

Regional Climate Summary

July 2019

Weather Forecast Office
Midland/Odessa, TX

Issued August 12, 2019 10:00AM CT

This July was warmer and drier than normal for the majority of West Texas and Southeast New Mexico. Temperatures were near normal across the central Permian Basin and well above normal in counties west of the Pecos River. There were a couple exceptional rain events which occurred on the 3rd and 22nd. During both of these events, over 2.00" of rain fell in a 24 hour period which caused significant flash flooding in Midland/Odessa, TX and Carlsbad, NM. These cities were some of the few locations that received above normal July precipitation. There was a decrease in severe thunderstorm reports this month, although a few storms did produce large hail and damaging winds mainly in the Davis Mountains and Big Bend region.

Midland Int'l Airport July Statistics:

- Hottest Day: 106°F on the 9th
