le scénario que leur pays utilisera pour l'exercice. Chaque pays et territoire choisira un scénario et décidera si et comment diffuser les messages dans sa zone de responsabilité.
  - **Si l'État membre n'informe pas le PTWC et le ITIC-CAR, les organisateurs décideront pour quel scénario le PTWC enverra les produits.**
  - Pour vérifier la liste actuelle des CARIBE EWS TWFP et NTWC officiellement désignés par l'UNESCO, consultez:

- \* THIS IS A TEST MESSAGE. AN EARTHQUAKE WITH A PRELIMINARY MAGNITUDE OF 8.0 OCCURRED IN THE DOMINICAN REPUBLIC REGION AT 1400 UTC ON THURSDAY MARCH 10 2022.
- \* THIS IS A TEST MESSAGE. TSUNAMI WAVES HAVE BEEN OBSERVED.
- \* THIS IS A TEST MESSAGE. BASED ON ALL AVAILABLE DATA... HAZARDOUS TSUNAMI WAVES ARE FORECAST FOR SOME COASTS.

TEST... TSUNAMI THREAT FORECAST...UPDATED ...TEST

\* THIS IS A TEST MESSAGE. TSUNAMI WAVES REACHING MORE THAN 3 METERS ABOVE THE TIDE LEVEL ARE POSSIBLE ALONG SOME COASTS OF DOMINICAN REPUBLIC.

\* THIS IS A TEST MESSAGE. TSUNAMI WAVES REACHING 1 TO 3 METERS ABOVE THE TIDE LEVEL ARE POSSIBLE ALONG SOME COASTS OF

COLOMBIA... HAITI... VENEZUELA... ARUBA... BONAIRE...  
CURACAO... AND PUERTO RICO AND VIRGIN ISLANDS.

\* THIS IS A TEST MESSAGE. TSUNAMI WAVES REACHING 0.3 TO 1 METERS ABOVE THE TIDE LEVEL ARE POSSIBLE FOR SOME COASTS OF

TEST... POTENTIAL IMPACTS ...TEST

- 
- \* THIS IS A TEST MESSAGE. A TSUNAMI IS A SERIES OF WAVES. THE TIME BETWEEN WAVE CRESTS CAN VARY FROM 5 MINUTES TO AN HOUR. THE HAZARD MAY PERSIST FOR MANY HOURS OR LONGER AFTER THE INITIAL WAVE.
  - \* THIS IS A TEST MESSAGE. IMPACTS CAN VARY SIGNIFICANTLY FROM ONE SECTION OF COAST TO THE NEXT DUE TO LOCAL BATHYMETRY AND THE SHAPE AND ELEVATION OF THE SHORELINE.
  - \* THIS IS A TEST MESSAGE. IMPACTS CAN ALSO VARY DEPENDING UPON THE STATE OF THE TIDE AT THE TIME OF THE MAXIMUM TSUNAMI WAVES.
  - \* THIS IS A TEST MESSAGE. PERSONS CAUGHT IN THE WATER OF A TSUNAMI MAY DROWN... BE CRUSHED BY DEBRIS IN THE WATER... OR BE SWEEPED OUT TO SEA.

TEST... POTENTIAL IMPACTS ...TEST

\* THIS IS A TEST MESSAGE. A TSUNAMI IS A SERIES OF WAVES. THE TIME BETWEEN WAVE CRESTS CAN VARY FROM 5 MINUTES TO AN HOUR. THE HAZARD MAY PERSIST FOR MANY HOURS OR LONGER AFTER THE INITIAL WAVE.

\* THIS IS A TEST MESSAGE. IMPACTS CAN VARY SIGNIFICANTLY FROM ONE SECTION OF COAST TO THE NEXT DUE TO LOCAL BATHYMETRY AND THE SHAPE AND ELEVATION OF THE SHORELINE.

\* THIS IS A TEST MESSAGE. IMPACTS CAN ALSO VARY DEPENDING UPON THE STATE OF THE TIDE AT THE TIME OF THE MAXIMUM TSUNAMI WAVES.

\* THIS IS A TEST MESSAGE. PERSONS CAUGHT IN THE WATER OF A  
TSUNAMI MAY DROWN... BE CRUSHED BY DEBRIS IN THE WATER... OR

\* Les amplitudes réelles à la côte peuvent varier en fonction des amplitudes prévues en raison des incertitudes dans les prévisions et les caractéristiques locales. En particulier, les amplitudes maximales des tsunamis dans les petites îles sont susceptibles d'être beaucoup plus petites que prévu.

# Manuel et guides 86 : Directives du programme d'exercices communautaires pluriannuels contre les tsunamis pour le système d'alerte aux tsunamis et autres risques côtiers pour les Caraïbes et les régions adjacentes

- Ce guide est recommandé aux États Membres pour qu'ils envisagent les exercices Caribe Wave.
- Il fournit aux responsables communautaires une méthodologie et des outils pour mener et évaluer un exercice tsunami d'évacuation.
- Il est particulièrement pertinent pour les institutions qui seraient directement exposées aux effets d'un tsunami, comme les autorités locales, les écoles, les associations et les entreprises.
- Ce guide vise à promouvoir une culture d'exercice partagée afin de développer entre les autorités municipales chargées d'assurer la sécurité des habitants de leur quartier et les responsables communautaires - acteurs de la vie sociale et économique du territoire.
- Publié sur <https://www.weather.gov/ctwp/caribewave22>

# COVID Considérations

- Notez que la distance sociale / physique et les mesures d'isolement / confinement peuvent toujours être en vigueur
- Les États membres sont encouragés à envisager des événements ou des activités en ligne / virtuels pour faire participer le public
- La participation du public n'a pas besoin d'être une évacuation réelle, encouragez les gens à vérifier leur plan d'urgence / route / fournitures du tsunami et s'inscrire sur [tsunamizone.org](http://tsunamizone.org)
- Consultez les directives CARIBE EWS pour les tsunamis - [http://www.ioc-tsunami.org/index.php?option=com\\_content&view=DocumentRecord&docID=26796](http://www.ioc-tsunami.org/index.php?option=com_content&view=DocumentRecord&docID=26796)

## Tsunami Services and Evacuation/Sheltering Considering Physical Distancing Practices

### Context

The current COVID-19 response has required changes in workloads, work venues as well as physical distancing practices worldwide. This may create ambiguity or confusion with regards to warning services and tsunami response actions, like evacuation, and the implementation of national response plans. This document clarifies the status of the regional tsunami services, as well as suggests best practices for local and national actions.

### Regional Tsunami Services

The Pacific Tsunami Warning Center, as the UNESCO IOC CARIBE EWS Tsunami Service Provider (TSP), continues to operate 24 x 7 to provide tsunami services to the Caribbean and Adjacent Regions according to the [CARIBE EWS Users Guide](#).

In the case that operations were affected, a communication will be issued to its stakeholders, including the CARIBE EWS Tsunami Warning Focal Points (TWFP) and National Tsunami Warning Centers (NTWC). In such circumstances alternative arrangements for regional warning services would be put in place as much as feasible.

Coordination is also maintained with the Caribbean Tsunami Warning Program (CTWP), the Caribbean Tsunami Information Center (CTIC) and the Central American Tsunami Advisory Centre (CATAC).

It is important to reiterate that each country is solely responsible for the safety of its own population from tsunami hazards. The country's NTWC or Emergency Management Agency (EMA) is the authority for issuing a tsunami warning for any or all of its coasts, as the CARIBE EWS TSP information is only advisory.

It is also important to recall that for the case of local tsunamis the natural tsunami warning signals should be the trigger for immediate self-evacuation. Persons along low-lying coasts should self-evacuate and not wait for their National Tsunami Warning Center to issue a tsunami warning.

### National and Local Tsunami Services and Evacuation/Sheltering Best Practices during COVID-19

1. 24/7 arrangements of the national agencies to provide timely warnings to the local and national authorities, media and the public, when their action is required.
2. When the NTWC and/or the Emergency Management Agency issues a tsunami warning, the desired action for the public is to evacuate from at-risk locations.
3. The public needs to continue to use natural warning signs for tsunamis as cues for response, i.e. if people are near the coast and experience any of a tsunami's natural warning signs, they should quickly leave at-risk locations and move inland or to higher ground. The natural tsunami warning signs are strong or long ground shaking (from an earthquake), a sudden change of the sea level or a loud roar from the sea (from a tsunami).
4. Immediate life-safety is the priority when evacuations are directed. It is important that the public understands that **AN EVACUATION ORDER TAKES PRIORITY OVER THE STAY-AT-HOME**
