* THIS IS A TEST MESSAGE. IMPACTS CAN VARY SIGNIFICANTLY FROM ONE SECTION OF COAST TO THE NEXT DUE TO LOCAL BATHYMETRY AND THE SHAPE AND ELEVATION OF THE SHORELINE.

* THIS IS A TEST MESSAGE. IMPACTS CAN ALSO VARY DEPENDING UPON THE STATE OF THE TIDE AT THE TIME OF THE MAXIMUM TSUNAMI WAVES.

* THIS IS A TEST MESSAGE. PERSONS CAUGHT IN THE WATER OF A TSUNAMI MAY DROWN... BE CRUSHED BY DEBRIS IN THE WATER... OR BE SWEEPED OUT TO SEA.

* THIS IS A TEST MESSAGE. A TSUNAMI IS A SERIES OF WAVES. THE TIME BETWEEN WAVE CRESTS CAN VARY FROM 5 MINUTES TO AN HOUR. THE HAZARD MAY PERSIST FOR MANY HOURS OR LONGER AFTER THE INITIAL WAVE.

* THIS IS A TEST MESSAGE. IMPACTS CAN VARY SIGNIFICANTLY FROM ONE SECTION OF COAST TO THE NEXT DUE TO LOCAL BATHYMETRY AND THE SHAPE AND ELEVATION OF THE SHORELINE.

* THIS IS A TEST MESSAGE. IMPACTS CAN ALSO VARY DEPENDING UPON THE STATE OF THE TIDE AT THE TIME OF THE MAXIMUM TSUNAMI WAVES.

* THIS IS A TEST MESSAGE. PERSONS CAUGHT IN THE WATER OF A
TSUNAMI MAY DROWN... BE CRUSHED BY DEBRIS IN THE WATER... OR

Manual y guías 86: Programa multianual de ejercicios comunitarios sobre tsunamis directrices para el sistema de alerta de tsunamis y otros peligros costeros para el Caribe y las regiones adyacentes.

- Se recomienda esta guía para que los Estados miembros consideren los ejercicios CARIBE WAVE.
- Proporciona a los líderes de la comunidad para realizar y evaluar un ejercicio de evacuación de tsunami con una metodología y herramientas.
- Es particularmente relevante para los organismos que estarían directamente expuestos a los efectos de un tsunami, como el gobierno local, las escuelas, las asociaciones y las empresas.
- Esta guía tiene como objetivo fomentar una cultura compartida de ejercicios a desarrollar entre las autoridades municipales encargadas de garantizar la seguridad de quienes viven en su área y los líderes comunitarios, actores de la vida social y económica del área.

Consideraciones COVID 19

- Tenga en cuenta que el distanciamiento social / físico y la medida de cuarentena / encierro aún pueden estar vigentes
- Se alienta a los EM a considerar eventos o actividades virtuales / en línea para involucrar al público
- No es necesario que la participación del público sea una caminata completa contra el tsunami, anime a las personas a que revisen su plan de emergencia / ruta / suministros para el tsunami y se registren en tsunamizone.org
- Tenga en cuenta la guía de CARIBE EWS COVID-19 para tsunamis: <http://www.ioc-tsunami.org/index.php?>

Servicios de tsunami y evacuación / refugio considerando prácticas de distanciamiento físico

Contexto

La actual respuesta de COVID-19 ha requerido cambios en las cargas de trabajo, lugares de trabajo, así como prácticas de distanciamiento físico en todo el mundo. Esto puede crear ambigüedad o confusión con respecto a los servicios de alerta y las acciones de respuesta a los tsunamis, como la evacuación, y la implementación de planes de respuesta nacionales. En este documento se aclara la situación de los servicios regionales de alerta contra los tsunamis, y se sugieren las mejores prácticas para las acciones locales y nacionales.

Servicios Regionales de tsunami

El Centro de Alerta de Tsunamis del Pacífico, en calidad de Proveedor de Servicios de Tsunami (TSP) del CARIBE de la UNESCO, sigue funcionando 24 horas al día, 7 días a la semana para prestar servicios de tsunami al Caribe y regiones adyacentes, según la [Guía de Usuarios del CARIBE EWS](#).

En caso de que las operaciones se vieran afectadas, se emitirá una comunicación a sus partes interesadas, incluidos los puntos focales de alerta contra los tsunamis del CARIBE-EWS (TWFP) y los Centros Nacionales de Alerta de Tsunamis (NTWC). En tales circunstancias, se establecerán, en la medida de lo posible, acuerdos alternativos para los servicios de alerta regionales.

También se mantiene la coordinación con el Programa de Alerta contra los Tsunamis en el Caribe (CTWP), el Centro de Información sobre Tsunamis del Caribe (CTIC) y el Centro de Asesoramiento sobre Tsunamis de América Central (CATAC).

Es importante reiterar que cada país es el único responsable de la seguridad de su propia población frente a los peligros de los tsunamis. El NTWC o el Organismo de Gestión de Emergencias (EMA) del país es la autoridad encargada de emitir una alerta de tsunami para cualquiera o todas sus costas, ya que la información del TSP del CARIBE EWS es sólo de carácter consultivo.

También es importante recordar que en el caso de los tsunamis locales, las señales de advertencia de tsunamis naturales deben ser el detonante de una auto-evacuación inmediata. Las personas que se encuentran a lo largo de las áreas costeras bajas deben auto-evacuarse y no esperar a que su Centro Nacional de Alerta de Tsunamis emita una alerta de tsunami.

Servicios nacionales y locales de tsunami y mejores prácticas de evacuación/refugio durante COVID-19

1. Disposiciones 24/7 de los organismos nacionales para proporcionar alertas oportunas a las autoridades locales y nacionales, a los medios de comunicación y al público, cuando se requiera su actuación.
2. Cuando el Centro Nacional de Alerta de Tsunami y/o el Organismo de Gestión de Emergencias emiten una alerta de tsunami, la acción deseada por el público es evacuar de los lugares de riesgo.
3. El público debe seguir utilizando las señales de advertencia naturales de tsunamis como pistas de respuesta, es decir, si las personas están cerca de la costa y experimentan cualquiera de las
